

CDC Has No Records to Explain the Disappearance of a VAERS Report on the Death of a Two-Year-Old Boy Just Hours After Receiving a COVID-19 Vaccine

On December 16, 2021, ICAN, through its attorneys, issued a Freedom of Information Act **request** to the CDC seeking any documents reflecting why a certain **VAERS report** was no longer available in the VAERS database. The report described an extremely disturbing incident wherein a two-year-old boy “began bleeding out of the mouth, eyes, nose and ears within six hours” of his first dose of Pfizer’s COVID-19 vaccine on November 18, 2021, and died later that night. On February 14, 2022, the CDC finally **responded** to ICAN’s request, stating: “A search of our records failed to reveal any documents pertaining to your request.”

Significantly, the CDC has made **repeated assurances** that “COVID-19 vaccines are being administered under the most intensive vaccine safety monitoring effort in the United States’ history.” The CDC’s **VAERS Standard Operating Procedures for COVID-19** even states that the “CDC will perform clinical reviews” for certain “Adverse Events of Special Interest,” which include death, “especially in children (<18 years of age) and recipients of newly licensed vaccines).”

But despite all of these claims of about the unprecedented level of “intensive” safety monitoring of these vaccines, the CDC claims to have no records that would explain why a VAERS report describing the horrific death of a toddler suddenly disappeared from the primary government-funded system for reporting adverse vaccine reactions in the United States, VAERS—a system of which the CDC is a **co-sponsor**.

ICAN intends to get to the bottom of the disappearance of this deeply disturbing report and will persist in holding the CDC accountable for its purported claims of intensive vaccine safety monitoring.

Re: Missing VAERS Report (IR#0662)

Dear Sir or Madam:

This firm represents the Informed Consent Action Network (“ICAN”). On behalf of ICAN, please provide the following records to foia@sirillp.com in electronic form:

Documents reflecting why the VAERS report attached hereto is not currently available in VAERS.

We ask that you waive any and all fees or charges pursuant to 5 U.S.C. § 552(a)(4)(A)(iii). ICAN is a not-for-profit news media organization whose mission is to raise public awareness about vaccine safety and to provide the public with information to give informed consent. As part of its mission, ICAN actively investigates and disseminates information regarding vaccine safety issues for free, including through its website,¹ a weekly health news and talk show,² and through press events and releases. ICAN is seeking the information in this FOIA request to allow it to contribute to the public understanding of the government’s vaccine safety programs, including the government’s efforts to promote vaccine safety. The information ICAN is requesting will not contribute to any commercial activities.

Please note that the FOIA provides that if only portions of a requested file are exempted from release, the remainder must still be released. We therefore request that we be provided with all non-exempt portions which are reasonably segregable. We further request that you describe any deleted or withheld material in detail and specify the statutory basis for the denial as well as your reasons for believing that the alleged statutory justification applies. Please also separately state your reasons for not invoking your discretionary powers to release the requested documents

¹ <https://www.icandecide.org/>.

² <https://thehighwire.com/>.

in the public interest. Such statements may help to avoid unnecessary appeal and litigation. ICAN of course reserves all rights to appeal the withholding or deletion of any information.

Access to the requested records should be granted within twenty (20) business days from the date of your receipt of this letter. Failure to respond in a timely manner shall be viewed as a denial of this request and ICAN may immediately take further action.

If you would like to discuss our request or any issues raised in this letter, please feel free to contact Gabrielle G. Palmer at (212) 532-1091 or foia@sirillp.com during normal business hours. Thank you for your time and attention to this matter.

Very truly yours,

/s/ Aaron Siri

Aaron Siri, Esq.

2nd Letter Subject: Final Response Letter

Dear Mr. Siri:

The Centers for Disease Control and Prevention and Agency for Toxic Substances and Disease Registry (CDC/ATSDR) received your December 16, 2021, Freedom of Information Act (FOIA) request on December 16, 2021, seeking:

“Documents reflecting why the VAERS report attached [to original request] hereto is not currently available in VAERS.”

A search of our records failed to reveal any documents pertaining to your request. The National Center for Emerging and Zoonotic Infectious Diseases (NCEZID) relayed that CDC has a Memorandum of Understanding (MOU), with the Food and Drug Administration (FDA), stating that *all VAERS inquiries, FOIAs, and congressional inquiries are addressed by FDA.*

You may contact our FOIA Public Liaison at 770-488-6277 for any further assistance and to discuss any aspect of your request. Additionally, you may contact the Office of Government Information Services (OGIS) at the National Archives and Records Administration to inquire about the FOIA mediation services they offer. The contact information for OGIS is as follows: Office of Government Information Services, National Archives and Records Administration, 8601 Adelphi Road-OGIS, College Park, Maryland 20740-6001, e-mail at ogis@nara.gov; telephone at 202-741-5770; toll free at 1-877-684-6448; or facsimile at 202-741-5769.

If you are not satisfied with the response to this request, you may administratively appeal by writing to the Deputy Agency Chief FOIA Officer, Office of the Assistant Secretary for Public Affairs, U.S. Department of Health and Human Services, Hubert H. Humphrey Building, 200 Independence Avenue, Suite 729H, Washington, D.C. 20201. You may also transmit your appeal via email to FOIARequest@psc.hhs.gov. Please mark both your appeal letter and envelope “FOIA Appeal.” Your appeal must be postmarked or electronically transmitted by May 16, 2022.

Sincerely,

Roger Andoh
CDC/ATSDR FOIA Officer
Office of the Chief Operating Officer
Phone: (770) 488-6399
Fax: (404) 235-1852

Response to Aaron Siri was “failed to reveal any documents pertaining to request.” AKA no records exist for ID# 1887456 AKA not in VAERS AKA NOT even DELETED from VAERS after being made public.

However a second independent FOIA request for the same ID# 1887456 produced a very different response and a acknowledgement that the ID# exists! If a ID# exists it needs to be PUBLISHED IN THE PUBLIC DOMAIN.

This cuts to the heart of the matter as there are ~88,745 UNPUBLISHED ID#'s. Very precise ~26,681 during the “covid jab” era. Are there other dead bodies hiding in these unpublished ID#'s or are they all false reports, duplicates, or waiting to be processed? They have already DELETED ~17,900 Covid-19 jabs from the public domain, ~546 of them are DEATHS.

Dear Mr. [REDACTED]

This letter is our final response regarding your Centers for Disease Control and Prevention and Agency for Toxic Substances and Disease Registry (CDC/ATSDR) Freedom of Information Act (FOIA) request of March 24, 2022, assigned #22-01 [REDACTED]-FOIA, for

Dear FOIA Co-ordinator, This submission constitutes a request ('Request') pursuant to the Freedom of Information Act, 5 U.S.C. § 552 ('FOIA').

The Request is submitted on behalf of the 'Assoc [REDACTED]', a non-governmental organization, to protect, defend and advance health, particularly of children.

For the period from November 19th, 2021, to March 7th 2022, please provide mail with attachment containing the number '1887456' from these email addresses :

ayv6@cdc.gov
xct6@cdc.gov
fxd1@cdc.gov
fqv9@cdc.gov
ezu2@cdc.gov
mew2@cdc.gov
lem2@cdc.gov

We located 16 pages of responsive records. After a careful review of these pages, some information was withheld from release pursuant to 5 U.S.C. §552 Exemption (b)(5). The foreseeable harm standard was considered when applying these redactions.

Exemption 5 protects inter-agency or intra-agency memorandums or letters which would not be available by law to a party other than an agency in litigation with the agency. Exemption 5 therefore incorporates the privileges that protect materials from discovery in litigation, including the deliberative process, attorney work-product, and attorney-client privileges. Information withheld under this exemption was protected under the deliberative process and attorney-client privileges. The deliberative process privilege protects the decision-making process of government agencies. The deliberative process privilege protects materials that are both predecisional and deliberative. The materials that have been withheld under the deliberative process privilege of Exemption 5 are both predecisional and deliberative, and do not contain or represent formal or informal agency policies or decisions. Examples of information withheld include deliberative and attorney-client communications.

The attorney-client privilege protects “confidential communications between an attorney and his client relating to a legal matter for which the client has sought professional advice” and is not limited to the context of litigation. The information that has been withheld under the attorney-client privilege of Exemption 5 constitutes confidential communications between agency attorneys and agency clients.

You may contact our FOIA Public Liaison at 770-488-6246 for any further assistance and to discuss any aspect of your request. Additionally, you may contact the Office of Government Information Services (OGIS) at the National Archives and Records Administration to inquire about the FOIA mediation services they offer. The contact information for OGIS is as follows: Office of Government Information Services, National Archives and Records Administration, 8601 Adelphi Road-OGIS, College Park, Maryland 20740-6001, e-mail at ogis@nara.gov; telephone at 202-741-5770; toll free at 1-877-684-6448; or facsimile at 202-741-5769.

If you are not satisfied with the response to this request, you may administratively appeal to the Deputy Agency Chief FOIA Officer, Office of the Assistant Secretary for Public Affairs, U.S. Department of Health and Human Services, via the online portal at <https://requests.publiclink.hhs.gov/App/Index.aspx>. Your appeal must be electronically transmitted by Tuesday, August 9, 2022.

Sincerely,

Roger Andoh

Hi Kevin,

I hope you and your OGC colleagues are doing well and staying safe. This statement is included in general information on the VAERS form: "Knowingly filing a false VAERS report with the intent to mislead the Department of Health and Human Services is a violation of Federal law (18 U.S. Code § 1001) punishable by fine and imprisonment." (b)(5)

(b)(5) We think we are seeing an increasing number of false or fraudulent VAERS reports. For example, the other day we detected a death report in a child that is clearly a fake (b)(5) Our technical advisory group suggested (b)(5)

(b)(5)

(b)(5) I'm

interested on your thoughts. Thanks.

Tom

UPDATE on Death Record of 2-Year Old from Alaska SCRUBBED from VAERS

○ MAR 5, 2022

“A search of our records failed to reveal any documents pertaining to your request.” — the CDC

As explained [in this previous post](#), back in December '21, the death record of a 2 year old boy from Alaska who received the Pfizer inoculation was completely covered up and hidden from ever being public released in VAERS.

Let's review again exactly what happened, and then also summarize the implications that result from this incident:

1. On the morning of Monday, 11/29/21, an independent VAERS analyst, Albert Benavides, downloaded the zip files containing the VAERS data for the week ending Friday 11/26 (VAERS releases new data files weekly on Fridays [here](#)). Note that the files were not actually available on Friday 11/26, likely due to the Thanksgiving holiday.
2. He discovered what appeared to be an extra 14,529 records with dates on some of them that would imply that these records belong to the upcoming week's release (12/3).
3. After conferring with other independent VAERS analysts, it was concluded that indeed these 14,529 records were likely slotted to be released on 12/3, the upcoming Friday.
4. Anyone else who subsequently attempted to download the VAERS data on 11/29 or later received data files that did not contain these 14,529 records. This indicates that the CDC/VAERS noticed their error rather quickly and replaced the data files so that the extra records were no longer in the download.
5. After examining the 14,529 extra records, one record stood out to us as one to watch for in the next data release— the death record of a 2 year old from AK ([VAERS_ID 1887456](#)).
6. Copies of the files containing the extra records were uploaded to the internet archive [here](#) to establish a public record with a date stamp of 11/29/21.
7. On 12/3, sure enough the 14,529 records which were “previewed” on 11/29, were released as anticipated, with the exception of one record — the death record of a 2 year old boy from AK was missing. All of the other 14,528 records were accounted for in the 12/3 release. Notably, the records which were released on

through 4/22/2022](#)

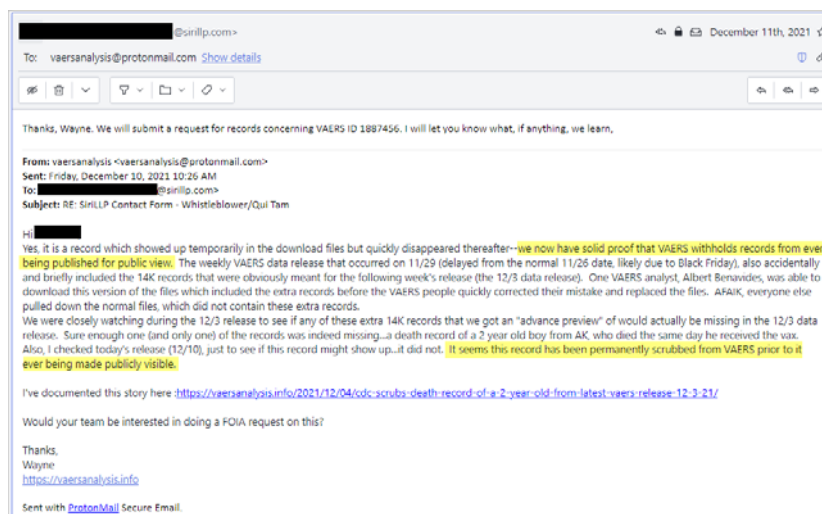

12/3 were in exactly the same state as the records which were “previewed” on 11/29. None of the data in these records had changed.

8. On 12/10 and subsequent weeks, this 2 year old’s record continued to be absent. To this day, record 1887456 has never been published. Nor has any other death record (with perhaps a different ID) matching the description of a 2 year old from Alaska receiving the Pfizer inoculation ever been published.
9. If it had not been for the 11/29 “preview” of the 2 year old’s death record, no one outside of the CDC/VAERS would have known anything about it, since it was never officially published.

Based on the above, here are the implications:

1. VAERS holds back information that is ready to publish. 14,529 records were ready for publishing on 11/29, but were not published until 12/3. This shows intentional throttling of data, and a lack of timeliness (or willingness?) in releasing data that is available to release on any given Friday.
2. VAERS deliberately removes or prevents records from **ever** being publicly released. We do not know how many records are completely hidden from the public nor do we know how often they do this, but we do know for a fact that they actually do this. This is a far greater concern than the fact that they regularly remove some records that have previously been publicly released. Records which have been previously released, but which are subsequently removed can be tracked ([see here](#), or use the superb “[Wayback Machine](#)” at [medalalerts.org](#)).
3. Based on this one example, we can conclude that it is certainly possible that VAERS is deliberately removing any records from ever being seen by the public that are clearly very incriminating. Is it just coincidence, that the record which the public would never have known about is the record of a 2 year old, who would have been ineligible to receive the Covid-19 inoculations (outside of a clinical trial)? And whom furthermore died within six hours of the inoculation in a horrible manner? Is this a form of silent censorship and gaslighting?

On Dec. 11th, Aaron Siri’s group was contacted (see below) and subsequently, on Dec. 16th, a FOIA request was submitted to the CDC regarding VAERS record 1887456.

On Feb. 14th, the CDC [responded to the FOIA request](#) stating: “A search of our records failed to reveal any documents pertaining to your request.”

Seriously? You’re joking, right CDC?

If there were any way to locate, reach out to, and speak to the family of this 2 year old, we can assume that a bombshell interview would ensue. **LET US NOT FORGET this 2 year old boy from Alaska, who is a victim of the covid-19 inoculation program and whose life having been tragically snuffed out prematurely, is now having even the memory of him being desecrated through the gaslighting and memory-holing of the people at the CDC/VAERS.**

Rest in Peace little one, May our righteous and angry God Almighty above have mercy on the souls who did this to you...

Thank you Wayne. Very precise account of the timeline and what makes this record uniquely different then all other reports that have been “deleted” in the past. The toddler death is very sad in itself, but the implications of how many other legitimate reports that may never be published could be the silver bullet of the smoking gun!? I’ve started to say only after studying the weekly drops for months, that this ~1% under reporting factor Harvard Pilgrim study needs to be viewed in two distinct parts! The 1% URF that is reported “To VAERS” and the ~x% “VAERS REPORTS TO PUBLIC”? Just begs the question of the ~50K “empty” ID#’s that have never been reported at all!! Sure many may still be in process, but the first half of those series of yet to be are now approaching a year old or older if they are actually still in a inventory of “to be processed”. Since I submitted a legitimate VAERS report myself, I know full well they

issue a temp ID# and it must auto generate a soon to be permanent ID#. However, I had to send a separate email to info@cdc.gov to request my official ID# and report when it was to become finalized! Otherwise there is no confirmation given with out this special request. How many people and institutions are going to jump through that extra hoop of fire or even have the wisdom to know the difference? That means the CDC knows full well which reports are being monitored by the public and which are not and are just happy at the accomplishment of submitting a very cumbersome and time consuming report.

*****CDC SCRUBS Death Record of a 2-Year Old from Latest VAERS Release (12/3/21)*****

© DEC 4, 2021

This site has historically kept track of all Covid-19 vaccine VAERS records which were erased from the system (or hidden from public view) in subsequent weeks. So records appear one week in the weekly release, and then sometimes they are gone in the next release or subsequent releases. All of the VAERS records which have gone missing since January are documented here in this post: [Are VAERS records for Covid-19 Vaccines being deleted every week???](#)

Something very interesting happened this past week over the Thanksgiving holidays. The regular Friday weekly VAERS data release (11/26) did not happen, presumably because of the holiday. Instead, the release happened on Monday, 11/29. However, what was unusual was that initially at the time of release, the download files contained an extra 14,529 records which were not supposed to be there. These files were quickly replaced with the correct ones, but not before Albert Benavides (aka [WelcomeTheEagle88](#) — the CDC can't get anything past Mr. Eagle Eyes!), was able to download the files first. Anyone else who subsequently downloaded the data release files, ended up downloading files which didn't contain the extra 14,529 records. These extra records which Albert received were obviously slotted to be released the subsequent week (for the 12/3 release).

So what would happen during this Friday's (12/3) weekly data release? Would we see these 14,529 records in the data release? Would there be any missing? What actually ended up happening?

Well, all of the 14,529 extra records from 11/29 did in fact show up in the Friday 12/3 data release...EXCEPT for this one below, a 2 year-old from Alaska who died on the same day as he received the Covid injection:

Office Visit	No

Symptoms

Death	
Ear haemorrhage	
Epistaxis	
Eye haemorrhage	
Mouth haemorrhage	

Adverse Event Description

Patient began bleeding out the mouth, eyes, nose and ears within six hours of shot. Died that night.

Lab Data	Current Illness	Adverse Events After Prior Vaccinations
	None	

Medications At Time of Vaccination	History/Allergies
None	None

*Days to Death is a calculated field and is not part of the original VAERS report

This here folks, is proof that the CDC does in fact withhold records from public viewing. This record was clearly included in the 14,529 records that someone (the holiday crew perhaps?) mistakenly published alongside the regular records on 11/29 (though the extra records were quickly removed).

Will this record show up in a future release? Perhaps. But what should concern us all is the following:

(1) Why were there records being withheld if they were already available to be made public? If this is indeed the most [“Intense Safety Monitoring in US History”](#), then why wait to make any relevant data public? Are they throttling the data by design? The excuse that perhaps these records were being held up because the CDC still needed to make changes to the records does not hold up to scrutiny, since the 14,529 records (minus 1) which were mistakenly included on 11/29 were identical to the records which showed up on 12/3.

(2) Why did they choose to withhold the record for the 2 year old, such that no one would even know it had ever existed if they hadn't accidentally “published” it temporarily on 11/29?

(3) Why is anyone even injecting 2 year olds (injection date was very recent on 11/18/21)? These products have not been authorized for 2 year olds...

(4) What is it with them needing to remove VAERS records of 2 year olds? This is not their first rodeo...see here: [Missing Persons Report: 2 year old who passed away after receiving the jab disappeared from VAERS \(not just once, but twice...\)](#)

Anyone have good answers to these questions???

Lastly, in case you do not believe there actually were such files containing the 14,529 extra records, they were posted on this site [here](#) prior to 12/3. You can check the Wayback Machine at <https://archive.org> to see when the files were uploaded to this site:

This is of course so horrible, and I'm grateful for your time and efforts. I'm thinking the 2 year old must be part of their clinical trials for the under 5 crowd right? How awful and evil.

Hypothetically, what if that particular 2-yr old entry was fictional, reported by someone trying to either sensationalize, discredit VAERS, or just test to see if a fictional entry is possible? In that

case, detecting and omitting the false entry would actually, add to VAERS' credibility. No? Again, hypothetical question.

Possible. but IMO, unlikely. A previous attempt to create a fake record several years ago ("Incredible Hulk" record) was actually published, then later removed.

Thank you Wayne! Yes, the pro-vaxxers seem to be zeroing in on this one 2yr old and maybe it wasn't a legitimate report? Deleting records after publication is nothing new as we both now. The fine print in VAERS says they delete duplicates and fraudulent claims. Ok very fair and appropriate. However, why can't we find the "twin" record of all those deleted? I can only find a "twin" of maybe 10%-15% of all the deleted that I spot checked. I actually checked all the 1st couple hundred in the first few months but the deletion frequency became to great. I did check this 2yr old and there is no other 2yr that died in Alaska!! So there you go, maybe can say they will eventually report this death. That takes us to point #2) filing a false claim in a felony and it says that on every single page/screen to remind you of that fact if you ever had the unfortunate opportunity to file one (I have).

So the real story here is all the stuff between the lines that you described in the article, like why do they have to wait to report if this is a early warning system? Nothing was changed on the other ~15K records... nothing! Not a period, not a word, or phrase, nada!! the

only thing "changed" from the 15K was the omission of this 2yr old.
Well I will keep reminding and searching and alert the public if and
when this 2yr old ever gets reported! Yes the Green Hulk report
person should have gone to jail! Filing a false report is a felony...
period.

Conclusion:

HHS is deceptive at every level, however it is clear they perjured themselves by responding to Aaron Siri the record did not exist, yet ID# 1887456 clearly did exist, and they were passing it around internally to figure out if it was a false claim? The fine point of the matter is there exists a very comfortable 4-6weeks authentication window to determine if a claim is false or a duplicate before finalizing and assigning a formal and public VAERS ID#. Otherwise what the hell good is a temporary ID#? Why does a victim need to send a additional email request for a formal and finalized ID# during the initial process? where is the accountability and what is the status on the other 26,000 unpublished reports?

I given my “guy” some very specific ID#’s that have resulted in DEATH where no apparent duplicate exists and they were submitted by “contactable physicians”. Yet they were deleted... More will be revealed
