Agenda

1. No evidence of an all-cause mortality benefit
2. No one is willing to publicly challenge the data we found
3. Early treatment: the better alternative
4. How to get compensated for vaccine injuries/death

Six Month Safety and Efficacy of the BNT162b2 mRNA COVID-19 Vaccine

Pfizer Phase 3: 6 month study result

THE most definitive study on all-cause mortality benefit

During the blinded, controlled period, 15 BNT162b2 and 14 placebo recipients died; during the open-label period, 3 BNT162b2 and 2 original placebo recipients who received BNT162b2 after unblinding died. None of these deaths were considered related to BNT162b2 by investigators. Causes of death were balanced between BNT162b2 and placebo groups (Table S4).

Pfizer 6 month study: Kill 7; Save 1

1. 20 people died who took the vaccine (1 COVID death)
2. 14 people died who took the placebo (2 COVID deaths)
3. Killed 7 people to save 1 person from dying from COVID!
4. Two ways to “spin”:
 - a. Pfizer: “There was no statistically significant all-cause mortality benefit because the study wasn’t powered for that.”
 - b. Me: “You killed 7 people to save 1 COVID death.”

Elevation of cardio and neuro events

Table S4 | Causes of Death from Dose 1 to Unblinding (Safety Population, ≥ 16 Years Old). a. Multiple causes of death could be reported for each participant. There were no deaths among 12–15-year-old participants.

Reported Cause of Death ^a	BNT162b2 (N=21,926)	Placebo (N=21,921)
	n	n
Deaths	15	14
Acute respiratory failure	0	1
Aortic rupture	0	1
Arteriosclerosis	2	0
Biliary cancer metastatic	0	1
COVID-19	0	2
COVID-19 pneumonia	1	0
Cardiac arrest	4	1

1. Pfizer Phase 3 trial: # of heart attacks 4x higher in vaccine group
2. VAERS: 75X elevation in symptom “cardiac arrest” vs. avg previous years

Anecdotes

Dr. Vinay Julapalli (Houston Methodist)

“We are seeing 2X - 3X higher STEMI's in June-Aug compared to any time in history.”

Silicon Valley top neurologist (20,000 patients)

2,000 VAERS cases this year (vs. 0 in past 11 years)

Dr. Ira Bernstein (700 patients)

25 reports this year vs. 0 in the past 29 years

Sunnycrest nursing home in Ontario, Canada with 136 beds

All residents given booster: 4 dead; 7 hospitalized. Might save 1 COVID case.

CDC study (12-17 year olds)

1. Found 14 deaths
2. All from causes elevated by vaccine (5 from heart attacks)!
3. $14 \times 41 = 574$ actual deaths
4. But expected # of COVID deaths (see TFNT3): 100

So we kill 6 kids for every child we might save.

VAERS data

1. Pfizer data: save 1 COVID life per 22,000 people
→ 10,000 COVID lives saved at current US vaccination level (200M)
2. Inconvenient truth: VAERS data shows > 200,000 people died from vaccines
3. We could be killing up to 20 people to save 1 person from dying from COVID

US COVID-19 Vaccines Proven to Cause More Harm than Good Based on Pivotal Clinical Trial Data Analyzed Using the Proper Scientific Endpoint, "All Cause Severe Morbidity"

Morbidity up too

1. All-cause morbidity is elevated for all COVID vaccines...
2. Over 4X for Moderna
3. Highly statistically significant

Table 1: All Cause Severe Morbidity

	Moderna		Control		Difference	P value
Randomized	15,210		15,210			
Days of Safety Follow Up	56		56			
# Severe COVID-19 Cases	0		30

Vaccine mandates

1. No intelligent person who understood the Pfizer study would take the vaccine.
2. This is why mandates are required
3. **Politicians will never admit they were wrong. Never.**

Nobody will debate me

1. No “vaccine expert” will debate me in a neutral public forum with a mutually agreeable moderator.
2. No F500 CEO will accept, even if they bring their own experts to the debate. They are unwilling to defend their vaccine mandates
3. Even with large \$\$ incentives no one will debate me.

The FDA, CDC, NIH all have declined to even discuss the issue. They don't want to see our analysis.

If they really want to stop “COVID misinformation,” why are they so afraid to debate me?

TRUTH
does not mind
being questioned

A LIE
does not like
being challenged

\$1M bet on # people killed

1. The [term sheet](#) is publicly available.
2. Nobody has accepted or made public a reasonable counter-offer.
3. I am highly motivated to negotiate: I no longer have a job.
4. The best way to end the misinformation is to accept my bet.
5. Nobody is willing to back “their” misinformation, **not even Pfizer.**

The screenshot shows a web browser window with the URL [skirsch.io](https://www.skirsch.io/). The browser's address bar and tabs are visible at the top. Below the navigation bar, there is a profile picture of a man in a blue shirt. The main content area features two article cards. The first card, titled "Early treatment", includes a collage of images (tea, water, thermometer, mask, pill) and a sub-heading "How to treat COVID, long-haul, and COVID vaccine side-effects". The second card, titled "Vaccine", includes an image of a hand holding a syringe and a sub-heading "Vaccine resources". Both cards have a "READ MORE" link and a small profile picture icon at the bottom right.

Early treatment

How to treat COVID, long-haul, and COVID vaccine side-effects

Treating COVID, long-haul, and vaccine side-effects ASAP is key for best outcomes.

Get compensation for vaccine injury/death

If you lost someone to the vaccine or are vaccine injured, please [register here](#) get monetary compensation

Summary

1. Vaccines should be immediately halted, not mandated.
2. Victims should be compensated, not ignored. Nobody else is calling for this.
3. Better way: infection + early treatment
 - a. Superior safety + efficacy: > 99%
 - b. NO masks, social distancing, lockdowns
 - c. Superior resistance to the virus (up to 27X better protection)
 - d. Faster herd immunity
 - e. No more variants
