Pfizer vaccine kills more people than it saves

Steve Kirsch
Executive Director
COVID-19 Early Treatment Fund
stk@treatearly.org

VRBPAC Meeting
September 17, 2021
I agree with all their reasons.

Here are some new ones you haven’t heard...
Nobody is paying attention to the elephant in the room

**All-cause mortality (D:L ratio)**
Furthermore, a review of available clinical information, including death certificates, autopsy, and medical records, has not established a causal link to COVID-19 vaccines, says the CDC.

Over 14,000 death reports in VAERS and no causality?!?

All attempts to meet with the FDA and CDC to discuss this have been stonewalled.

Reference: If Vaccine Adverse Events Tracking Systems Do Not Support Causal Inference, then "Pharmacovigilance" Does Not Exist
Agenda

1. Excess Death: Life calculations → Unacceptable
2. Elevation of Severe Adverse Events → Unacceptable
3. Pfizer clinical trial fraud never investigated → Unacceptable
4. Early treatment: the better alternative
5. What is happening in “the real world”
Excess Death:Life ratio is **UNACCEPTABLE**

<table>
<thead>
<tr>
<th>Study source</th>
<th>Excess deaths required to save COVID life</th>
<th>Lives saved</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pfizer 6 month*</td>
<td>5</td>
<td>1</td>

<td>Nursing home (booster)*</td>
<td>6</td>
<td>1</td>
</tr>
</tbody>
</table>

* Not statistically significant

**People killed > People saved**
The most definitive study on all-cause mortality benefit is negative.

<table>
<thead>
<tr>

</tr>
<tr>
<td>Vaccine</td>
<td>18</td>
</tr>
</tbody>
</table>

Excess Death:Life = 5:1

We killed 5 people to save a COVID death (net 18-14=4 lives lost) but this is not statistically significant.
VAERS excess deaths calculation

1. \((2927-500)\times 41 = 99,507\) actual deaths
2. \(99507/217 = 458\) D/M doses

Notes:
1. \(217\)M is the number of Pfizer doses delivered
2. 41 is the under-reporting factor (URF) in VAERS this year for the COVID vaccines computed from anaphylaxis rates from the JAMA paper.
3. 458 Deaths per Million Doses is just above the worldwide average of 411 which is demonstrated multiple independent ways.
VAERS D:L calculation

Last 6 month COVID deaths assuming 90% death reduction = 91,868 *.90 = 82,681 lives saved per 360M doses

\[-\frac{82.681}{360000} \times 1000000 = -230 \text{ D/M}\]

\[\frac{458}{230} = 2 \text{ per 6 month efficacy period}\]

Death:Life = 2:1
Nursing home

4 dead/7 hospitalized after Pfizer Booster Save .68 life from COVID in 6 mo

Death:Life = 6:1

Assumptions:
1. 3% IFR for elderly and 30% get COVID in a year
2. Booster lasts for 6 months

Sunnycrest nursing home
Whitby, Ontario
136 beds
This is a BIG deal. In ~3 months, Israel killed 60% of their 90 year olds who were vaccinated. The unvaccinated pretty much all survived. Whoa!

51,000 vax; 3,000 unvaxed --> 20,000 vaxed; 4,000 unvaxed. So rate of vaccinated went from 51/54=94.4% --> 20/24=83.3%

Full list: [Estimating the number of COVID vaccine deaths in America](#)
Cardiac arrest example

71X elevated vs. baseline
(avg over 5 years for all vaccines; 57/4*5=71)

NB: VAERS reporting propensity is unchanged from previous years→ These are real elevations

Note: The 71X factor is in a period shortly after vaccination and not the entire year!
“I’ve been talking to Cardiologists across the country. And what they have been saying is that they’ve been seeing much more inflammatory-thrombotic events such as heart attacks, pulmonary embolisms, and DVTs.”

Dr. Vinay Julapalli, MD
Interventional Cardiologist
20X increase in cancers

A U.S. doctor reports a '20 times increase' of cancer in vaccinated patients. A doctor has found an increase in cancers since the COVID-19 inoculation rollout.

wnd.com
1 in 317 boys (16-17) will get myocarditis from the vaccine

After the booster it could be 1 in 25

Reference: John Su, Safety update for COVID-19 vaccines: VAERS and mRNA COVID-19 Vaccination and Development of CMR-confirmed Myopericarditis (showing 1 in 1,000 overall rate of myopericarditis)
Guess when Israel started their booster program? Yup. July 30.
More booster deaths

This is a brief from a regional association of physicians in Germany to their members.

Informing them about an incident in a nursing home where 90 inhabitants were given the third booster shot. Out of this resulted 1 death, two resuscitations, and 9 critically ill with cardiopulmonary symptoms.

"Given the fact that neither German authorities (PEI) nor European Medicines Agency EMA has approved this booster," the association is urging the members to seriously reconsider the need for a booster as of now.
Why didn’t anyone ask any questions about the gaming in the Phase 3 trial?!? This is unlikely to happen by chance (p.< 0.00001).

### Table 2. Efficacy Populations, Treatment Groups as Randomized

</tr>
</tbody>
</table>

¹n = Number of participants with the specified characteristic.
²These values are the denominators for the percentage calculations.
³Participants may have been excluded for more than 1 reason.

Note: 100 participants 12 through 15 years of age with limited follow-up are included in the randomized population (42 in the vaccine group) and 58 in the placebo group.
Why hasn’t the FDA investigated the Maddie de Garay trial fraud?

1. She was in the Pfizer Phase 3 12-15 year old trial
2. She was 1 of just 1,131 kids in treatment arm
3. She was paralyzed less than 24 hours after her second Pfizer shot, but Pfizer reported her case as “abdominal pain” rather than “permanent paralysis.”
4. Today, she has no feeling below her waist, she can’t hold her head up on her own, she has to eat through a feeding tube.
5. It isn’t clear she will improve over time.
6. Physicians don’t know how to treat her.
7. She was never ejected from the trial.
8. FDA Commissioner Janet Woodcock promised an investigation.
9. She’s never been contacted by the FDA or CDC on the fraud allegation.
10. She has received $0 in compensation. ZERO.
11. She has been banned from social media platforms for violating their guidelines so she can’t share her story.
Early treatment benefits

1. Higher relative risk reduction (over 99%)
2. Simple prophylaxis protocols be used to prevent infection with up to 100% success without the use of any drugs whatsoever
3. Greater safety (minor temporary side effects, known safety profile)
4. They lower both all-cause mortality and all-cause morbidity
5. They work equally well on all variants
6. They do not promote escape variants
7. They do not cause vaccine enhanced infectivity/replication
8. They do not risk original antigenic sin (linked-epitope suppression)
9. They do not cause prion diseases
10. They prevent long-haul COVID syndrome nearly 100% of the time
11. They enable people to acquire recovered immunity which is both 13X to 27X stronger and more durable than vaccine-induced immunity
People are trying to send you a message... are you listening?

See WXYZ-TV’s Facebook post for > 10,000 stories like these
What do you say to the victims?
My son died, while taking his math class on Zoom. We are waiting for the autopsy because the doctors did not find anything. He was a healthy boy, he had a good academic index, he wanted to be a civil engineer. He was the best thing in my life.

VACCINE TYPE(S): COVID19
VACCINE NAME(S): COVID19 (COVID19 (PFIZER-BIONTECH))

SYMPTOM(S): AUTOPSY, DEATH
FOR MORE INFO

See the Vaccine article on [skirsch.io](https://skirsch.io)

It has over 600 pages of documents in support of this.

The “All you need to know” to know slide deck is excellent, short, and up-to-date.

Do this now, before the government censors it.
Appendix
Dr. Peter Schirmacher

1. Chief pathologist at the University of Heidelberg
2. One of top 100 pathologists in the world
3. Member German National Academy of Sciences
4. h-index: 100 (38,730 citations)
5. Did autopsy on 40 people who died within 2 weeks of vaccine → “30% to 40% died from the vaccine”

→ “Nobody has died from the vaccine” is a lie.

Why isn’t this covered in the US mainstream media?
