Sacramento, CA 95899-7377

Re: Special Investigation Into Covid-19 Vaccine Injuries

Dear Dr. Aragon:

Health and Safety Code section 100325 provides:

“The department shall cause special investigations of the sources of morbidity and mortality and the effects of localities, employments, conditions and circumstances on the public health and the department shall perform other duties as may be required in procuring information for state and federal agencies regarding the effects of these conditions on the public health.”

As I am sure you are aware, the Vaccine Adverse Event Reporting System administered by the Centers for Disease Control and Prevention indicates that at least 1500 Californians have died as a result of the Covid-19 vaccine, which your Department to this day continues to promote. Many thousands more have reportedly been injured by these vaccines.

Section 100325 establishes an affirmative duty on the part of CDPH to conduct the special investigations described, and the VAERS data regarding the Covid-19 vaccines no doubt justifies such a special investigation, as the vaccines reportedly cause both morbidity and mortality.

Pursuant to the California Public Records Act (Govt. Code §§6250, et seq.), I hereby request all records pertaining to any and all special investigations conducted or being conducted by CDPH into Covid-19 vaccine adverse events. I understand this may require the redaction of personally identifying information regarding any subject of the special investigation.

Thank you for your prompt attention to this matter.

Sincerely,  
Peter A. Baldrige
