Marc, I have been calling them the MiniTrue for so long! The fact checkers are the beginning stages and a crossover department of the thought police. I am glad to see another person using the term!

Sad it's happening. Glad someone else is raising the truth with a book of reference.

1984 has proven to not be fiction. And, it's interesting that George Orwell's wife worked in the Ministry of Information in the Senate House in London; which he based the MiniTrue off of. He had insider knowledge.

Say goodbye to America. 1/3 population drop will shut the economy down and completely crumble the healthcare system. Where did you get this number from?

Kyle DeStefano

Spike Cohen Spike, I understand you are trying to reach as many people as possible, but you are intelligent and should see why politics and science shouldn't mix.

Getting into this vaccine debate is picking up the loud ones from last election and is distancing you from the average citizen.

Like I said, I understand why you are doing this, exposure.

The people in these comments are loud, no doubt. But how many other people see your comments and say nothing because they are turned off by this? Don't marginalize the middle. #Gold is the standard, constant. Not a byproduct of political winds.

Still love you and will vote for you if you choose to run.

Food for thought.

Kurtis, because he was the first of many to see through the bs. He slowed down the plan that his predecessors had been working towards. He reversed some actions that he saw were corrupt and effected change that they would have to explain their reversals once he was out of office. If they just trashed him the entire time, they could continue to blame him after he left.

Afghanistan is a prime example. He was working his way peacefully through our adversarial world leaders and dominating the peace agreements. He was bringing business back home to the US. He wasn’t letting them bully us into funneling money into their extortion. He was making the financial business of government run smoothly.

In doing so, he was proving to us citizens that what HAS been going on for decades, was corrupt and wrong. He also squeezed the pockets of many members of our government (going back how are public servants becoming millionaires).

He’s the first since JFK to not play into their long running plan. But, they couldn’t pull another Grassy Knoll without it being too obvious.

Trump couldn’t be bought by them. And they couldn’t get him to filter himself.

there have been a lot of doctors discredited for coming out against vaccines in the past and there is a lot of testing that has parameters to give them the results they want. Vaccines have always been a giant lie and harmful. This vaccine, some of the top scientists are saying 90% of people who got the covid vaccine will die within 3 years, I've been estimating it at 80% in 5 years with the research I've done. It is absolutely atrocious that people haven't been able to learn the downside of vaccines or rather they block it out.

Kurtis, it was answering your rhetorical question. I don’t have a love affair with Trump. It’s merely the fact that he wasn’t a politician. That he wasn’t part of the Robber Baron’s club. Corruption is both red and blue. It just so happens that Trump is red, white and blue with Stars and Stripes.

If you can’t handle the answers, don’t ask the question in a public forum.

Loretta Spears I'm with you! Husband got Rona from my fully vaxxed brother. He didn't have a fun time of it, but he did go back to work in 10 days and is doing fine. **Spike Cohen** The vaccine has become so politicized that even if it is useful for preventing serious illness or death from covid, they pretend that adverse effects don’t exist and so they don’t warn people and don’t actually monitor people for them. My mother had a hypertensive crisis from the moderna booster which could have caused a stroke, and now she has to be on blood pressure medication. I also developed high blood pressure after one dose of Pfizer (I had covid already in November and just thought a booster would be a good idea, but I monitored my BP because of what happened with my mom). We know a 22 year old woman who also developed hypertension and tachycardia after the second Pfizer dose in March, and she is now on medication but her tachycardia is still uncontrolled. They are endangering people’s lives by pretending the adverse effects don’t exist. They know they exist which is why they don’t want to give boosters yet. They think it will cause even more adverse effects.

Bill Dixon

The shot should be your choice....I personally fo not feel they are safe. Also, why would you get a shot for a virus with a 99.95% survival rate. Makes no sense...get the shot and take a chance of something crazy happening to you!

**Spike Cohen** The vaccine has become so politicized that even if it is useful for preventing serious illness or death from covid, they pretend that adverse effects don’t exist and so they don’t warn people and don’t actually monitor people for them. My mother had a hypertensive crisis from the moderna booster which could have caused a stroke, and now she has to be on blood pressure medication. I also developed high blood pressure after one dose of Pfizer (I had covid already in November and just thought a booster would be a good idea, but I monitored my BP because of what happened with my mom). We know a 22 year old woman who also developed hypertension and tachycardia after the second Pfizer dose in March, and she is now on medication but her tachycardia is still uncontrolled. They are endangering people’s lives by pretending the adverse effects don’t exist. They know they exist which is why they don’t want to give boosters yet. They think it will cause even more adverse effects.

Robin Jones
Sean Mcelroy there has been plenty. It's getting it out there before they remove it as misinformation. I personally don't know anyone who died of COVID. I know 2 people who do. I know 4 people permanently paralyzed after getting the vaccine and 2 that have been vaccinated and hospitalized with COVID. I have seen news reports from 3 states that have had high schools student drop dead after the vaccine from exploding hearts and thousands with permanent heart problems now. I kids it forms water around the heart. All heart damage is permanent. Go look for yourself. First you have to weed through all the blockers put in a lace to make it harder to find.

Leon Robbins
Jennifer Kiely you obviously don't understand what you're reading. Those 7,000 deaths (or .002% of those vaccinated) being reported on the site is every person who has died after they were vaccinated. The overwhelming number of that 7,000 did not die because of the vaccine. And the ones that did had extremely rare allergic reactions or Guillain-Barré syndrome. The latter of which is even more rare than an allergic reaction and can be caused by a mosquito bite, the flu, and yes... Covid.

Nothing is 100% safe. Peanuts, strawberries, aspirin, and water (drinking not drowning) kill far more people each year than all vaccines combined. Nothing is 100% effective. Including vaccines. However, you are 2000 times more likely to die from Covid than you are from the Covid vaccine.
Mike Horn

**Belinda Crash Manning** these are not vaccines - they are bio products that program your mitochondria DNA to change your cellular structure, to do bad things when a new virus starts its infection - the response to the new virus now is so overwhelming that may kill you. These are not vaccines. That change your mitochondrial DNA for who knows what real purpose. It is evil.

That Hulk story does not sound valid. First, it's doctors filling out the VAERS reports... not random people. Unless the jab caused a patient to become deluded and thinking he was "the hulk", this sounds like total fake news to me. And even if it's not, it's well understood that only about 2% of vaccine reactions ever get reported to VAERS... so the numbers from VAERS are low.... And that's scary. More than enough safety signals have come up now... the roll out should have been halted.

I had a baby in July and my OB/GYN told me, "as a dr I have to tell you to consider the Covid vaccine but as a mom I would HIGHLY suggest you not get it during pregnancy, we have seen miscarriages skyrocket since women started getting the vaccine while pregnant"

Kimberly Sullivan

**Sean Mcelroy** wow. How ignorant. As of last I read (about a month ago) over 1000 miscarriages have happened after vaccination.

Sean Mcelroy

Because they rack side effects without the open forum of well a Facebook like platform. But they do allow anyone to submit to that side so they can investigate. And there have been no clinically proven miscarriages to date related to the actual cause of the vaccine. You can post any article you want it doesn’t mean it’s true. I could write an article about the vaccine making me a super hero. If it’s not from an actual medically reviewed site or forum how do you know it’s real? I get it can seem scary to some people and you get stuck in this echo chamber of people to posting articles that feed a narrative but you’re not getting facts your getting what you want to find. I’m the end do you want to be the shepherd or the sheep. Again to Sheriesse Mass there have been zero medical studies at ALL that link miscarriages to the vaccine. You pulled 336% out of a Facebook post. Here is the article that explains it’s not true. If it was true you would hear it all over the place to have tens of thousands of wemom get the shot then loss a baby. You’re own math based on a fake post dictates that. I have friends in healthcare across the country who are seeing this increasing trend on a daily basis. They are told that "any death is a covid death". They run PCR's at high cycles on the unvaxxed only. Running case numbers high with PCR false positive results. PCR is 95% inaccurate according to Dr. Roger Hodkinson, virologists and pathologist.

Americans need to stick together. This arguing and division is absolutely by design, our government is liking it as it gives them more opportunity to take away even more rights AND foreign governments are liking it as well.

This Sean guy has every right to speak his mind but, if he doesn't understand that FREEDOM and PERSONAL CHOICE is infinitely more important than safety...let him believe that.

Arguing is not going to help. Neither side will change their mind and it just spreads Americans even further apart from each other than we already are.

Love one another and we can win.

Those that insist on everyone getting the vaccine, show us what's in it. Prove that it is safe to take. Prove that it is better than eating right, exercising, getting Vitamin D from the sun and/or supplements, and taking vitamin C and Zinc, etc. Prove that the pcr tests for covid are finding covid virus and not the remnants of a past virus or other covid virus, like flu or cold. My guess is you can't because we are being deceived. The virus was made and released by the same people selling the vaccines. The vaccines don't stop you from getting covid, they don't stop you from spreading it and they have horrific side effects and could quite possibly end in death. Too many people know the truth and will not allow them to force us to take something that could kill us.

Shirley Wensmann

Sean McElroy the thing is that a person can be vaccinated and still get covid. the symptoms will be less so the person may not know they have covid and will be spreading it wherever they go. The infertility aspect is the spike protein that is in the vaccine travels through the system. Sean McElroy I think the point of most of these posts is that there are major effects/stats that aren't being reported. ER doctors and nurses aren't required to ask patients if they are vaxxed. I know several nurses in different ER locations who said there is a noticeable increase in unexplained heart complications, heart attacks in patients with no pre-existing conditions, and strokes and they are being instructed to test for covid and when they come back negative they are not asked if they are vaxxed. If this type of thing is happening all over, that would make statistic inaccurate now wouldn't it.

He didn’t say that about PCR tests see the quote from the medical jour TEST a FRAUD?”, then introduces the alleged quote from Mullis, who invented the PCR method in 1985 and was recognized for this achievement by being awarded the Nobel Prize in Chemistry in 1993 (here).

However, the quote is actually from an article written by John Lauritsen in December 1996 about HIV and AIDS, not COVID-19 (here).

The context around the quote shows Lauritsen is not saying PCR tests do not work. Instead, he is clarifying that PCR identifies substances qualitatively not quantitatively, detecting the genetic sequences of viruses, but not the viruses themselves: “PCR is intended to identify substances qualitatively, but by its very nature is unsuited for estimating numbers.

Cindora Palmer you do know vaers is an open platform. Anyone can put something there. Again a guy put in a response he got the vaccine and it turned him into the hulk. It says on the front page by the cdc that anyone can reply and to not trust everything on it.
Brandon etzlee. That’s a false study. The study is being misrepresented. It found vaccinated health care workers with breakthrough infections caused by the coronavirus delta variant had higher viral loads — the amount of virus detected in a person — compared to patients infected with earlier strains of the virus. Furthermore, other studies that compare the viral loads between vaccinated and unvaccinated delta patients found similar amounts of viral material in the two groups.

THE FACTS: The website, The Defender, which is published by the anti-vaccine organization, Children’s Health Defense, posted an article this week that distorts the findings of a recent study of breakthrough delta infections among vaccinated hospital staff in Vietnam.

The misleading article, written by Dr. Peter A. McCullough and posted online on Aug. 23, claims the study found vaccinated individuals carry “251 times the load of COVID-19 viruses in their nostrils compared to the unvaccinated,” and pose a “threat to unvaccinated patients, co-workers.” The article falsely blames the delta-driven surge in new COVID-19 cases on vaccinated people who are “acting as powerful Typhoid Mary-style super-spreaders of the infection.”

Robert F. Kennedy Jr., who is the founder and chairman of the board of Children’s Health Defense and has a history of posting vaccine misinformation, tweeted the article in a post that was shared 3,000 times.

But the article, and associated social media posts, distort the study’s findings, according to the Oxford University Clinical Research Unit in Ho Chi Minh City, Vietnam, which conducted the study in partnership with the Hospital for Tropical Diseases.

“It’s unfortunate that our study was completely misinterpreted and misquoted by an anti-vaxx website,” Chi Ngo, senior communications officer for the research unit, told The Associated Press in an email.

Ngo said the research unit does not support “any statement” shared in McCullough’s article and is working to report social media posts sharing the false information.

The study, shared online by The Lancet as a preprint for research purposes, has not yet undergone peer review needed by a scientific journal. It did not compare vaccinated people infected with the delta variant to their unvaccinated counterparts. Rather, it compared the viral loads of vaccinated hospital workers — who had been infected with the highly contagious delta variant — to viral load data from early in the pandemic.

The health care workers in the study had previously received the AstraZeneca vaccine.
but were infected with breakthrough cases in June.

“Viral loads of breakthrough Delta variant infection cases were 251 times higher than those of cases infected with old strains detected between March-April 2020,” the preprint paper reads.

While it is true that vaccines were not available at that time, the study was designed to compare how different strains of coronavirus impacted viral load, not vaccination status.

Lead authors of the study, Dr. Nguyen Van Vinh Chau, Dr. Guy Thwaites and Dr. Le Van Tan, released a statement late Friday to clarify this point further.

“The differences in viral load were driven by the ability of the Delta variant to cause higher viral loads; they had nothing to do with the vaccination status of the infected individual,” the authors wrote. “Thus the claim that vaccinated individuals carry 251 times the loads of SARS-CoV-2 in their respiratory tract compared to the unvaccinated people is a misrepresentation of the data.”

According to Ngo, the study shows that the delta variant is more transmissible and dangerous compared to earlier strains of the virus, and therefore safety measures like mask-wearing, hand-washing and social distancing are still advised even among vaccinated people.

“We strongly endorse vaccination as a critical tool against COVID-19 and the terrible consequences of the pandemic,” wrote the authors in their statement, noting that that their study does not undermine the “overwhelming evidence” that vaccines are effective at preventing severe disease and death due to COVID-19.

The authors also pointed to other recent studies that compare delta infections in vaccinated and unvaccinated people have found the two groups have similar viral loads — not that vaccinated people carry more virus.

Dave O’Connor, a professor of pathology and laboratory medicine at the University of Wisconsin School of Medicine and Public Health who has researched the topic, agreed.

“The existing data, from multiple studies, in multiple continents, is that the amount of delta genetic material measured in the nose is similar between those who are unvaccinated and those who are infected despite vaccination,” O’Connor said.

And contrary to the false claim in McCullough’s article, experts say there is evidence that vaccinated people infected with the delta variant are less likely to infect others compared to unvaccinated people.

Jennifer Nuzzo, a senior scholar at Johns Hopkins University’s Center for Health Security, said those who are vaccinated and catch the delta variant of the virus can clear the infection faster than unvaccinated patients.

“This helps lessen the chances that vaccinated people who get infected will have severe illness, but also makes them less likely to transmit their infections to others as compared to unvaccinated cases,” Nuzzo said.

Kennedy told the AP on Friday that his organization had reviewed McCullough’s article in light of the comments by Oxford University Clinical Research Unit. “We are confident that
everything in our article is accurate,” Kennedy said. “However, we will also add links to recent articles that show equivalent viral loads in vaccinated and unvaccinated cohorts.”

Early Saturday a clarification note appeared below McCullough’s article acknowledging that the study compared two different variants of coronavirus, and “differences between these two groups aren’t a result of vaccination status alone.” The note also included links to two studies that found comparable viral loads between vaccinated and unvaccinated delta patients.

McCullough did not respond to a request for comment.

The Dr's treating this are failing their people. I've seen people diagnosed with the vid with covid pneumonia both vaccinated and unvaxxinated. They are sent home with nothing. Prednisone helps keep them out of the hospitals. Is not offered tho. First do no harm no longer means anything. Frontline has turned into final line for many. We are being denied true medicine that actually works. Where are our people?

Sean Mcelroy you are missing the fact that misrepresentation on vaers can result in fines or worse and people have to check off that when submitting. Kind of makes it a lot more valid than what you might be insinuating. New studies are also saying that for every one entry on the database there is approximately 9 others who suffer same injuries and do not submit for various reasons (big one being doctors are claiming that the systems they are having after a shot is not in relation).

Sean McElroy do you have info to offer about the Vaccine? Do you have info to offer the short term and long term effects of it? Do you have info on how this vaccine was created so quickly when other illnesses and diseases still don't have a cure to this day? For someone claiming to be an intellectual, I feel as if you don't have those answers, because not even the vaccine creators have the answers.

Wade Logan
Gabriel Arold my thoughts exactly.

Joshua De La Mont
Also.. why is it "ok" we can say people that died after receiving the vaccine likely died from complications of pre-existing conditions, yet when people die with Covid.. its Covid and only Covid that killed them? Have you ever seen a death certificate in person? I've seen plenty. They typically have a series of diagnoses for death.. until lately which in some hospitals now just show Covid as cause of death. If you want to find truth, you have to stop making challenging statements, and start asking challenging questions, or nobody will listen to you.. which is your current situation.

Sean McElroy you sure do have quite the lengthy “cut and paste” responses to everyone’s rebuttals…

John Geeman. You asked a legitimate question. Let’s break it down. So this vaccine has been in research for several years. They were doing studies on other novel coronavirus strains of which there are over 40. When the pandemic hit they quickly got the genomic code and began adapting the current info to the research they have already had. This made the process very fast. This information is actually very readily available in multiple places. Also the studies on mRNA that has been in research for over a decade for cancer and other things. Now let’s look at the covid deaths are they really bc of death certificates. In a medical setting when a patient dies you have what’s called co morbidity for say a person with covid that had a heart attack. Since the virus does affect the heart you can show how that boils les to the thing that killed them. This is very normal if you died of cancer but had another cause of death both are put there.

Spike is due to the unvaccinated you did see how 99% of allcas are unvaccinated in the south and west. And anyone who thinks a virus is not alive has zero understanding of biology. A fruit fly used for scientific study that kind that lives one day only to reprimand then die is a good analogy. A virus mutates thru evolutionary pressure. That's why we use virus to help understand evolution and evolutionary biology better. Anyone who took a freshman class in high school of biology should know this.

Teresa Henson

Sean Mcelroy turn the TV off and talk to scientists that aren't on the payrol

Sean Mcelroy

I have and as someone who has done some studies the reports are actuate ow my studies have been in evolutionary biology so I'm no epidemiology expert but man you don't have to to understand basic biology

Amber Rose Peters

Sean Mcelroy so if it mutates then how does the vax help

Mason Rieber

Sean Mcelroy actually I'm pretty sure the reason you still get the flu is because the vaccination is for the prior years strain. You get the flu because you contract the current years mutated strain, not that you're getting the prior years strain and just have mild symptoms. It also will likely help with any flu strain you do get. That is the big difference is that you could get a vaccine and still get the strain of covid the vaccine should be preventing you from getting.

Sean Mcelroy

Sara luevano you do know all cells are alive right? A zigot or the start of a new baby is nothing more than a collection of cells that are programmed with a code the genomic code from father and mother. Then the cells divide and multiply just like a virus. We're all code from rna and dna that's been changed over millions of years of evolution.
Erin Elizabeth

**Sean McElroy** if you are vaccinated and test positive for COVID you are NOT counted as a positive COVID case unless you are hospitalized. Which is why 99% of the cases are unvaccinated. Speaking of evolutionary biology - what happens when a virus can still be transmitted through a vaccinated population... is it going to try to mutate so it has an easier time spreading?

Joell Griswold

**Sean McElroy** come on. Be better...or at least smarter.

**Sean McElroy** You sound like a moron. I love that you talk about science but don't seem to understand the science. I am embarrassed for you. This isn't even a vaccination it mRNA gene therapy with graphene oxide as the main ingredient. Why don't you go do some research on mRNA and Graphene Oxide.

Yashinca Pontillas-Bonzo

**Sean McElroy**
Sean Mcelroy
Ok I'll answer both. If it mutates how do we know the vaccine helps... right now we do based on continued test of those getting the vaccine and lab test. Now if it keeps mutating we could be left with a strain that is resistant to the vaccine and then we’re in for allot of trouble that’s why herd immunity is so important. Flue vaccines are a combination of different strains bc that is always changing. The difference is that the flue vaccine is about 68-85 percent effective while the vaccine is about 90 for covid given the current information we have. Some break thru cases are possible and we’re predictable but those who have the vaccine and we’re post 2 weeks from second shot we’re only getting mild reactions. Lastly Erin Elizabeth asked a great question. If the virus reaches a population that has herd immunity it’s extremely rare that it mutates bc it needs so many cycles of being in a host and spreading. This was shown in a case of measles in the us when a somoli community did not vaccinate and is spread like crazy but never passed out of that area. Sss as me thing happened in France and it spread like wild fire thru the unvaccinated groups but within a few months it petered out. From a purely scientific standpoint we don’t know. It’s possible that the virus could mutate and even this vaccinated could get it and it could be bad news. Or we could reach herd immunity before that event happens. Great question

Sean Mcelroy
Lynn reenville are you that dense? 

Evan Peterson
Spike Cohen they’re certainly not going to get the responses they were hoping for now that you showed up!

Sean Mcelroy
Lynn reenville are you that dense?? This is a vaccine. Anything that introduce something into the body to create a response of the immune system is by definition a vaccine. That’s what it does.

Adam Lovern

Sean McElroy you need to redo your research on whether or not virus is classified as life. It meets only one criterion for life: replication. It is nothing but an RNA sequence covered in a membrane. It has no DNA, doesn't eat anything, doesn't reproduce either asexually or sexually, and doesn't move around on its own. Scientists have been on the fence about whether to call it life for decades with a general lean towards saying it's not. That's the first thing we learned about viruses in life science in the 7th grade. Perhaps if you're going to lecture people about what they don't know, you might get your house in order first.
Linda Tagg

Sean McElroy actually, vaccinated carry the same viral loads as unvaccinated - within a few months of being vaccinated. Recent story of a man who went into the hospital for transplant, was vaccinated, whole staff was vaccinated, no visitors for 2 weeks, everyone wearing PPP, and he still got Covid. He had to have picked it up from someone who was vaccinated.

Sean McElroy actually the vaccinated are becoming super spreaders because still contract and carry the disease, but since they are "vaccinated" they get less restrictions in most cases the the unvaxed. Hopefully you haven't let your 10 year get it yet because they still havent decided if it safe enough for kids under 12 to mandate for them, but yet its definitely safe enough for everyone else.

WRONG! i suppose you can chop and change any definition you like... but you said by definition! WRONG! you dont get to define words I'm afraid:

In 1800, used by British physician Edward Jenner (1749-1823) for the technique he publicised of preventing smallpox by injecting people with the similar but much milder cowpox virus (variolae vaccinae), from vaccine (adj.) "pertaining to cows, from cows" (1798), from Latin vaccinus "from cows," from vacca "cow," a word of uncertain origin. A mild case of cowpox rendered one immune thereafter to smallpox. "The use of the term for diseases other than smallpox is due to Pasteur"

So there you go, you really should look at etymology if youre going to go around saying by definition...

Skyler Walker

Allison Dickerson well we at least learned he's either ignorant or a really bad liar. I'm guessing the first is more likely.

Sean McElroy
As of August 30, 2021, there have been more than 369 million doses of COVID-19 vaccines administered in the U.S. During this time, VAERS received 7,218 reports of death (0.0020%) among people who received a COVID-19 vaccine but a causal link to the vaccine has not been established, according to the CDC. "However, recent reports indicate a plausible causal relationship between the J&J/Janssen COVID-19 Vaccine and TTS, a rare and serious adverse event—blood clots with low platelets- which has caused death," according to the CDC website.

Sean McElroy
That's what happens when people refer to a VERRS site that is by the cdc said on that very site to not trust 100% bc anyone can place a thing on it. Yes they will check it but again you could put on there it turns you into the hulk, which someone did and it was posted there

According to Dr. Charles Hoffe, the Moderna shot contains 40 trillion mRNA molecules.

Just 25% of these molecules remain in your arm, the rest picked up by your lymphatic system and transported to the body. Your body will create millions of copies of these particles.

Circulated to the immune system, into the vascular capillary network, turning smooth cells into rough, spiked cells that more easily clot.

Lyn Anders you are right that is happening, I’ve worked the covid unit and have seen it, but should we inject people with something that does the same thing or causes problems? The crime is the withholding of potentially life saving early treatment that many physicians have tried to present and yet are silenced and censored. That is criminal! Dr Peter McCullough is one who presented an early treatment protocol to HHS in March of this year and stated if put in place it could have prevented up to 85% of deaths! But it fell on deaf ears and the emphasis put only on the vaccine and it was pushed and pushed while people are sent home time and time again after testing positive until they become so sick they are finally admitted to the hospital and put on a protocol that has failed many, because they won’t try anything else. What has happed to the physician practicing medicine and trying something else when one thing isn’t working? They aren’t doing this and that is killing people. One dr even tried to prescribe a patient high dose vitamin C because there has been success in other places using it and it was cancelled by the pharmacy!!! Why? If it has potential to help don’t you think they should at least try it! Why are they blocking these types of treatments? These are safe and effective medications that have been around for decades with practically no side effects.

Karren Fisher
Cayman Russell the spike proteins aren't the only thing circulating. Don't forget the graphene oxidewhich they insisted just stayed in the injection site in the beginning. Strange since it's purpose is to encase the spike proteins so they can enter the cell wall. Without it, it is very unstable and would die off before getting near a cell. Graphene oxide is nearly I destructible which is why they put it in the vaccines to deliver the spike proteins to the cells. So..they had to know it doesn't stay in the arm. It is poison by the way..just a little FYI for ya.

There is outdated science regarding vaccines. We know so much more about the immune system now! Tonsils and the appendix used to be removed without understanding their role in the immune system. Strengthening the immune system is vital to health. There has been an increase in autoimmune disorders since the escalation of a vaccine schedule for childhood shots.

Daniele Williams yes!! This is what sickens and infuriates me! Why aren’t we trying every possible thing to treat patients early on instead of waiting until they are deathly ill to begin treating them? Why aren’t doctors giving guidance when their patients first become sick? All they are telling them is “go to the ER if it gets too bad”. The people pushing the vaccine keep saying “it’s not political” but they are the very ones who made it political. I have been asking the same questions…what happened to doctors being able to critically think and try different ways to treat someone? The treatment of Covid patients, or lack there of, is the true crime! I’m sad for the world we are living in.

My neighbor died two weeks after his vaccination. And I found out from his son yesterday, that he has a friend whose father died two weeks after his vaccination. Two weeks! Isn’t that funny? Heart attacks in their sleep.
I know another person whose father was in hospice dying of cancer. When Covid broke out, guess what? Yep he got it because his immune system was so weak from all the chemo and his cancer. And he died. Not from cancer however, from Covid. That family was so irate. He was already in hospice!!! This is such a blatant control of our society !!!

Donna Singleton - I would like to see this data actually published. Many inaccuracies here. mRNA is not a "gene". Anyone who has studied hematology knows that the balance of clotting and flow at the capillary level is happening on an ongoing basis. Publish this work, or it's just anecdotal, not adding to the body of scientific information. Doesn't mean it cannot be true, but this gentleman should work with someone who actually understands cell biology and hematology.

Karon Patterson Czekala
Vincent, she's talking abt the studies on ferrets or weasels I believe. Researchers have tried forever to make cv-sars/mrsa type vax. Turns out, all the ferrets & mice seem great, and quit getting sick as often as the unvaxxed ferrets. They thrive. THEN when another variety/ variant hits, they get way MORE sick, for way longer and are greatly weakened --- much moreso than the unvaxxed. Many, if not most vaxxed die. That's it in a poorly worded nutshell. I wish I could recall the formal names of the studies.

I did that when I was in the military. I don’t have any lasting effects from the virus. This is labeled as a pandemic because of 650,000 deaths in about 20 months. There are 659,041 deaths from heart disease each year. There are 599,601 cancer deaths each year. Do you see a cure for them. It’s a messenger (hence the “m”) like a transcriptionist that lives outside of the cell nucleus (where the genes are). The genes are in the DNA, not mRNA. I know these are technicalities for a layperson, but they should not be for anyone who is a legitimate scientist.

True they are allowed to, but most doesn’t. Dr.’s are required to and their reports are being dismissed as coincidence and within the statistical range of acceptable yearly tolerances for e.g. stroke, carditis, paralysis, miscarriage, auto-immune diseases, brain fog, and death. Agencies that have a history of incompetence. Agencies that funded the gain of function research required to design a virus of this nature, in the very lab in the very city the virus just happen to appear. There is a lab that studies and experiments with gain of function research (term used to describe the genetic altering to a virus to make it more contagious and adaptable to infect humans) with bat viruses in the exact part of the world where this started and that is just a coincidence too. Fauci testified to congress that he has never funded GOF in wuhan, then walked about of the hearings and emailed all of his co-conspirators that he dismissed the lab leak theory and pointed the origin to a bat biting a pangolin which then got sexual assaulted by a human and passed it along (intentional exaggeration) and miraculously has the ability to evolve instantly to now know how to infect human to human, and then develop variants that are adaptable to the vaccine. I just came across this page. Most of you seem super friendly and I had no idea COVID-19 vaccine had this many issues. I think I was oblivious and now I'm starting to think this is definitely about making money with this vaccine. 46% of patients passed away from the flu with COVID-19 thus far. I don't see them pushing anything to stay healthy other than the COVID-19 vaccine.

Bonnie Sather-Kinloch it is called ADE, auto immune dependent enhancement, that is what the animals died of. This is due to the fact the immune system simply doesn't recognise virus entering (any virus) and has delayed response, so without the immune jab (aka covid 19 vax) the animals all died from viruses not necessarily covid either.

VAERS allows anyone to post whatever they consider an adverse reaction. The site is to allow medical professionals and researchers to see patterns and look into patterns when warranted. Just because an event is reported does not mean it was actually caused by a vaccine. You need to look at how many people normally die in that age group and time frame and then see if there are a significant number more than that.

Quote from website, "Anyone can report an adverse event to VAERS. Healthcare professionals are required to report certain adverse events and vaccine manufacturers are required to report all adverse events that come to their attention.

VAERS is a passive reporting system, meaning it relies on individuals to send in reports of their experiences to CDC and FDA. VAERS is not designed to determine if a vaccine caused a health problem, but is especially useful for detecting unusual or unexpected patterns of adverse event reporting that might indicate a possible safety problem with a vaccine. This way, VAERS can provide CDC and FDA with valuable information that additional work and evaluation is necessary to further assess a possible safety concern."

Sonja Ahone Beekley

Natalia Porter You are correct. But that also means people can remove info from VAERS! When an adverse action is created and that person’s info is entered, it is assigned a case number. There are literally nearly 200,000 case numbers MISSING from the site! That means someone entered them & they were deleted! This has never happened before! Where did those records go? Why would anyone delete records? It would be one thing if it were just a few, but in the 100’s of thousands?? And I have heard time after time about people dying right after the vaccine, and family members are told that it wasn’t because of the vaccine. And then the docs blame it on a heart attack or something! So those are never even reported! How many deaths from the vaccines are being drastically under reported - hidden even!

*Chasidy Plunkard* What are the numbers for those usual expected causes of death in 2020? Are many of them in unprecedented historical decline?

Are those declines virtually identical to the so called 'surge' of the new political cause?

If the global annual mortality of humanity in 2020 was consistent with the consistent and stable 0.75% that each of the preceding 6 years registered (and it was), then wouldn't that logically imply, by simple deduction alone, that there is a proportional decline in the otherwise known and expected causes?

If the same percentage of humanity has died as is normal and expected in any other recent year, with 0.02% of the normal 0.75% simply changing categories, how is this a "dangerous deadly global pathogen, of which only the mass injection of an experimental gene therapy, into virtually every human being on planet earth, is the only solution to" exactly?

Besides bold declaration and repetition by those who stand to gain from it the most?

Asking for a friend, I'm on your side... Lets blindly obey

a) look people in the eye and say they knew the medium and long-term effects before administering them
b) know fully and truthfully what the risk/benefit ratio was for EACH age group
c) be completely honest and transparent about potential side effects, thus offering people the right to INFORMED CONSENT which until last year was the foundation for ALL medical treatments

Johnni Levi no they are not you need to learn to research reputable sources. Gene therapies involve making deliberate changes to a patient’s DNA in order to cure or alleviate a Genetic condition

A condition that is the result of variants in the genome. This can be by adding a functional copy of a gene, disabling a gene that makes a faulty product or changing gene activation.

The mRNA from the vaccines does not enter the cell nucleus or interact with the DNA at all, so it does not constitute gene therapy.

Stephen Leon Here’s one to start: “Get the vaccine and then you won’t have to wear a mask!” Everyone is still being told they have to/should wear masks while inside, because the vaccine doesn’t prevent you from getting COVID or spreading it like they claimed. This vaccine was supposed to create herd immunity, and it’s not. Example: Singapore has an 81% vaccination rate, yet they are seeing a major spike in COVID cases. Herd immunity was estimated to be reached at approximately 70% vaccination. The scientists we are being told to trust and understand the virus, don’t actually understand it. So if they cannot correctly predict the outcomes of a virus or a vaccine correctly, how/why should I trust them enough to inject it into my body?

Gabrielle this is actually not true! This vaccine has no trace of the virus in it which is why people taking it are still getting sick. Research has shown people that have had the first round of covid are actually more protected with their natural antibodies then with this vaccine. The vaccine goes in and wipes any memory you have of ever getting covid which is why so many vaccinated people are still getting it. The adverse reaction from this vaccine will be way worse than any side affects from having Covid. And this “vaccine” is a therapy. It takes 5 years for a drug to be FDA regulated. This is technically still in phase two trials. WE ARE THEIR LAB RATS.

Brian Taylor Yes it was. A simple google search would answer that. My mother’s cousin had a baby that was missing half his arm. That was directly connected to her use of thalidomide for morning sickness.

Audrey Fisher

Barbara Kay Calahan - what he is saying is completely logical, but what is his alternative solution? Is the idea that we just let people get sick with COVID? Yes, of course, natural immunity is better, but the way to get it may not leave you or those around you alive or intact. Prior to vaccines, millions of people died or were maimed from viruses like smallpox and polio. The path to a modified live vaccine is years away. Do we stand by and let people die in the meantime, or do we use what we have now to help?

Audrey Fisher

Eileen Doulos - totally agree. So what’s your solution?

Melissa Smilie

Debra Francis My mother's cousin had a baby that was missing half of his arm because of it.

Nicole Griffin

Brian Taylor I humbly suggest you watch Dr. Sam on "safe and effective" which is a marketing tool of pharmaceutical companies going back to the thalidomide days. It is available on YouTube and it may help you understand why so many here take issue with Big Pharma and their influence on government and politics. I would ask you to take the time to watch so that perhaps you can understand we aren't imbeciles. We are informed...from someplace other than the mainstream media.

Lindsay Machado

Karon Patterson Czekala Do you have a link for this?
Audrey Fisher

Susan Cropp Johnson - I didn’t dismiss Dr. Malone, just the incorrect statement that he “invented” mRNA. He invented technologies to utilize mRNA which already existed. His arguments are very sound, but what is his proposed solution?

A person is nearly 60,000 times more likely to get myocarditis from Covid than the vaccine.

Melissa Busch, there has always been exemptions for all childhood vaccines in school. You will find one or two children in every class not vaccinated. My daughter is a pediatric nurse practitioner. She encourages people every day to get their kids vaccinated with these long time proven vaccines. This one, not so much, because the studies aren't there. There are no long term studies on how children can be affected. (remember the thalidomide debacle?) if not do the research. There's nothing wrong with being cautious over a vaccine with such a huge survival rate. If people were dying at a 30% mortality like smallpox it would be a different story. It is reckless to not vaccinate against childhood diseases that we have studied for 70 years. When we have studied this one for longer, I dare say people will be much more open to the idea.

Amanda Cupan

Jen Ellis

Abigail Boxman Very difficult to prove cause and effect in science. There may be a correlation. But a correlation is not causation. In order to prove that it causes it, he would need a control group. You would need to rule out all extraneous variables. You would need to be able to show definitively that the people who got blood clots would not have gotten them if they had not had it. How would you prove that? Additionally, knowing two people who got them is not statistically significant. Even if those two people got them that does not translate into the fact that it is a guarantee that everyone is going to get them.

**Timothy Walsh** I did in January 2020. I tested positive for a SARS virus (My Dr says it was SARS COVID 19). And was put on antibiotics because it was so bad. I would say that the vaccine reducing symptoms hospitalizations and death is not true. As someone who works in icu and Ed through out the hospital. It's about 60% unvax with Covid snd yes dying. However the amount of strokes and blood clots alone has increased x4 since vaccine came out and yes these people are vaccinated but 4-6 months later stroking out, having MI, GB, Mysthenia gravis etc. you have to make you own. Hooves but remember it's experimental and only been studied for a yr now aside from all the rats thst died 20 yrs ago when it was tested. For those lucky enough to not have side effects.... We still see what happens long term in 3-5 yrs.

what if instead of flu shots/vaccines we gave all the people good vitamins and minerals and help them build up their own immune system, eat healthier(not give them 2 free donuts a year for getting the jab). I know, call me crazy! but lets say we give our bodies the right things to help them stay healthy and less likely to die from the next germ or virus that comes along! Why not!! oh yah, big pharma, govt and all those making money off the shots and vaccines would never go for that. To big of a hit on their money and power trip they have been on for how many years now!! Our bodies are amazing gifts from God, that often can heal and endure much, but we sometimes need help for sure. Just out of control and over reaching.

Micheline Roch I am not soo sure if that is true... not everyone is the same. Because the issues may not immediatley be evident it necessarily being reported to the FDA. The public doesn't even know where to go (i.e. FDA) to report it. Famikies are dealing with death of the or loved ones or perhaps worse are dealing with long term issues and care for loved ones i.e. Partial or complete paralysis (I would have to look up the medical name for it GBS) while I know others who have had blood clots and have died within weeks of the shot from heart attacks.

Have you not heard of reverse psychology? You have all been tricked, they don't want the sheeple to die! They are easy to manipulate, you lot are the target! They knew that if you were told you "had" to take the vaccine you wouldn't! Spread a few rumours about the deaths from vaccines and you all jumped on it like the bunnies that you are, talk about sucked in, you really fell for it hook Line and sinker. A few antivaxxers have realised the truth when it was too late and with their dying breaths tried to warn you but nobody listens. You just watch, this post will get deleted because it's the truth.

Eric Williamson
Zaynab Akkawi because there is still a reduction in viral shedding and susceptibility to infection among the vaccinated. The unvaccinated can get it more easily and shed virus longer. Every time it spreads it replicates, every replication is an opportunity to mutate. Eventually it could mutate into a strain that the vaccine doesn't work for at all. So if everyone was vaccinated, less opportunities for transmission/mutation

Shane Stafford
Jacki Thomas theyve been told not to report on that so we know it will be pushed under the rug

Donna Bodnar Bolk I am a real person and thus is my parents story that just happened early this August 2021.....

May parents real story..... This might sound like a joke of a number but my parents got their first vax and approx 2 months after their 1st dose they both ended up in hospital on the exact same day for 2 different complications. My dad had a sever pain in his side on right under his rib and my mom was severely dizzy and nauseated and was having heart palpitations! Guess what the first thing they tested them BOTH FOR? Blood clots! Yup…. Even though they had 2 completely different symptoms that's the first thing they addressed!
They had asked my parents if they had the vax and they stated only the first dose and we don't want your second one dad stated!

Dad ended up having gang Greene in his gall bladder and almost died …it was so bad! After waiting 3 days to get every other test done they finally did an emergency surgery to remove the gall bladder and they said it was severely green and infected!

Dad has never had complications in this area … ever.
My mom ended up on blood pressure pills and vit D2 which helps to not get the virus. (thought the vax was suppose to work for that)
Mom was released 2 days before my dad.
We must ask why are they looking at blood clots right away?

Also the staff was short handed… not because they were packed full of patience but rather they are short staffed because of
The mandatory vax for these nurses etc losing their jobs because they refused to get the vax.
This has put more people in a health risk because of short staffing a d firing of those who choose not to put experimental drugs in their bodies! With A shot that has a 99% Survival rate!

I'm not against anyone getting the vax who feels confident that they need to do so… but to be FORCED IS A LOSS OF OUR FREEDOMS & It's becoming like a caged society!
I'm blown away that anyone thinks it's ok to mandate such as this!

Paul Smith you're spot on. Most antivaxxers today have been heavily vaccinated as a child, are totally fine, and have known vaccines to be beneficial their entire life. Fast forward to now, and for some insane reason they think vaccines are some conspiracy where the elites apparently want to kill off the most educated and productive members of society rather than the poor and undereducated.

P.S. I encourage you to laugh react this post because it means you not only read it, but feel the need to deflect from the fact it perfectly highlights the idiocy of your fearmongering.

Linda Owen
This has been my point all along. We DON'T know enough yet. We lost two family members early on who refused to be vaccinated. A college friend of mine (age 70) has been fully vaccinated and now has COVID although she claims it's not any worse than a sinus infection. Just let folks decide for themselves, forGod'ssakes!!!

Sean McElroy what do you think they use cultivate the virus? They're not going to call it aborted fetal tissue in the ingredients, they will call it something less horrific of course. This is not a new practice, by any stretch. You can research this stuff yourself.

Sean Mcelroy you are incorrect. They split hairs by differentiation between fetus cells and fetus cell lines. If you research further you will find:

Modern, AstraZeneca & Pfizer: Uses the HEK293 cell line that originated from a healthy aborted child in the 1970s, age unknown.

Johnson & Johnson: Uses PER.C6® cell line that originating from a healthy 18-week-old aborted child.

Sean Mcelroy

That's the age of the internet people like ones on this post read a blog or a story like from karat but fail to read the actual article and they don't see how things like no abortive fetuses used, or how vaers system for adverse affects let's anybody post anything and that there are not 10, of thousands of deaths from a vaccine, or how the vaccine doesn't lessen transmission etc. people these days want to believe what they want and can't take 20 second to simply read it's sad to get so worked up over something that it patiently wrong.

Jordan Wile You nailed it on the head. That was the directive all along. Remember last year the key phrase was "asymptomatic", yet now with over half the population vaccinated they dont dare say that word anymore. Connect the dots people and look at all the inconsistencies and hypocrisies. Ie Bill Gates is on record saying he and his family are not taking the vaccine. Why are postal workers exempt, why are lawmakers exempt...need more examples then you simply lack common sense. May God bless us all in these dark times!

By 1944 the medical team of the Manhattan Project, headed by Stafford Warren, concluded that a controlled experiment on humans was necessary. They came up with a plan to inject radioactive elements, including polonium, plutonium, and uranium, into civilian patients around the country. Between April 1945 and July 1947, eighteen subjects were injected with plutonium, six with uranium, five with polonium, and at least one with americium. The experiments were performed at Manhattan Project-affiliated hospitals in Rochester, New York; Oak Ridge, Tennessee; Chicago, Illinois; and San Francisco, California.

The 1932 Tuskegee Study of Untreated Syphilis in Black men was a real experiment. In this study, the CDC and the United States public health service observed 600 African American males as the progression of syphilis ravaged their bodies. They were told that they would be treated for “bad blood” but didn’t receive any help. This experiment lasted until 1973, and these men could have been cured as early as 1943 with the use of penicillin.

In 1991, federal officials for the first time admitted that the military conducted mustard gas experiments on enlisted men during World War II. According to declassified records and reports published soon after, three types of experiments were done: Patch tests, where liquid mustard gas was applied directly onto test subjects’ skin; field tests, where subjects were exposed to gas outdoors in simulated combat settings; and chamber tests, where men were locked inside gas chambers while mustard gas was piped inside. From 1950 through 1953, the U.S. Army conducted Operation LAC (Large Area Coverage), spraying chemicals over six cities in the United States and Canada,
A 1953 article in the medical/scientific journal Clinical Science[106] described a medical experiment in which researchers intentionally blistered the skin on the abdomens of 41 children, who ranged in age from 8 to 14, using cantharide. The study was performed to determine how severely the substance injures/irritates the skin of children. After the studies, the children's blistered skin was removed with scissors and swabbed with peroxide.

Operation Top Hat: Seven research projects involving chemical weapons and human subjects were submitted by the Chemical Corps for Secretary of the Army approval in August 1953. One project involved vesicants, one involved phosgene, and five were experiments which involved nerve agents; all seven were approved. From approximately 1951 to 1974, the Holmesburg Prison in Pennsylvania was the site of extensive dermatological research operations, using prisoners as subjects. Led by Dr. Albert M. Kligman of the University of Pennsylvania, the studies were performed on behalf of Dow Chemical Company, the U.S. Army, and Johnson & Johnson.[109][110] In one of the studies, for which Dow Chemical paid Kligman $10,000, Kligman injected dioxin — a highly toxic, carcinogenic compound which is found in Agent Orange, which Dow was manufacturing for use in Vietnam at the time — into 70 prisoners.

MKUltra
In 1953, the CIA placed several of its interrogation and mind-control programs under the direction of a single program, known by the code name MKULTRA, after CIA director Allen Dulles complained about not having enough "human guinea pigs to try these extraordinary techniques".[130] The MKULTRA project was under the direct command of Dr. Sidney Gottlieb of the Technical Services Division.[130] The project received over $25 million, and involved hundreds of experiments on human subjects at eighty different institutions.

More than 50 mentally disabled children, ages 5 to 10, under the care of Dr. Saul Krugman, a respected pediatrician from New York who wanted to determine if there were multiple strains of hepatitis and whether a vaccine could be created to protect against the disease. Krugman and his partner, Dr. Joan Giles, used the Willowbrook residents to test a preliminary vaccine for this disease that had killed millions worldwide. From 1955 to 1970, the children were injected with the virus itself or made to drink chocolate milk mixed with feces from other infected children in order to study their immunity.

**Donna Burns Anthony** I challenge you to ask a child's parent that survived aggressive cancer from those "big pharma" drugs if they begrudge them one single cent! Those cents are worth more time and special moments with their children, just like a vaccine allows grandparents, immunocompromised people and others more time and togetherness than without it. It also allows them the peace of mind to be able to spend time with their loved ones. If everyone had gotten on board earlier and not been selfish about their right to their bodies (which always cracks me up considering they won't get a vaccine but they will refuse a woman like me to get an abortion to save MY life, where's the right to my body there?!?!) Then MAYBE this would be over and there wouldn't be a new variant each month developing. And how much money was wasted by those that refused a vaccine that was ready for them???? Could those have been sent to other countries that don't have the resources to be able to protect themselves? Did you even WATCH what happened in India? Did you even CARE? Those people were DYING by the thousands outside of hospitals. Do you have any friends outside of your white supremacist republican group? Perhaps ones that might have populated one of those unfortunate countries? Did you have to hear from them how TERRIFIED they are because of all their family members that are dying around them and they do not have the means to save them? That a hospital refused them because there were no more beds in the hospital or that they could only take the patients that had a chance?!?! There is no MIRACLE cure for this (and even if there was, if it was republican sponsored, you wouldn't take it) just HARD WORK and TEAM WORK. How many nurses and doctors have to stage walkouts to get you all to understand that this is NOT JUST ABOUT YOU?!?!?

Bryant Scott  
**Spike Cohen** I collected the reported vaccine-related adverse effects data from this/your thread as of 09/14/2021 at 10:04am. Your responders/replies have reported that they/themselves, a friend, or a family member have experienced or witnessed within 2 weeks of obtaining a vaccine (1 or 2 shots) these effects:

Pfizer:
- 5 COVID-19 Deaths
- 3 COVID-19 Hospitalizations
- 3 Heart Attack Deaths
- 9 Heart Attacks/Issues
- 15 Blood Clots/Blood issues
- 8 Paralyzed
- 3 GB Syndrome
- 1 Stroke
- 29 Died within 12hrs - 2wks of getting the vaccine
- 11 Misc. vaccine injury 8hrs - 1wk after getting vaccine

Moderna:
- 2 Heart Attacks/Issues
- 2 Deaths 12hrs - 7 days after getting the vaccine
- 2 Misc. injuries after getting vaccine

A-Z:
- 2 Died After Getting Vaccine

J&J:
- N/A

Unvaccinated:
- 3 COVID-19 Deaths
- 2 COVID-19 Hospitalizations
- 1 Respiratory Injury
- 1 Misc. Injury

Along with 41 Birth Defects/Miscarriages (mostly miscarriages) and 2 menstrual cycle issues (including a cycle post-menopause)

This is a relatively small sample size, yet there is well over 300 people in this thread reporting these issues. I ensured to only count each data point once (i.e., a heart attack and blood clots was counted only as a heart attack) so that each number represents...
one person with an adverse effect. Moreover, I avoided any repeated posts (i.e., reporting the same event twice such as a mom with a heart attack and a daughter with hypertension being reposted)

These numbers should be relatively indicative of the larger problem of only three to four of these reports being indicated to successfully having been submitted to VAERS. An aspect to consider.

Disclaimer: I am a Data Analyst and used common data collection principles and practices. This is not a study, only a "snapshot" of a small facet of reality from a sample population derived from this post.

Kathy Sullivan

Karen Bullen I am just pointing out the hypocrisy of the my body rule when republicans try to take that right away from women. However, an abortion, whether I have it or not, ONLY affects me and my unborn child, not the thousands of people I may come in contact with a day and the millions more that are in contact with those. This is bigger than just one person. This is bigger than a political party. I just hope you people realize that before you or someone you care about ends up dying on a ventilator by yourself in a hospital because you were too stubborn to get a shot in your arm.

VeeLove Leigh  Sadly the CDC continues to lie, manipulate facts/stats and truth>

FDA and CDC have been censoring and suppressing therapeutics that work in order to push an experimental gene therapy for emergency use. That is criminal, genocide and nothing less.

CDC holds the ONLY patent on coronavirus research in this country.

When Stanford was researching 1500 Covid positive cases and every one of them tested positive for influenza A or B, they went to CDC to ask for a Covid sample to test Koch’s postulate on the sample as they had the other 1500 positive cases on which they were working.

They were told CDC had no Covid sample!

Yes, that the FDA and the CDC that are supposed to protect Americans.

Every single person I know who has had Covid or a reaction to the shots, has not been offered any of the therapeutics that work.

The doctors helping patients recover and heal are losing their jobs and being targeted for saving lives because it goes against the fear mongering narrative.

When my sister was really sick for 4 days, she tested positive. What did they do for her? They sent her HOME with no protocols except to rest and drink fluids!

2 days later even sicker her husband took her to the local ER. They prescribed antibiotics and steroids knowing those hadn't helped anyone.

2 days LATER, even sicker and we thought we were going to lose her, her husband took her to a much larger city ER and they demanded monoclonal antibodies. Not once was she offered them or anything else that has been proven to work.

Criminal genocide is happening as we watch.

Sean McElroy it appears half of us Americans are able to use our common sense. It's really pretty simple. We don't need a science background to figure it out.

Known side effects of shot are blood clots. This is nondisputable.

Healthy person gets shot. Healthy person suffers heart attack, stroke, dies after. We can add 2 plus 2.

Plus why no early treatment. Why do we tell People to go home until you're sick enough to go to the hospital. It's pure lunacy. It's pure evil. There are life saving medications available right now that are being withheld.

How the "Greater Good" is Used as a Tool...

Nikko Farmer

**Bryant Scott** Thank you! You are the MVP!

Sean Mcelroy

lol science is a religion oh lord that’s rich

Robert Paul DeBolt

Laura Petros-Bales drjaneruby@protonmail.com may be a good starting point.

Joelle Greencorn

**VeeLove Leigh** ya like 83 % plus percent, fully immune from covid if you had covid. Which is just a strong flu people. Who know know there is great depth to this. Please trust your neighbours as they are trying to educate and protect you from death and generations to come their will be some not many. The issue with the vaccine is simple it kills your TCells people know that big Pharma will make money on you for the rest of your life as you have no immunity any longer.

Janice Carlin

**Karrrie Schuh** u have no idea what’s in them!!! They are allowed to change while experimenting!!
Deanna Stewart

Bryant Scott Thank You!!

Sanny Benson

Sean McElroy 'Herbs from a garden' were still considered effective treatments to illnesses far and wide and were listed in all medical texts until (within the last 100 years) Rockefeller, the oil tycoon, realized that pharmaceuticals could be made from petroleum. In order to monopolize the medical industry AS WELL, he formed the American Medical Association, invested in "research", and paid people to rewrite all the medical tests to wipe out all natural remedies and replace them with pharmaceuticals. Then he demonized natural remedies calling them "alternative". Our medical history is incredibly corrupt. Bill gates is our modern day Rockefeller.

Karen Rapp

Paul Smith hey... Congratulations Paul!!! You have been chosen as the Main Stream Media's #1 fan! Now sit back and buy a freakin vowel!! Have you done ANY research of your own or are you one who believes if you hear it from CNN, MSNBC, ABC, etc it must be true? Well, you are exactly what they're looking for. They are hoping that you take the bait. If you REALLY want to know the truth, do some research on George Soros and Mr. Fauci for starters. And for God's sake watch another station like OAN or America's Voice News.

Janice Carlin

Sean McElroy Karrie Schuh u have no idea what's in them!!! They are allowed to change while experimenting!!

Joelle Greencorn
Laurie DeSalvo Chaffin

**Sean McElroy** you have a choice to take those drugs. You won’t be fired if you CHOOSE not to.

Renee Farnham Leighton

**Sean McElroy** Herbs from a garden is not something I would mock! It is better than clot-inducing, untested, unapproved jabs that data proves to be more dangerous than beneficial!!

Tony Brewer

As well, the definition for vaccine.

Pierre Mueller

**Sean McElroy** Losers have to change the definition of words to push their agenda!

Uneducated people & trolls like you are unable to distinguish the debate of specific medical products vs. people who have an ideological conception of reality, as they assume that viruses and bacteria don't exist.

You are in the no less cringy category of people who think that forcing people to get injected with a potentially lethal substance for almost ZERO benefit is justifiable.

The Covid mortality for people under 70 was less than 0.04%, last year - study from Stanford, published by WHO.

As ALL viruses get less lethal over time, but more infectious, we KNOW that the variants are even less dangerous.

One does not get vaccinated for that kind of ridiculously low risk.

Even less so when the vaccine has an extremely high risk of causing permanent harm or even death at a non-negligible rate.
Sean McElroy
I you can’t change a vaccine just Willy milky. You have to have approval

Cyndi Carlson Johnson
Spike Cohen

Nikko Farmer
1. My fully vaxxed niece got COVID and is on life support. She does have health issues.
2. Three people close to me are fully vaxxed, got COVID.
3. One person (bestie), got COVID, got vaxxed, got COVID again

William Porter
Spike Cohen of course we find a Jew, the ppl behind everything.

Donna Marie Toborg
Sally Roller Kahoun I agree. Thalidomide was horrible. I never realized it until I was in England years ago and saw so many people with no limbs!
I watched a commercial for the shingles vaccine. There were a multitude of side effects! With the covid shot? Not a word about it.

Cory James
Jen Robertson what’s on the back of vaccination cards?

Peter Ouchterlony
Bryant Scott Exactly yes! If this is happening in every sample the yes there are likely thousands of these deaths or adverse reactions/ disabilities caused by these phase 3 trials.

Sean McElroy
Pierce spoken like a true anti ax with zero actual scientific info to back it up
Pierre Mueller

Coivd mortality much lower than expected, according to Stanford study [https://www.who.int/bulletin/online_first/BLT.20.265892.pdf](https://www.who.int/bulletin/online_first/BLT.20.265892.pdf)

Gabriel Arold

**Joseph Slabaugh** Spike is one of the leading libertarian voices and ran as the VP candidate for the Libertarian Party in the 2020 election. I may not have the same views on race as he does, but Spike is solid on principles.

Renee Farnham Leighton

**Bryant Scott** Heck—The VAERS reports show more reporting of adverse effects (including deaths) than all the reporting on adverse affects of all other vaccines combined!! Yet, still, the ignorant push, and push, and push this vaccine!

Troy Compton

**Sannyas Benson** mwahh.. Most medication come from plant derivatives, alot of the plants from the rain forest.

Renee Farnham Leighton

**Sean McElroy** Most are not anti-vaxers, except the so-called vaccines that have proven dangerous! I'll stay in the control group! Thank you very much!

Marsha Jo-Lu McNair Harris

**Renee Farnham Leighton** true!! I agree 100%

Troy Compton

**Only 3% of medications made from petrochemicals peruse petrochemicals in the process granted 90% of all medications are shipped and stored in containers made from petrochemicals AKA plastic**

Michelle Wade

**Sannyas Benson** yes and herbs still work . They just don’t want you to know.
Troy Compton

Bryant Scott I don't really want to get wrapped up in the vaccine debate but I do have one question. COVID-19 is no more deadly than the seasonal flu so why are we trying to mandate people relax tonight and we don't require it for the flu. I'm asking this, I'm a heart patient with lung disease so the flu could easily do me in but a legit question if one's not any more deadly or any more contagious than the other why do we require it for one and not the other that's all I want a medical factual answer for.

Sean Mcelroy funny. If you read some of the ingredients in many drugs they are herbs and plants not just chemicals. They just tweak many natural ingredients so they can patent and sell for money. Not supposed to patent nature but please tell me how CDC has patents on CV, Ebola, Zika and H1N1. Since your so capable why not look into timeline of patents surrounding CV. You know.. since it's a NOVEL virus?

You are FACTUALLY INCORRECT, i.e. YOU LIE!

"vaers system for adverse affects let's anybody post anything"

That's absolute BS and you know it!

The claim is ridiculous.

Only medical professionals have access to the system, for starters.

More importantly:

EVERY SEVERE ADVERSE EFFECT MUST BE INVESTIGATED !!!

EVERY DEATH REPORT MUST BE INVESTIGATED!

In other words, ALL severe adverse effects and ALL deaths that are older than 2 weeks have been CONFIRMED and are based on medically accurate information.

The lie spread by the fake "fact checkers" and professional trolls like you does not even hold up.

WHY would people tens of thousands of reports about adverse vaccination effects?

The ONLY people who have an interest in manipulating data are those who make money from false data.

Who is earning tens of billions of dollars in profits?

Oh, right, the vaccine manufacturers.

How much do their opponents make?

ZERO! FLAT OUT ZERO!

Vaccine manufacturers committing fraud and corrupting government officials? How could anyone suggest such a thing?

Oh, wait, there was this story about the UN and the Swine 'flu in 2009-2010... reported by the known far-right white supremacist paper The Guardian:

Deb Kelver- McDermott
If they quit withholding HCQ and Ivermectin there would be nearly zero deaths. The studies are in on thousands and thousands and people (Dr Stella Immanuel and Dr Meehan have the results) are NOT dying and not being intubated when they get treatment early. Aw, yes, there’s no money in the above treatments, there are other health issues they’ve been proven to treat and cure, but they are inexpensive drugs. Do you really thing big pharma wants everyone healthy and at a reasonable cost??

Diane L Hartman again, no one is saying you can’t still get it or spread it. The data from Israel is clear that the severity of illness and hospitalization rates are much less among the vaccinated, and that is the point

Lisa Paquet Hauck
Sean Mcelroy I am not anti-vaccine I’ve always got all of the vaccines that I needed to get but this particular one red flags it to me. Very dangerous I do my research. I will now no longer get the flu shot because that’s probably why everybody’s getting Alzheimer’s.

Stephanie Marrero Thomassie
Sean Mcelroy And just as easily VAERS can delete the data that is entered into that website. And they do… There is a whistleblower who works for the CDC who has filed a lawsuit. She says there are tens of thousands more cases of deaths and problems caused by the shot that have been deleted

Russell Carter Bryant Scott compiled this data just from this article

Spike Cohen I collected the reported vaccine-related adverse effects data from this/your thread as of 09/14/2021 at 10:04am. Your responders/replies have reported that they/themselves, a friend, or a family member have experienced or witnessed within 2 weeks of obtaining a vaccine (1 or 2 shots) these effects:

Pfizer:
5 COVID-19 Deaths
3 COVID-19 Hospitalizations
3 Heart Attack Deaths
9 Heart Attacks/Issues
15 Blood Clots/Blood issues
8 Paralyzed
3 GB Syndrome
1 Stroke
29 Died within 12hrs - 2wks or getting the vaccine
11 Misc. vaccine injury 8hrs - 1wk after getting vaccine

Moderna:
2 Heart Attacks/Issues
2 Deaths 12hrs - 7 days after getting the vaccine
2 Misc. injuries after getting vaccine

A-Z:
2 Died After Getting Vaccine

J&J:
N/A

Unvaccinated:
3 COVID-19 Deaths
2 COVID-19 Hospitalizations
1 Respiratory Injury
1 Misc. Injury

Along with 41 Birth Defects/Miscarriages (mostly miscarriages) and 2 menstrual cycle issues (including a cycle post-menopause)

This is a relatively small sample size, yet there is well over 300 people in this thread reporting these issues. I ensured to only count each data point once (i.e., a heart attack and blood clots was counted only as a heart attack) so that each number represents one person with an adverse effect. Moreover, I avoided any repeated posts (i.e., reporting the same event twice such as a mom with a heart attack and a daughter with hypertension being reposted)

https://m.facebook.com/wxyzdetroit/photos/a.461583946134/10158207966696135?refsrc=deprecated&_rdr#_=_
These numbers should be relatively indicative of the larger problem of only three to four of these reports being indicated to successfully having been submitted to VAERS. An aspect to consider.

Disclaimer: I am a Data Analyst and used common data collection principles and practices. This is not a study, only a “snapshot” of a small facet of reality from a sample population derived from this post.

Bryant Scott In the USA, we administer 1M COVID Vaccinations Daily. For such a large number of people, we will expect a large number of UNREALTED adverse events to normally happen within any two week period.
The following numbers are the expected number of adverse events within 2 weeks, based on normal rates (I'm using 2019 statistics)
129,000 will die
69,000 will suffer a heart attack
37,000 will die from a heart attack
36,000 will suffer a stroke
187,000 will become pregnant (yes the shot causes pregnancy too)
38,000 will lose a pregnancy
Lesson: We expect to see lots and lots of anecdotal stories that may seem to be compelling evidence that vaccines are not safe, even if they are perfectly safe.
Also remember that J&J put a pause on their vaccine for only 28 clotting cases (3 fatal).

Alex Kane how do you know that? Israel is the first mass fax’s country...the day they started the v, their deaths took a big jump on the world o meter. They are currently talking about administering a 4th booster. IT DOESN'T WORK!!!! They currently have roughly the number of fax’s and unvax’d in their hospital...only difference is the v’d are accounting for most of their deaths. Stop watching msm. Do a little research.

**Sean Mcelroy** I just poked in here Sean, but it's pretty obvious you're the biggest mouth in here. You keep asking people for info, how about going out and getting it yourself. What, too lazy? It's out there, legion in fact. As to this particularly comment, VAERS alone, which is massively underreported, has over 10,000 deaths, and many are being removed.

Have you seen the multitude, and I do mean multitude, of videos out there on platforms like bitchute with people dying from these injections? Doesn't seem as if you do, which would render you ignorant insofar as that goes. It's a helluva lot more than a thousand, and that's simply those videos.

A, you know what they say bout holes, right? B, you also know what they say about having people think that you're a fool, contrasted with opening one's mouth and proving it. Either way, you're a TV-brain. If all you're going to do is to regurgitate mainstream media tripe, why bother? Why waste your time? Seriously, what's the point unless you're an angry bitter person?

You're OFFERING nothing from what I can see in dozens of posts. You're obviously beyond ignorant on the topic given the volumes upon volumes of factual info out there being provided by world-class research professional, physicians, nurses that are in the field, not just “doctors and nurses” that have no training beyond med-school.

Food for thought there buddy.

Meghann McPartlin

Hot off the Press! It is starting to come apart.
"World Health Organization European Advisory Group of Experts in Immunization former Vice President Professor Christian Perronne yesterday said that all vaccinated people must quarantine over the winter months or risk serious illness.
Perronne specializes in tropical pathologies and emerging infectious diseases. He was Chairman of the Specialized Committee on Communicable Diseases of the High Council of Public Health.
Confirming the rapidly deteriorating situation in Israel and the UK, the infectious disease expert stated: “Vaccinated people should be put in quarantine, and should be isolated from the society.”
He went on to say: “Unvaccinated people are not dangerous; vaccinated people are dangerous for others. It's proven in Israel now – I'm in contact with many physicians in Israel – they're having big problems, severe cases in the hospitals are among vaccinated people, and in UK also, you have the larger vaccination program and also there are problems.”
The current working group on the COVID-19 pandemic in France was reported to be “utterly panicked” on receipt of the news, fearing pandemonium if it follows the guidance of the experts.
Israeli doctor Kobi Haviv told Channel 13 News: “95% of seriously ill patients are vaccinated. Fully vaccinated people account for 85-90% of hospitalizations. We are opening more and more COVID branches.
The effectiveness of vaccines is declining or disappearing.”
NB “ Any booster Jab will make this 10 X worse !!
Please share to as many people as possible.
I'm sure this won't get on mainstream media but we have to somehow get this info out... the Vs don't work, therefore V p'ports are obsoleted. https://americasfrontlinedoctors.org/frontlinenews/immunization-expert-unvaccinated-people-are-not-dangerous-vaccinated-people-are-dangerous-for-others/

Brandon Metzler exactly! At the time I tested "positive" so did my 2 month old son but we sat in the er for 8+ hours waiting for them to transfer him. So I truly don't believe we had it. My sinuses get like that every year and this year it was "covid". If we really had it and it was that big of a concern they would have gotten to us sooner smh I don't believe none of this bd

Brian Taylor, Trump supposedly GOT the vax, so you equating anti-vaxxers with Trump is off-point. MOST Trump people I know wouldn't follow Trump off a cliff if he said jump. They think for themselves, which is why they voted for the "unpopular" candidate. Although, at least he could form a sentence, had a solid exit strategy for Afghanistan and didn't take any from China, etc.

I know a nurse who is in charge of accepting the call-in reports of post-vax issues. She's been virtually silenced. When she brings adverse reactions to the attention of the "head honcho", he typically tells her she misunderstood or to phrase it "cleaner", as though the outcome wasn't as brutal, and so on. She quit after 4 mo. because they were insisting she be deceitful And put a positive spin on everything.

My favorite comment so far. 'The reason it won't get out in mainstream media is because it is a false story...'. Where have you been the last 4 years? All that's on mainstream media is false stories or complete nonsense. So that being said if it was a false story it would be headline news.

Bienvenido Alesna
Asia Carpenter Have you inquired with the friends and families of the currently 675,000ish deceased and possibly millions of others suffering long-term debilitating symptoms how their natural immune systems worked against Covid? Lucky you to be blessed if you had definitive symptoms as I did and made it through, while others have died within days if not sooner.

Do as you wish and accept the repercussions of your decisions, it's as simple as that with no regrets, and NO asking for a hospital bed if it gets bad. Science was offered to help prevent you from getting ill, so don't be a hypocrite expecting science to save you should your natural immunity not be enough to turn the tide.

Kristy Ancheta its only a bad outcome when the only protocol for treatment is ventilation and remdesivere. In other countries Ivermectin and Hydroxichloriquin has been extremely successful as early treatment with no hospital admittance, that alone tells me there is more to this that what we are told.

And to add to that Pfizer and Moderna are working in a pill to be taken along side the vaccines. Its basically rebranded Ivermectin, so they jab you with the spike protine then give you a pill to counteract the spike protine......makes total sense

Kerri Dulaney Theiss truth is they got Emergency approval for the vaccine, With an emergency approval it would become invalid if there was a treatment or therapy that would work. So they could not allow any treatments or therapies to be noted as working until they got FDA approval. There was too much evidence pointing to several things working that magically the FDA approval came right at that time. Now you're hearing more positive studies on early treatments and antibody infusions that do actually keep people from the ventilator and death. Follow the money trail.. The virus is bad, Deceitfulness of those at the top is worse, Hundreds of thousands of people died needlessly, if they had only known the things they could’ve done as soon as they tested positive instead of waiting until they were terribly sick as they were told at the testing facilities to go to the ER. Then hospital treatment protocol caused a lot of the complications, like the use of morphine. Did you know morphine slows the respiratory system?? How many people died from opioid induced respiratory depression?

Ivermectin and hydrochloriquine Work to allow zinc to get into the cells and stop the virus advancing. They don't cure apparently on their own but they facilitate that important step with zinc getting through into the cells more easily.

Remdesivir was the only drug given to my husband when he was hospitalized recovering from a removal of an intestinal tumor. They had to stop the drug because it damaged his kidneys and would need to be on dialysis the rest of his life. However, he ended up passing away from the blood clots in his leg and it moved into his lungs.

Judy Johnson

Sean McElroy maybe you should learn how to spell remdesivir before you give your expert medical opinion.

Robin Bailey Your data is skewed and inaccurate. If it were the case that we administered 1,000,000 vaccines daily, and the first 800,000 Pfizer vaccines began dissemination on or around Dec. 14th, 2021; then that would indicate 274 days have passed which equates to 274 million vaccination injections out of circa 328.2 million civilians. Deducting the projected 7 million 1-shot J&J vaccines taken, we arrive at 267 million vaccines devised by 2 to equal 133.5 million fully vaccinated individuals (yes I know, some people only received one shot and decided not to receive the 2nd dose. Add the 7 million to the 133.5 = 140.5 million vaccinated est. 328.2 million US citizens and at most 140.5 million fully vaccinated would put our vaccination numbers at a 42.8% fully vaccinated rate for our country. Reviewing results from other sources including the CDC, usafacts, and the Mayo clinic projects that figure at around 51-55%. In that case, your data sourcing is outdated or inaccurate as that percentage would indicate the number of fully vaccinated is significantly lower than what is reported.

Moreover, indicating those alarming figures does not give your statement strength. Reviewing the CDC data on heart disease for instance at www.cdc.gov/heartdisease/facts.htm demonstrates that every year about 805,000 Americans suffer a heart attack. In the case that 37,000 people will die of a heart attack every two weeks out of the 52 weeks in a year would result in a projected 962,000 est. heart attack deaths. 157,000 more heart attacks projected than the CDC’s yearly estimated average from 2019. That projected increase would need to be explained, with the understanding of differences between contributing variables, intervening variables and potential z-factors (among others). Meaning, it could be the vaccines or it could be another aspect such as citizens gaining an average of 29lbs (which could increase heart disease and heart attacks as well). Another possibility is that they both are contributing variables as one exasperates the other.

I understand your reasoning of naturally occurring issues arising on or around vaccine dates, what I question is the increased figure and the data denoting that teenagers are experiencing the atypical phenomena of heart attacks, blood clots, seizures, and aneurisms after receiving the vaccines, specifically the Pfizer and Moderna mRNA vaccines. I was skeptical of the J&J viral vector vaccine as well but after looking into their company, they have the most transparency when it comes to data reporting which makes it much easier to
alleviate apprehension and skepticism. That is what many of us are asking for, honest answers without opinion or bias to our questions. Censorship, shaming, vindictiveness and wishing death on people who simply want more answers to their concerns is counterproductive in convincing them to become vaccinated. I hope I am displaying that it is of the utmost importance to remain impartial when making these decisions and if this was another thread, I can just as easily display the efficacy of the vaccines as well but that is out of scope of my findings here.

The vaccines can be both of high efficacy towards deterring severe illness and also low-to-moderate risk in terms of the degrees of side effects to a greater or lesser extent. The main point is that it should be okay to look at the data and raise questions to which answers should/ought to be found and thankfully I know how to perform the analytics to seek out answers to such questions. If I had found the adverse events were entirely unreal, then that’s what would have been reported but that is simply not the case.

Comment section didn't go to plan, or did it? If you consider the bias in mass media right now, is it possible that our Journos, like our Healthcare Professionals, are being censored?

This comment section is by definition, kind of independent journalism. Maybe informal and with questionable credibility lol But I wonder, is it the best that news outlets can do right now? ABC News has an article on their website about the "Facebook news ban" reporting on how Facebook and YouTube are blocking trusted news sites in regards to reporting on the vaccine campaign, you'll notice the article is worded very carefully.

Excerpt from AHPRA and the Medical Boards joint directive email to Australian GPs: "Health advice which contradicts" or "actively seeks to undermine the national immunisation campaign (including via social media) is not supported by the National Boards" and "may subject to investigation and possible regulatory action".

Healthcare professionals have been warned not to comment or give any health advice to patients that contradicts the vaccine campaign, or they could face deregistration and be stripped of their ability to practice. That's concerning to me.

Sydney Criminal Lawyers website have an article on "Doctors Face Deregistration for Expressing Concerns About COVID Vaccines" which contains non bias information. Many other law firms websites are now providing non biased information.

The Australian government Human Rights website also has information on the actual laws surrounding the vaccine and human rights.

Just for clarity, this is NOT an anti or pro vaccine comment. I'm just advocating for transparency and free thinking.

Troy Compton the mortality rate for COVID-19 can drastically increase if an individual is high risk, such as yourself (heart and lung patient) and myself. An empirical example would be the more comorbidities I have such as being overweight, prone to blood clots (medication) and immunosuppressed (due to an organ transplant) would put me in that high risk category for dying if I were to contract Covid-19. Those conditions and many others are contraindications (reasons not to get sick) for Covid-19, since most people who die from Covid-19 have circa 2.9x comorbidities, than those who are perfectly healthy. This does not apply to the flu (short for influenza), though it could kill you in other ways since each viruse effects other systems of the body. This is the common answer provided for why you should get vaccinated but what it is not being used for is the common answer for why you should take the precautions that you personally deem necessary and that you are comfortable with doing. I would recommend going to https://pubmed.ncbi.nlm.nih.gov/ to review preventative treatments if you are to catch Covid that will help. This does include ivermectin (cuts recovery time in half), inhaled budesonide (kills 99% of the virus in the nasal cavity, & throat), essential iodine droplets (reduces viral load), HQC, quercetin, glutathione and zinc (to fight the infection), and other widely unreported/safer treatment options. It is a great resource to help you find alternatives to protect yourself and other high risk individuals. To answer your question, you shouldn’t be worried but you should certainly do your due diligence to be prepared for both types of illnesses. I know it is widely contested but there is efficacy to wearing a mask and keeping distanced but practicing common sense also helps, as in you aren’t going to die if you don’t wear a mask walking into a restaurant to sit down but if you go to the store it might be good to have one on. We are all responsible adults and should be allowed to make our own personal choices for what is best for our health, as much as to not expect anyone else to go out or their way for us…since we would not want any other personally-responsible adult to expect us to go out of our way for them. I hope that helps, pardon my over elaboration

Donald Wiles

Steve Lockhart, those first two drugs acquirable and FDA approved for that cause? Pretty sure hydroxychloroquine is only available through prescription. Zinc is good to take but does it treat a virus or does it only help your immune system?

Renee Farnham Leighton I wouldn't call anyone ignorant, what we are observing is groups polarizing along various demographic lines which leads them to review some information more than other information. Unfortunately, the lack of transparency and accurate reporting is making some more skeptical as much as it is having the ones who are overtly trusting doubling down on the only information they know or are willing to accept for one reason or another.

The vaccine is approved. Here's the approval letter: https://www.fda.gov/media/151710/download?fbclid=IwAR3iSTSZRkUpgpWA-F-328GakvNHnH4vy2hvFyf1v-Ez8Ub27XomXfHNA

Here's 2 quotes from the follow up letter. "Pfizer-BioNTech COVID-19 Vaccine contains a nucleoside-modified messenger RNA (modRNA) encoding the viral spike (S) glycoprotein of SARS-CoV-2 formulated in lipid particles. COMIRNATY (COVID-19 Vaccine, mRNA) is the same formulation as the Pfizer-BioNTech COVID-19 Vaccine and can be used interchangeably with the Pfizer-BioNTech COVID-19 Vaccine to provide the COVID-19 vaccination series."

and another quote: "The Pfizer-BioNTech COVID-19 Vaccine vial label and carton labels are clearly marked for

"Emergency Use Authorization." The Pfizer-BioNTech COVID-19 Vaccine is authorized to be distributed, stored, further redistributed, and administered by emergency response stakeholders when packaged in the authorized manufacturer packaging (i.e., vials and cartons), despite the fact that the vial and carton labels may not contain information that otherwise would be required under the FD&C Act. Pfizer-BioNTech COVID-19 Vaccine is authorized for emergency use with the following product-specific information required to be made available to vaccination providers and recipients, respectively (referred to as “authorized labeling”):

- Vaccine Information Fact Sheet for Recipients and Caregivers About COMIRNATY (COVID-19 Vaccine, mRNA) and Pfizer-BioNTech COVID-19 Vaccine to Prevent Coronavirus Disease (COVID-19)." https://www.fda.gov/media/150386/download?fbclid=IwAR3RqvR-crc6Uc82cUJ2kj-TTw6SQEb8aMyctCsMP_DQxaHPf1GNtv2TjY

This shows that the EUA vaccine and the Comirnaty are the same formulation. The difference is the labeling - one is labeled EUA and the other is not. Also the fact sheet for an approved medical product has certain requirements that are not required with EUA. Usually a company must collect all the EUA or compassionate use dosages that were unused and destroy them. Then replace with the new approved dosages with updated labeling. The FDA acknowledged that Pfizer was sending out all the vaccines they made and didn't have a stockpile for with new labeling. This just allows them to use anything labeled EUA, as long as they send an insert that has all the required labeling.

Remdesivir was one of four drugs in a clinical trial for Ebola in 2018 and was dropped from the study before it was over, after a safety review revealed that it had the highest death rate of the drugs being tested.

The Ebola clinical trial was sponsored by the National Institute of Allergy and Infectious Diseases (NIAID), of which Fauci is director. Remdesivir had a 50% death rate, compared to 35% of two other drugs in the trial – and that serious side-effects, including at least one death, led to the drug being pulled and research on it abandoned.

In 2015, William Campbell and Satoshi Ōmura won the Nobel Prize in Physiology or Medicine for its discovery and applications. It is on the World Health Organization's List of Essential Medicines. Ivermectin is approved by the U.S. Food and Drug Administration as an antiparasitic agent. In 2018, it was the 420th most commonly prescribed medication in the United States, with more than one hundred thousand prescriptions. The medication is also used to treat or prevent tropical diseases including yellow fever and malaria. Literally been on the market for 40 years with a perfect safety profile. Today, Uttarakhand and Goa are free from their pandemic because of their bold choice to use Ivermectin, and today Kerala is a train wreck because of their choice to abandon it. Kerala, who chose to minimize their Ivermectin use in April 2021, deleted it from their protocol on August 5, 2021."

From the article perhaps no longer visible to you.

“On September 10, 2021, Uttar Pradesh, a population of 240 million, saw nine new cases, or about one for every 24 million people. One death. Delhi saw only 36 new cases and ZERO deaths. Bihar, a population of 127 million, saw 12 new cases, or one per 10 million population. ZERO deaths.

In stark contrast, we see Kerala, a population of 34 million people, with 25,010 new cases on September 10, or nearly one per thousand. Deaths are 177 out of the entire country's total of 308. Thus, more than half of all of India's September 10 COVID deaths occurred in Kerala.”

Several studies reported antiviral effects of ivermectin on RNA viruses such as Zika, dengue, yellow fever, West Nile, Hendra, Newcastle, Venezuelan equine encephalitis, chikungunya, Semliki Forest, Sindbis, Avian influenza A, Porcine Reproductive and Respiratory Syndrome, Human immunodeficiency virus type 1, and severe acute respiratory syndrome coronavirus 2.

Ivermectin proposes many potentials effects to treat a range of diseases, with its antimicrobial, antiviral, and anti-cancer properties.

On coronavirus, Ivermectin doesn't keep people from contracting the disease. Once coronavirus is contracted, to get into the nucleus the viral proteins need to bind a cargo transporter which lets them in. Ivermectin can block the cargo transporter, so the viral proteins can't get into the nucleus of the cell that is settling in lung tissue.
Lesa Hunter Burkavage

Katlyn Bonner there are many many drugs or substances that are used for animals. For example hydrogen peroxide is used for cleaning and sterilizing but also can be used for growing vegetables sterilizing your soil that you grow your vegetables in etc. the difference is one is food grade and one isn't. So to laugh at a medication that is used to treat animals as well as humans is just ignorant.

Troy Compton Yes, very true. Making my point that herbs do indeed work, the question is, who’s making the money now??? And why vilify the herbs these medicines are made from? Many people don’t know that aspirin’s made from willow bark. But the problem is they couldn’t patent the plants. Turn it into a compound that can be patented, now there’s where the money and power lies. Sad thing is that changing the chemical components of Mother Nature has an immense side effect on our health. We now take these medicines that come with a long list of side effects. While herbs can have counter-indications, these have been known for thousands of years. Many of the new chemical compounds we take are having a profound effect on our health, healthcare system and society as a whole and we are still learning the effect of these.

Aleah Propst, you need to educate YOUR self. Ivermectin won the Nobel prize for its use as an anti parasitic. Malaria is caused by parasites….Covid-19 is not. Taking it might clean out your intestines, but it won’t touch that virus in your respiratory system. Can you figure THAT out?????

Tammy Henderson Stewart

Danny Fiser also the CDC admitted they listed anyone with covid as a covid death whether it killed them are not.

Gina Gasser-Quinlan

Julie Speas where do u get your information? That is 100% false. There are all kinds of respiratory viruses in the summer. SMH!
Becky Graham Foster
**Pam Cash Peters** Yes, all this has been planned for years.

Cody Johnson
**Danny Fiser** It’s crazy that even with our numbers being "higher" we still have a 98.4% survival rate which is higher than a lot of the other countries.

Mitch Carver

It's estimated that only 1% of cases are reported on VAERS which is a government body

Mark Ballentine
Royden Chan read the notes below the VAERS data - NONE of it is confirmed.

Julie Speas
Gina Gasser-Quinlan not like this, this is nothing “normal”. I knew in March 2020 this was intentional.

Jake Lichtenwalter
Dr. Fauci is indeed a premeditated murderer working with the Chinese Communist Party who has been lying to Congress and the American people.

Royden Chan
Mark Ballentine what did the notes say? Same could be said for Covid cases - NONE confirmed.

Jacqueline Vry Hewitt

Kate Johnson this is more fox news propaganda being moved around. Ask people IN YHE MEDICAL FIELD! Even in areas that are not affected as badly, these nurses are terrified. So unfortunately, this YouTube video, which by the way is an open form of media that allows falsehoods to be posted, is false. If you want to die, be my guest. I will take every chance I can to ensure that my family and myself are as safe as we can be, especially with my immunocompromised parents. If you are the only person that is important to you....keep going the way you are going. As I said, karma comes for all...and covid isn't going to spare all. all I can do is protect myself and my family, friends and coworkers the best that I can. If you only care for yourself, keep going the way you are. This is actually easy. It's called common sense and empathy.

Mary King
Repeatedly there has been copious reports of very common medications that worked early on for covid 19. Both overseas and in the US! When these medications were mentioned the government went out of their way to "debunk" these medications! Why? I believe for no other reason than the fact that the vaccine is only approved under a emergency application, meaning that there was no other medicine available to help. If they let these medications be used it would void the vaccine they want everyone to get. Why the big push for a unknown shot that has no back ground other than killing all animals in their tests before humans?????

Patti Fischer Goure

Sara Sullivan Bergstrom They gave 50% saline because they couldn't kill or disable the whole population at once. If everyone that got the first vaccines when the first came out and all of them had adverse reactions or death then the rest of the world wouldn't take them so I think that is what the booster if for, To take care of the ones that got the saline the first go around.

Chris Shaw the Campbell river Mirror recently had a piece on a man from Campbell river who was shipped off to Victoria due to severe seizures after his second Moderna jab. I wonder if you would have the gawl to say such ignorant things to someone like that? I know of a 26 year old in Vancouver in the ICU after her second jab and it's not looking like she will make it. This is sooooo far beyond anti Vax/pro Vax and it's all about control, but you are clearly part of the Majority still asleep. Here's an article about just how many elderly were killed post jab in the LTC facilities in BC. It's time to wake up and realize you and so many others are being played for fools

https://alexposoukh.blogspot.com/2021/05/vaccination-campaign-in-prince-rupert.html?m=1&fbclid=IwAR0SkmjiqgRjjqY9zk4ddUv4y7MBUSSWYbZ3ajVSjMLXYT_IpUCrLZ33Scs

If you die of c19 after 1 jab, that is considered an unvaccinated death, if you die of c19 after 2 jabs, you are considered an unvaccinated death, if you die after 2 jabs and after the time period (whatever the Hell that is) you are considered a vaccinated death. When they release the booster shot, if you die before you get it, that will be considered an unvaccinated death, after you get the booster and if you die before the said time, that will be considered an unvaccinated death, if you die after the time limit, that will be considered a vaccinated death. Until the next booster and then you will be considered unvaccinated again...and so will go the the cycle...how many boosters will there be? Now we know how they are counting so many unvaccinated deaths and unvaccinated in the hospital, most playing in the sandbox are considered unvaccinated, why play, seems the game is rigged.

The number one drug protocol in Canada for COVID is Remdesivir, which can very easily cause kidney damage if the doctor is extremely attentive to their kidney levels. Island Health recently had a story about a woman in her 30s and another in her 40s who died of COVID and both were treated with Remdesivir. Remdesivir toxicity causes similar symptoms as COVID so it makes me wonder if it's easy to mistake Remdesivir toxicity for COVID symptoms. In one of two studies Fauci used to prop up Remdesivir for the drug of choice early on in the pandemic had 53 COVID patients and 25% developed severe kidney damage. It was so bad these individuals had to be taken off the drug within a week or they would have died. This was the ONLY DRUG prescribed to all the thousands of elderly people in the nursing homes in NYC. I remember doctors saying "we've never seen a virus kill people so quickly in spite of treatment and we don't have enough ventilators or kidney dialysis machines to keep up with the demand." Now I'm beginning to think these poor people died due to being on the wrong treatment. We now know after a meta-analysis was done on ivermectin that it's far superior in its anti-inflammatory and anti-viral properties and kills fewer people annually than Tylenol 😳 the only problem is that Remdesivir costs 1000/dose and ivermectin is an off patent drug that only costs 3-12$/dose so pharma companies don't stand to make any money off of it. This article is a good article about just how many elderly died in BC LTC facilities post jab

Spike Cohen it wasn’t

Alejandro Bayalan what does soon enough mean? We are tested before the jab so he had to be negative. If you can still contract the virus after getting vaccinated there is no point in getting the vaccine. My dad was also negative almost a month ago, agreed to the vaccine and now he is in the ICU unit in Winston Baptist hospital on a ventilator fighting for his life. Because what does sooner mean honestly? sooner than the neighbor I suppose? Sooner than your co workers? Sooner than what? Dad got his and as SOON as he did its almost killed him. And the scary thing is he had healthy lungs, my mother however who has copd, Emphysema, and who had been exposed to TB and treated, smoke like a train and wears oxygen also positive for Covid but had refused the vaccine and she barley got sick. I’m just saying everyone isn’t dying because they didn’t get the vaccine sooner. The vaccine is what’s killing them off if Covid can’t do it.

Jessica Barry Fleming you’ve got this exactly correct. Add to it that Remdesivir is not clinically proven AT ALL to cure Covid. Actually does not even help treat it, and Ivermectin has been proven up to 98% effective with early treatment. It's genocide, pure and simple...

Robert Moldashel it amazes me that there are stories out there from people that went through it, testimonies from doctors, medication's that are proven to work and still you don't believe it. Take the vaccine, it's not gonna keep you from getting Covid and it's not gonna keep you from spreading Covid. And just think of all of the health issues that you'll have to look forward to in the next few years until it kills you because that's what they want it to do. It's called depopulation, as requested by Bill Gates. Fauci created this and still you trust this whole thing? You're stupid.

Remdesivir wasn’t even approved by the fda until last October, when they quickly approved it for “treatment.” It is known to cause kidneys and liver to fail. When kidneys fail, fluid builds up in the lungs. Then they put you on a vent and most likely you will die.

Chris Shaw can you honestly say Biden has done anything right since taking over? Stop and research why both sides of our corrupt government hated Trump and used their rich friends who control our propaganda fed mass media systems to spread that hate to a lot of us. Trump maybe wasn’t a nice person but few quality leaders are. If he wanted to please everyone and make them all happy like little kids he should have sold Ice cream from a truck. He was the leader of a world power. It should scare you more that Biden cheated and stole office. They needed that power back. And look where he gave it. To other countries and the elite rich day 1. Don’t believe everything you’re being force fed. You’re probably someone who was in line as soon as these experimental vaccines came out believing that hoax too. I will continue to pray for our leaders, our country, and our world. But it might be too late to save.

Cindi Davidson the problem with posting a headline is that it is intended to draw you in. The study ACTUALLY shows that those who had COVID-19 and then were vaccinated have a much higher efficacy of immunity vs those who are only vaccinated and have not had COVID-19. I am not pushing the vaccine, but headlines are only headlines…they NEVER tell the facts. They are intended to make people go ! Unfortunately we live in a world of headlines and no context, so people make real-life decisions based on them as opposed to actually seeking real advice from their doctor, friends/family in the medical field and other sources.

What does it cause? Long term pharmaceutical use for all different kinds suffering both of these diseases. Outcome of their dictator control over treatment recommendations. Robert Moldashel One wonders what makes you read about all the tragic stories of people dying from the experimental "vaccines" and gaslighting victims. What does it say about someone completely lacking empathy for other people, who horribly suffered and those who lost their loved ones. Speaking about mental illness, there is a psychiatric diagnosis for your condition and you possibly need to seek help. Psychiatrists will be glad to prescribe you psychiatric drugs and experiment on you. Maybe then you will understand what it means to be experimented on.

Margo Rey sounds like depraved indifference - people just don't want to believe the government would lie to them, and something they already submitted to to keep them healthy may actually be the thing that kills them.

That the stupidest comment I have ever seen! Do you know HOW many reputable scientists, microbiologists, doctors, virologist and nurses have ALL put their careers on the line stating the truth about these vaccines? A LOT!!! All of them had NOTHING to gain, but EVERYTHING to lose. They are all getting discredited, and fired. They have all investigated, written papers, journals and are laughed at. Did you know that the creator of the mRNA vaccines himself has warned us against them? Has talked to his "good friends" in the fda telling them to stop the vaccines. Saying that they are not doing what they were supposed to be doing and are dangerous???? Just because it doesn't fit your narrative doesn't mean it's not true. Just because it's not the doctors you want to listen to doesn't mean it's not true.

Darina Tony it's crazy. But frankly people pushing vaccines are behaving in threatening and hostile ways - we should be wary of them.

I have severed ties with several people over this. I won't be spoken down to or treated as a monster because I refuse to put my health at risk to alleviate their fears

Penny Newcomb Hinders My husband ended up in the hospital because he was severely dehydrated because he wouldn't eat or drink when he had COVID-19. He was diagnosed with covid/pneumonia. They discharged him the next day with nothing for the pneumonia. We found a doctor who was willing to give us a prescription for the pneumonia and within a day and a half he was already starting to improve! Can't imagine what would have happened if we wouldn't have gotten the pneumonia taken care of!

Results: About one-fourth (23.6%) of the patients in the intervention arm and one-third (31.6%) in the placebo arm were tested reverse transcriptase polymerase chain reaction (RTPCR) negative for SARS-CoV-2 on 6th day. Although this difference was found to be statistically insignificant [rate ratio (RR): 0.8; 95% confidence interval (CI): 0.4-1.4; p=0.348]. All patients in the ivermectin group were successfully discharged. In comparison the same for the placebo group was observed to be 93%. This difference was found to be statistically significant (RR: 1.1; 95% CI; 1.0-1.2; p=0.045).

Conclusions: Inclusion of ivermectin in treatment regimen of mild to moderate COVID-19 patients could not be said with certainty based on our study results as it had shown only marginal benefit in successful discharge from the hospital with no other observed benefits.

Sean Mcelroy you poor blind man. Bless your heart. Go read the Pfizer documents that tell doctors to go and report to VAERS directly. And guess what even then some of them don’t because of how flawed and corrupt are medical systems are. They were all bought out by the same company and umbrellaed under smaller names. And it’s not a theory.. it’s the truth. But when money rules the world and owns the information it’s keep people like you stuck in a false reality one built on lies and a war on information.

Cyane Veonata
Jo Anne Baum it's too late for you. You did it to yourself

Judy Whitehead Parris Tho I wholeheartedly agree with that; the problem arises in the Fact that this vaccine is not a true vaccine thus they changed the meaning and scientific wards of what it means to have a real vaccine! So if those who do get the jab are (because what is it if it’s not scientifically considered a vaccine), you are putting in your body? As stated The Measles is a vaccine which created 98-100% immune response to the cells in a human body!

Covid vaccines don’t!
So there’s the reason for many to suspect the herd immunity and mandatory government involved vaccine mandate is very questionable!

Karen Mills Farrar

Shelly Moberg they get the stuff ready to send off to do the autopsy!! They are doing them because the parents want them done!!! And before you say anything I know this to be fact!!!

Ronnie Max Cochran

Sean McElroy if it actually approved, rather than the other vaccine, why can’t you sue. Emergency use only drugs are not liable but approved drugs by pharma can be sued.

Debbie Mangrum Archer

Sean McElroy the VAERS info is a CDC-backed site. It’s govt- sponsored. And there are stiff, stringent penalties & threat of prosecution for anyone who falsifies data. CDC has also said those listed are prob only 10-20% of adverse events that have occurred due to gross under-reporting. So you can at least DOUBLE the numbers of complicating side effects, many of which occurred immediately after the jab or within 48-72 hours. Do your research on non-Google/MSM sites, & you’ll find the actual info.

Josephine Catalano Macpherson

Ronnie Max Cochran approved or not, the vaccine companies are not liable. Some countries have set up their own compensation packages for deaths.
The Pfizer vaccine gained full FDA approval on August 23 of 2021. I don’t know about the lawsuit ability you speak of or why but wanted to verify it’s approval.

You should give people a break. Everyone is just trying to do what’s right for themselves. Science is always right until it isn’t.

Cheston Errol Carson
Lori Rice, the fact is, it’s not safe, and shouldn’t be forced or mandated. If someone dies from an adverse reaction, is their life worth less than someone with Covid? People are having reactions and if they don’t want to get it, it’s their choice. Not yours, the government, or their employer. People have backed their statements up with facts, it’s just ignored because people don’t want to hear truths without it coming from someone they “trust”.

Exactly! This was my response

This story is just trying to follow the scare tactic narrative! Your real story should be on the thousands of people that have died from the V (this information is straight off of the VAERS website and you can even download the full report. I have it) Also, the newest cases of Covid deaths on that page contain cases of fully vaccinated people who are getting Covid and passing post Vax. The vaccinated are getting Covid in huge numbers (I know of at least 10 with one neighbor being a fully vaccinated 14 year old boy). The virus is mutating to a stronger virus because it recognizes the vaccine spike protein and learns to mutate. Plus the vaccinated that are getting Covid are walking around asymptotic and potentially infecting everyone they come in contact with. When my whole family and I got Covid (by which we have natural immunity that is 27 times more effective than any of the vaccines) we were feeling sick and stayed home and quarantined. Natural herd immunity is the only way to irradiate this virus. Also, people need to be taught about the absolute 100% treatments such as the Monoclonal Antibody infusion from Regeneron as well as hydroxychloroquine and Ivermectin in the proper doses for your weight (not a horses weight)!

There is your story ABC! Call me…. I know you won’t because it does not fit your fear mongering narrative! Now go back and stick your heads back into the sand….. or decide to be a “REAL JOURNALIST” and tell the right story!!!

Most adverse events take place within 7 days after the jab. If a person is considered unvaccinated until 14 days after the final shot it totally skews the vaers statistics. It would show an over-reporting of unvaccinated deaths and a simultaneous under reporting of deaths due to the shot. The accounting change was made recently by the CDC

**Judy Whitehead Parris** This post is a very good reference for one. read the first hand eye witness accounts. Also if you dig deeper, the true data is available, such as the WHO and even the CDC. don't look at or listen to what they summarize with their own commentary of what that means. Investigate these patents and who stands to benefit from them. Investigate the ingredients. Investigate the lawsuits. Investigate the injuries. By the way, anyone who has had only one jab is considered unvaccinated. Also moving into that with those who have only 2 now that the booster and pills are coming out. Without everything they call v2ccine, you are considered unv2ccinated. So someone who just got the 2nd jab is listed as unv2ccinated. Therefore, the numbers are being played with. Common sense works best with these numbers. For example, when they say that the c2vid numbers are higher this year than last year, but last year none were jabbed, what can we deduce about this year when 71 percent are jabbed?

NEWS FLASH: The 11 year-old Twitter account of the 39-year old educational charity, the National Vaccine Information Center (VIC), was suspended without warning on Sunday afternoon, May 23, 2021. VIC's Twitter handle was @VICLoeDown and the account had about 21,000 followers at the time it was suspended. In March, VIC's account with Facebook was terminated and, in April, VIC's Instagram account was terminated without explanation, together affecting over 300,000 followers.

No other major non-profit organization that reports on vaccine science, policy, law and ethics has been removed from all three social media platforms.

VIC Co-founder and President Barbara Loe Fisher said,

"Those who fear the truth have no option but to censor it. Big Tech and Big Pharma are business partners, just like the federal government and Big Pharma have become business partners over the past four decades. Now political operatives and Silicon Valley profiteers trying to control the public conversation on the world wide web are targeting truth tellers in order to silence them. VIC has served as a voice for the vaccine injured since 1982 and we will continue to tell the truth about vaccination and health in all forums, no matter who tries to stop us."

If an unvaccinated person gets it, they become immune. Check YOUR facts cause you're obviously not doing YOUR research! There are renowned specialist that specialize in Cardiology, Pathology and Immunology from MT Vernon, Mayo and Texas A&M just to name a few. But, don't you think it interesting instead of trying to initiate a treatment plan for Covid they want everyone to take the vaccine. Doctors have been blind sided by the CDC, Dr Faucci and the President. They should have created a panel of the top Physicians to combat this, instead they came up with a plan to inject everyone if a vaccine that technically a bioweapon! People, do your research and stay off main stream media. They're trying to silence the truth. Just check out my page.

Jeanette McCloud Trump also said that this Covid was also going to disappear around a year ago.

Treena Kirkpatrick

Shirley Peter remdesivir damages the patients kidneys and liver. They start to drown in their own fluid and die...Then they shove them on respirator machines which finishes people off. Covid was supposedly made to affect the airways not the kidneys etc. They ask if you have kidney or liver disease why They are going to create liver malfunction So why ask the stupid question. Undertakers are now speaking out about false registered covid deaths. And they said once they start vaccinating kidd we will see high death rates and maming in kids. When this happens go figure they did it in old folks villages.

Amy Katz Dowling Right the CDC warned of the public of those affects. Every vaccine had one. My question is alot of people will get the other mandatory vaccines but not this one who has killed hundreds of thousands of people. My husband was a Marine he had to get all kind of vaccines. But people are complaining and spreading false information. That why I believe it's a political issue. And unfortunately it's the alot of the same people who still can't get over Trump loosing. Lori Rice You're right, VAERS likely underestimates the death totals by a factor of 10, 15, or even up to 100 times. Supposedly 9,000 deaths in the US so far, and something like 468,000 injuries. Why, if there have been so many deaths and injuries, (and it's likely much higher than these nos.) are they still pushing this and claiming it's "safe"? They say the instances of Guillain Barre and myocarditis, fatal blood clots are "rare." Yet everyday I read about someone new who has been harmed or killed by one of these things. At what point does the general public begin to realize it's very likely they are being lied to? (In my opinion, one massive lie and public policy fail after another when it comes to Covid.)

Diane Zimmerman isn’t it amazing how any expert, scientist, or doctor that says anything contrary or in protest, is gagged, debunked, defunded, persecuted as fake news, or all of a sudden a quack (there are thousands btw just look up front line doctors)? You don’t throw your career or merit (and some of them has so much merit) away for anything less than conviction. What I see most everyday people do in rebuttal to valid concerns of safety and effectiveness, even with non redacted and peer reviewed evidence, is either, lump everyone into a anti-vaxx conspiracy category or they do a quick google search (which is totally censored) and post up some wiki page saying “that's debunked.” Then they sigh in relief because now they can persecute their neighbors knowing that "science" has backed them. I'm pro vaxx anti mandate. There’s enough contrary evidence to suggest the policy response to C@vld is overreaching.

Lori Rice let's just stop this right here they said to follow the science ... so Fauci CDC and WHO said that the vaccine does not keep you from getting it ,it does not keep you from carrying it ,it does not keep you from spreading it ,it might keep you from dying if you do get it , but they don't guarantee that either it is not a true vaccine they said that it is not going to help you build up your immune system you have something called natural immunity it is a 99% survival rate if you contract It ! I love how people always say what about the vaccines for measles mumps and chickenpox ....etc . people walked right in and got those and they don't know what's in it . well those were tested for many years and guess what if you had the measles and survived it you didn't have to get. The vaccine if you had chickenpox or mumps love how people always say what about the vaccines for measles mumps and chickenpox people walked right in and got those and they don't know what's in it . well those were tested for many years and guess what if you had the measles and survived it they didn't make you get a vaccine if you had chickenpox or mumps you did not need the vaccine It's called natural immunity

Diane Zimmerman why would you say bitchute is fake news? Could it be that it's not censored so the storyline that certain people want and only allowed to get out there is not the only one that is put out. Science isn't science unless you can debate it and look at both sides. And there are tons more places to look than that bitchute where you can find the info. But you can't find something that you're not looking for. I think it's sad that people can't get the truth and only get the one side that is "permissible" by the people who can censor.

Ruth Marilyn Hooper your choice to believe that. It is no scare tactic that 4.55 million people died of covid world wide. It is no scare tactic that the smothering over lacking oxygen occurs if really I. It is it a scare tactic to describe how the medical staff must add ventilator by showing a tube down their throat after sedating them so this ventilator can push oxygen into the.lungs Nor is it scare tactics when a family is called to say goodbye. That's reality of covid.

Fear is usually false evidence appearing real like the scare tactics you allege are being used to get people to vaccinated.

Yet truth being what It is "x
We can lead a horse to water however, we cannot make it drink."

Thus the reality I just shared you will deny possible

Mary Waldron
Children are dying because people are refusing to get vaccinated. I've never heard of such selfishness in my entire life.
Mary Waldron
Ruth Marilyn Hooper That only applies if you stay home and there’s no chance for you to spread this to children.

Ingrid Eng
Lindsey Denver Certainly, but then there is the "then others" to also tend to.

Philippa Hall
Sarah I was just thinking the very same thing. Trawling and preying on someone who has lost someone is unethical to me. I am also really interested to hear stories about those that have been boosting their immune system. Well done on shouting this out.

Ruth Marilyn Hooper
Mary Waldron I’m not around kids..

Kassidy Dougherty
Sarah Prout I’m guessing you’ve never suffered from the virus. What your saying is that it’s fear if you share the truth and If someone like myself shared my battle to stay alive from covid and took 14 months to recover I’m sharing fear. That’s a slap in my face to myself and the many 100,000’s of people that have suffered. Covid doesn’t care how heathy you are and I can attest. I eat extremely clean, no sugar, gluten, alcohol, soy, dairy and worked out on regular basis teaching yoga and spinning. Also following a holistic program. Covid didn’t care and it still ravaged my body. Very disappointed in this post. This virus is REAL and has ruined many lives physically, mentally and financially.

Thank You Sarah! There is no conversation about eating clean, fitness, building up the immune system. I had covid and survived as did my children. 20 years ago I met a holistic nutrition coach who was a RN. She said there will be virus in the future with no medication to cure, start building you and your family's immune system up. Our food and our fitness, the chemicals we allow in our homes, all of it as a whole is important.

Ruth Marilyn Hooper
Ingrid Eng yup, that's how I was raised! Mine my own business and not tell others what to do or not do or live by MY STANDARDS!!!

Sarah Prout absolutely agree, I've made up a bush flower essence remedy that is boosting the immune system and so far clearing all signs of fear people get of illness, and any signs of cold, flu or virus symptoms are just washing away, its very effective

Sandy Dobbyn
Sarah Prout Agree. And to be fair to both sides, share a story of a loved one who died or was badly hurt by the vaccine. I'm sure both sides have stories.

Kalena CC

Sarah Prout where are the health professionals? Why isn’t anyone pushing healthy ways on social media, tv? Are they banned? It’s been a suspicious year with the pandemic.
Fear is natural human emotion and helps keep us safe and alive. “Living in fear” is right wing selfish propaganda.

Kim Orr Irwin  
Exactly
Rhaine Clayton

Marianne Hope-Slatter why? Because she wants a balanced approach? All we hear about is case numbers and deaths - we never hear about those that recover and we're not encouraged to boost our immune system. All this negativity creates stress which weakens your immunity. Also, please try to come up with another term besides "anti-vaxxer" - there are plenty of people who have had all their other vaccines, but have genuine reasons why they don't want or can't have this one.

You can stay as healthy as you want .. vaccinated or unvaccinated .. some people will just be taken down by this virus. I’ve lived 98% healthier than most of society and I’m a living example of this. I had my first symptom of covid on Aug 1st .. was rushed in by ambulance 9th a week later they put me on a ventilator. I was in the hospital 24 days. Have been home 13 days and it’s a slow slow recovery. I was and still am in shock. Even when they were telling me to make my last calls and I may not survive I just kept repeating but I hike everyday. Take my vitamins, eat healthy. Don’t drink. Don’t smoke. Is this for real & the nurse just grabbed my hand and said it is for real .. we know it can happen to anyone. Only 5% of patients become critically ill like I was and only a small % of those that go on the ventilator survive .. It’s complete hell that I would never ever wish to see anyone go through. Maybe it was the healthy living in the end that saved me among all the prayers, love and amazing care I had. When I was in the hospital I shared rooms with people who had 1 shot, double vaxed and non vaxxed and instead of having a false sense of security that the vax will save them .. they should be taught about healthy living, eating etc
It should be part of the protocol

Brittany Rebel Parker

Sarah Prout instead they want to give you FREE donuts for gettin' the V...I even saw one state health department say "loosing weight is too hard just get the vaccine" like wow!! this isn't about health at all...

Laura Dockrill-Wiens

**Sarah Prout** the most powerful way to stay healthy is to listen to the overwhelming majority of doctors and scientists and trust the peer-reviewed evidence!

Janet Pechey Leavey

**Nancy Sullivan** I'm 74 and my husband is 76 there are also9 other family members who live with us we all had covid I have a cows valve in me with 2 bypasses and my husband has diabetes and spinal cord problems from being a firefighter until he retired. none of us went to the hospital and we all took care of ourselves no one even called or checked on us to see how we were doing. percentage wise one of us should have been very sick oh yes with flu symptoms but we all survived. no hospital, no doctor visits no nurse call, you would think with this deadly virus someone would have checked to see if we kicked the bucket, even the board of health, but guess what none nada nilch. Such concern even when quarantined with small pox the BOH would check. so I'm leaving it right there this will never make the news. panic will kill a lot of people.

Von Morin

**Sarah Prout** lots of natural sun light, eat lots of dark greens, lots of different colored veggies, take long walks with deep breathing while you walk. If you start feeling sniffles or run down do hydro therapy. (Hot and cool) showers. See your doctor for other covid treatments

Ruth Marilyn Hooper there is this new fangled thing called 'google' research it!! (Once you have virus your body builds an immunity to it-- hence a vaccine OR getting the virus) Clearly you choose to get the virus-- now-- PLEASE do not go the hospital if you get sick-- there are doctors, nurses there- they believe in SCIENCE- which you clearly do not. Stay home, stay away from other people so you do not get them sick.....

Joslynn Ford
Sarah Prout: yes!!

Raine Turner
Faline King then research- you have a computer. Look at articles you do not believe in - check out alternate ideas........research!!!

Raine Turner
Nic Starr No- research... simple! However, other people have the 'right' to choose who they 'allow' around them. If they choose to not be around those unvaccinated they have that 'right'. Presently, you still have the 'right' to not get vaccinated- with each decision we make in life there are consequences. Simple

Julie Duffield
Sarah Prout: absolutely!

Lindsey Denver
Beryl Walker you have to! I learned the hard way and NEVER again!

Sarah Prout steady stream of fear is exactly what the powers that be initiated somewhere late 2020. I think they believe we all had lobotomies and forgot how to think critically. Eventually, common sense will prevail and this poor excuse for a social experiment will cease to exist.

Sarah Prout here’s a suggestion.....
Carla Axtell Nelson
Sarah Prout maybe if the media would put preventive methods on the news over and over people would listen. Our bodies are amazing. Taking care of our bodies in general would reduce a number of health risks. Like eating right, taking a plant based vitamin, regular exercise. I personally use essential oils and other supplements to help keep my immune system supported. My 16yo fully vaccinated child got sick suddenly....like over night. 2 other fully vaccinated family members then got a few symptoms. We used all natural remedies and gone in 48 hours. Took vitamins, enzymes, essential oils internally, topically and diffused them. Did ionic foot detox's and literally went from lethargic, sore throat, fever, cough, runny nose and Go distress back to normal in 2 days. We do preventive stuff daily so our immune systems are ready to handle. Everyone is different, but I'm with you, let's talk prevention and see what happens. So sad this is where we are 18 months into it.

Darlene, it is scare tactics because the numbers of Covid deaths are not correct. Hospital get kickbacks, death certificates and cause of death procedures altered. Cause and in underlying circumstances have flip-flopped. We cannot hear scientific debate (the very essence of science) or medical team sharing and discussions (how medicine advances and improves) because of selective divulgence and censorship. “Hear only what we want you to hear.” “Believe only what we want you to believe.” “Throw stones at those who die not follow the prescribed path of action and thought.” “And even if your own eyes, heart or experience tell you a different story, hear us, believe us, and cast the others into ghettos, make them wear yellow stars or red hats.” “Divide, attack, ignore the testimonies of those who bear whiteness to a different narrative.”

Sarah Prout You're not supposed to take care of your immune system, it takes care of you. All the ridiculous spikes of autoimmune diseases in the 20th and 21st century are enough to warn me to stop messing with my immune system. I suffer from chronic pain and the doctors literally told me they don't know what it is. All my countless hours and days and years of research has led me to the overuse of vaccines in our bodies. Now our systems are getting overloaded with so many response triggers it never shuts off and now we have massive spikes in auto immune disorders and an overactive Immune systems leaving our body to attack itself.

They're literally trying to keep us sick and dying and relying on their medications that never cure but keep us coming back for our next dose of pain meds.

I'm finished with our global healthcare systems. It's not about health any longer, it's about getting paid for them.

Colene Romanik

Thank you very much !!!! I'm so sick of hearing only one side. I'm sooooo over this !!!! Or let's hear how many people got really sick or died after getting the jab !!!!!!!!

I am a seventy year old that does everything in my power to maintain my health, I have Graves’ disease through absolutely no fault of my own! I fight everyday to keep this under control, how dare you say that I don't do enough to be healthy! My Mom died of Pulmonary Fibrosis when she was 78, there is no known cause or cure for that, and she was the healthiest person I knew! You are certainly a self righteous individual!!

Sarah that's exactly what I did. This thing comes after the sick not the healthy. So I started eating healthy, watching my calories, drinking a ton of water, and exercise. Hard work, dedication, and discipline. I lost 50 lbs in 15 weeks. Best shape of my life. They should do a story on that.

Barbara Jean Amato

**Sarah Prout** I am not a doctor, but I am very focused on healthy living, food and supplements. I do not eat any packaged food or any food with preservatives, sugars, salts or chemicals. My personal health protocol is which I have been doing this for many years is keeping my Vitamin D levels above what is considered normal levels. I been told by a doctor 60 -70 range is good. Every time you get sick you loose D and they can go pretty low so you want to be above mid range. I take fulvic and humic acid by MotherEarthLabs the best source. I take their PH balancer. It has all the vitamins, minerals, zinc, Quercetin which are anti viral and many other good things in it. It literally has everything you need! It is also very important to keep your body alkaline at normal range 6.5-7. An acidic body is the perfect breeding ground for cancers, viruses and bacteria. So things like alcohol can make your body acidic while apple cider vinegar does the opposite and is excellent for a balanced flora in your gut. So your gut is the most important part of your body to keep healthy, because your immune system is part of your intestines. What you eat or drink directly affects your immune. So fresh vegetables, whole eggs, they do not raise your cholesterol they are a perfect protein. Wild fish or grass fed meats are the best to eat. Raw cheeses free of antibiotics and hormones are very healthy. Cheese is inflammatory so too much is not good either. Everything in moderation. Water very important. I feel better with a gluten free diet. Better when you have thyroid issues. Most breads are just junk. Ezekiel bread is a good one. Made with good stuff like lentils. Some have gluten though. You can make bread and cookies with Almond flour. Soups made with bone marrow are really healthy. Cook the bone marrow all day then take the bone out and make a vegetable soup. I also grow my own vegetables in the summer.

One of the most powerful ways to stay healthy is getting yourself fully vaccinated! It costs zero. Side affects are zero and if you contract covid your chances of dying are almost zero!! How is that for no fear? You do not fear covid at all if you are vaccinated! AGREE?

the vaccine doesn't work. I know a lot of people who still got covid and the people who are vaccinated are worse.

what do you mean zero side effects?? Really

Zero? Have you read any of the other comments in this post?

I feel you need to look back at history and you will find your statement is full of holes. The most powerful way to stay healthy is lead a healthy life with YOUR natural immune system in top condition. FYI a lot of people I know are scared of covid and are fully vaccinated.

"Those who have hesitated until now to get vaccinated due to concerns about very rare side effects—such as myocarditis—should be aware that the risks for this very same side effect are actually higher among unvaccinated infected individuals," he said.

Donna Waters Dayton
Marie Lammons we’d all be dead if that was the case. Most likely before reaching adulthood.

Peggy Orcutt Riemenschneider
Marie Lammons not true. Our body makes antibodies for any antigen, including viruses, it has not seen. Then, your body stores that information and is able to react more quickly if that antigen tries to invade again. Tricky thing about viruses is they are like microscopic Navy SEALS. They adapt and overcome - they mutate so the defenses created against them are not effective anymore. The more vaccines we create, the more variates we create. This is why we have hundreds of variants of the influenza virus, and why every year the CDC makes their best guess as to which two variants will make an appearance and push those vaccines. As an ER nurse, I've seen this play out for years.

I hate that no one is talking about preventative medicine. Even before COVID, no one talks about eating better or working out or spending time in nature to keep our immune systems strong. I just graduated college in May and had a real passion for emergency medicine but over the last two years I've been self teaching myself about plant medicine and herbalism and have realized this is where my passion is. In my household we eat a mostly plant based diet as of January, we take our herbs, drink our herbal teas, juice our fruits and veggies to make natural drinks, drink smoothies, workout and spend a lot of time in nature. I've worked through this pandemic at both a hospital on a COVID unit and a nursing facility that ran rampant with COVID, I have not had covid. If I have, I didn't have symptoms..

The vaccine is based on the natural human immune system. The vaccine causes an immune response for the body to create antibodies. However, you can still catch COVID with this vaccine, so what’s the benefit. I had COVID in December, I’m still alive and well and now I have antibodies to the virus, just like I still have immunity to the Varicella Zoster virus, which I had back in 1982. How many people died in previous pandemics before processed foods and sedentary lifestyles? The answer is thousands and thousands. Their natural immune system didn't help those unfortunate individuals fight a virus their body didn't recognize. Do you know what helps people combat a virus their body doesn't recognize and is severe? Modern medicine and vaccine. Vaccine IS and HAS BEEN the only end to a pandemic! Do your research on something that can actually help this situation. Yes, being healthy is great, but all of this self righteous talk about simply eating healthy and taking vitamins doesn't help the millions of Americans that have an unchangeable medical condition that leave them vulnerable. Even if it could for some it takes at least a year to really have a significant impact in your body. The bottom line is people just don't have that kind of time with this virus. It's scary enough that it takes 6 weeks to be fully inoculated. It's so self righteous to me when I hear people touting their "healthy" lifestyle as reason they either haven't contracted covid or haven't been severely affected by it when the actual reason is more simply your age and genetics. I also find it hilarious that this same group of antivax people constantly blab about fda approval of the vaccine and how it was either not there or too quick, base their entire lifestyle regimen on vitamins unstudied and unapproved(and never will be) by the fda. So so many holes in your arguments. Do your part and get the shot! So done with this stupidity! I actually have more respect for the individuals that are truly antivax and zero for the people that rely heavily and have followed mandates on all vaccines except this one.

What so many mistake as rebellion is actually the numbers of us that do not do pharmaceuticals (or very little) and stay healthy by taking care of our bodies and live a more natural lifestyle. I truly believe there will be a day when "they" will need us- healthy blood from the unvaccinated. I also believe that this entire scenario, the virus, it's variants, the attempt to come up with a "cure" (vaccines) is truly a huge experiment. Call me a conspiracy theorist, but every day the actions of a few in charge fuels the fire for well meaning others to push their will on the people. But this is America!! If we allow this, it will no longer be. We need to wake up and hold the line- the US Constitutional line that is. They can not be allowed to get away with this!!!

I'm immune compromised and have 2 auto immune conditions so I take good care of mine.
Peggy Szana
It's not sick, why is it sick? Are we not being bullied and coerced into doing things we don't want to do just as they were back in WW11 did you know that there was a typhoid outbreak? Did you know there was forced , did you know there was curfew, lockdown ,forced quarantine /"field hospitals" (concentration camps) ? people reporting on each other for breaking lockdown rules? People dying from hunger?Dying from forced medical intervention and Eugenics experiments Economic devastation. If we do not look at this for what it Is we are lost, this may not be a conventional form of war, but we most certainly are experiencing a holocaust, what else could you call it? Police brutality, arrests, what is sick is that people are trying to make out that it's not the same thing because they have been conditioned not to speak about the unspoken truth about WW11 and why people complied.

Sarah Prout there are thousands of articles and studies on how to stay healthy. However, even healthy people can get viruses, especially the Delta variant of COVID. They are asking about unvaccinated people getting COVID, so your asking them to report on something completely different is irrelevant and unnecessary.

Zenica Castano

Sarah I had COVID in January then apparently had it again in July after taking an antibodies test to find out I'm positive for short and long term. January it knocked me out thank God no hospital. July I thought heat exhaustion from working in the yard was making me not feel good. I've been on vitamins since COVID all started vitamin C, B12, D, zinc & elderberry and have stayed steady with them since having COVID in January. I'm not vaccinated. All of a sudden a year ago vitamin talk has disappeared as well as natural immunity. By no means do I think I'm invincible but I have so many questions about this stuff and no one can answer me. You're right about the not just one steady stream of fear.

Sarah Prout Yes, completely agree. The vax doesn't help everyone obviously since they are still getting sick and dying too. We are all different and respond differently to things, whether it be environmental or medicinal. So we need to try a different approach and strengthen our own God given immune systems because no matter how many boosters come out this virus is in our environment to stay (like the flu) and will continue to just mutate to outrun them. It's time to be PROactive in other ways as well.

When we're afraid, or in periods of stress, our bodies release stress hormones. In the short term, this is natural, its what keeps us safe, but if we are constantly in states of stress, and if our bodies are constantly releasing stress hormones, this weakens our immune systems. I'm sure we can all think of times when we've been super busy for a few weeks and then gotten sick. I can certainly think of people I know who are always stressed out, and also always sick. The narrative of fear is such a good point to bring up, because its exactly what we should be avoiding. Take whatever precautions you think are necessary and then just live your life! Vitamins, and plant-based foods are also always great options, as well as exercises like walking or yoga.

Terrie Batdorff
I strongly advocate for echinacea and, vitamin D for the immune system. Also if you do get sick make sure that you breathe in a lot of steam; It breaks down and kills virus particles in the nasal passages and throat. Just boil a bowl of water and use a towel and breathe it in. Also very important to push fluids as they wash virus particles from your throat down to your stomach where GI acids can tear them up. One more thing: take 2000 mg of Lysine (amino acid) daily; it suppresses viruses.

Terrie Batdorff be very careful with Lysine. It says on the bottle to take it WITHOUT food for a reason. Your stomach has to be and stay completely empty for awhile while it's in your stomach. Lysine has a nasty side effect of raising your triglycerides. I found this out. I went in for my annual, and my triglycerides were 716! Normal is under 190! I did some research and learned it was the lysine. I quit Lysine immediately, and went back in 6 weeks later for another blood draw. My triglycerides dropped back down to the 300's. It is now in the normal range. But, if I would have continued Lysine, it would have led to cardiac arrest in several years, per my doctor's words.

Theresa Vest Drinkwater, I like the immune list however when it comes to onset of cold and flu you should be increasing the vitamin C to 3000 to 4000 a day spread out during the day. As water soluble it goes through your system fast. And if you take too much of it at the same time you will get loose stools. Healthy functioning immune is our defense.

Get in good physical shape (lose weight, etc.), get outside (vitamin D) - most important: find a way to be happy, real happiness not just from chemicals or instant gratification. Stop being fearful and eliminate anxiety. Eat better (and probably less).

Ashley Diane Cohen
Sarah Prout this! The narrative to “stay home, save lives” is actually causing unnecessary obesity, which in turn is creating underlying conditions in many folks. The media never pushes healthy food choices, gyms, etc, but rather fast food chains and “ordering in”. People need to take control of their own health and do what they can to boost their immunity. I've had Covid and haven’t had it since the pandemic began. I eat healthy, whole food and run almost daily. Even when I did have Covid, it wasn’t as bad as it could've been since I was already healthy.

The theory of virologist and how to make effective biological-weapons.

By using stem cell research, nanoscien and gain of function, yet the virologist had not come up with a successful bio-weapon. Aids is semi successful, then we got ebola, Sars, Zika, Mers, N1H1, just to name the few, would you call these a success? Effective bio-weapon?

I think they had reach some goals with maybe 30% - 40% efficacy base on influenza vaccine, depend on each viruses.
But in biological weapons stand point it is not successful.
Despite aids, ebola, covidd, many people have natural immunity and adaptability, therefore it not as successful as elites want it to be.

But they are successfully at hiding the truth, successful at brainwashing people and successfully shutting down the world, they are even more successful at moving money to big pharma and few others.

To be more successful the virologist know they would have to bypass human immune system, weaken them, so these viruses could have their way with your body.

This is the war of immunity,

natural immunity vs vaccine immunity.

Man-made viruses vs human adaptation.

Ashley Diane Cohen This narrative is actually a mental disorder. We are responsible for ourselves. I am not responsible for you or your health and you are not responsible for mine. The narrative "if I don't wear this face diaper, I may kill someone or cause someone to die" is not only ridiculous, but definitely indoctrination and brain washing of the most narcissistic nature. Definitely in the mental disorder category.

The question that should be asked is why 600,000 federal employees are exempt? Why should you be vaccinated? I'm trying to figure out what is wrong with Americans thinking? Why would you want to be vaccinated with a vaccine that don't work? If Doctors are speaking up who are experience in virus and tell you that the vaccine will be useless against the Delta variant cause it wasn't manufactured to target the variant but is made to target the 1st variant ..... This is why the vaccinated still can catch it....... Your only true remedy is the Earth minerals which the human body lacks due to the gmo food been eating and immune system are being depleted by your diet ...... Sarah Prout MSM won't let healthy if out. I survived Covid at 73yrs old. I've always eaten plenty of fruits, veggies, beans, peas, eggs, don't smoke, only have a rare glass of wine and try to drink plenty of water. An excellent veggie is cabbage. It helps cleanse and flush the lymph system. I cringe over children eating sweets, drinking pop, eating chicken nuggets and fries. Anything fried becomes carcinogenic when cooked in grease and oil at high heat. Sugar damages the body's cells...it's in all packaged and prepared foods. Ketchup and dry cereals are major culprits. Sugar also feeds cancer. I wish more parents would take the time to look at proper nutrition for their children in order to build good immune systems.

**Sarah Prout** I’ve been sharing my story with no recognition. I believe both my husband and I had Covid in Feb 2020 which we were told was respiratory issues. When everything came out, we had the same symptoms as the virus. Neither one of us have ever been that sick, it was scary as hell.

On March 1, 2020 (still before receiving Covid info) we both started taking Probiotics and multivitamins daily. We’ve both been getting tested 1-2x a month since Sept 2020 with negative results each time. Not only have we been exposed to Covid by vaxxed and unvaxxed ppl, we’ve been in large crowds due to getting married in the pandemic and still tested negative. This is the longest in my life I’ve went without even having a common cold.

I feel ppl who want to get vaxxed should do what makes them comfortable as my husband has only bc he felt pressured and mandated for school. But still chooses to take his vitamins.

Ppl who don’t feel comfortable taking the vaccine should be given the alternative option instead of creating a war between the vaxxed and unvaxxed.

CDC changed the definition of “vaccine” at least three times now. Check it out. These injections don’t confer any immunity — they “maybe” soften the blow of covid and that’s if a cytokine storm doesn’t cause someone to decline. The first mRNA injection of its kind, limited safety testing, and a myriad adverse events apparently being covered up. It’s a mad, mad world.

Then what, pray tell, is something which introduces inactive viral components to your body for the purpose of priming your body’s immune response to more quickly recognize those structures as a foreign threat?

That’s literally the point. It’s modelled after our own immune system so we all don’t have to get small pox, measles, hepatitis, etc. to be able to defend against the viruses. How dumb are you?

Hear, hear!

I’ve been taking D3 and Zinc. Thankfully covid was a walk in the park for me. I wish it was for all

Wild that your body can synthesize necessary vitamins from the food you eat. Weird that so many people are suggesting eating vitamins when, by your logic, it is literally pointless and just gives money to scam vitamin companies. Unless, you know, it is possibly too use science to bolster your body’s natural processes.

My wife and I worked through the whole thing exposed to quite a lot if the public and never took the jab nor got sick. Both of us doubled up vitamins and water plus added couple other things we did anyway that are organic for arthritis. No problems. My brothers dodged the swine flu vax under Carter. It sicken,crippled and killed a couple thousand service people before being withdrawn. I missed the anthrax vax by getting out a couple years before it was experimentally used in 1990. Some friends are all screwed up now.
Nope we will never trust the government nor take the vax!!!!

Sarah Prout That's the way to go if you haven't taken the vax. The point of this is to make people aware these shots are very dangerous and should be taken NO MORE. If you think it's going to get better with a third, fourth booster shot with a healthy immune system. It's not, many more will die. The point is these are neither safe or effective. It's exactly the opposite of what media is saying! Vax is spreading variants and killing more double vaxed people. Look up stats for Israel, Iceland and Gibraltar!

Shannon Goldschmidt

Darlene Trivette Magyar Just because you had no side effects from the vaccine, doesn't mean other people haven't. I have heard from numerous people that have. Even my brother after only getting the first shot, got sicker than he has ever been in his life and he is still having issues which is why he decided to not get the second shot.
Jerry Bures
Cole, I suggest when you finally wake up to what we all know, you'll realize that Fauci approved this bioweapon research, shipped it over to China when some in NIH complained, then continued funding it. What can I say? People just drank the kool-aid and got the shot because they were told to. Did they research it, NO! Those shots are not even FDA approved! They are working on ones that will be FDA approved, but that might be awhile. So, basically you have NO idea what is being put into your body. There are many people out there that are completely stupid and get the vaccine. I myself know many people that have gotten they shot, it's like follow the leader, but there is know leader
Greg Morris

I own and operate a health and nutrition store. There are more people these days trying to do just that.
Unfortunately, media and government are all about a magic pill, a fad or crash diet, a vibrating machine, or any easy way out to be healthy and lose weight.
There are no short cuts to good health! But it is achievable for anyone that actually puts their health first!
We are a brainwashed and lazy society that looks for the easy "bandaid" option.
Education on health is key! I feel deeply for those that rely on government or commercials or even doctors! For Health advice or guidance.
Doctors are good for a broken bone, a cut or a prescription!
People don’t take financial advice from poor people.
Why would you take health advice from people that quite evidently are UNhealthy.

Sarah Prout where are the programs for free gym memberships, free nutritious food without all of the toxins, free vitamins? If this was actually about keeping people healthy, these things would be free. However, a few very rich people see more potential in keeping us all sick. Why isn't there a treatment plan after 18 months? They just tell you to wait it out until you have to be hospitalized... we had flu treatments when the flu existed... it's all just very confusing.

Robin Eacret as a soil scientist- no. If a soil is depleted, a plant cannot produce. Leibigs law of the minimums here. A plant can only reach as much of its genetic potential as its most limiting nutrient. There are 17 essential nutrients, those that don’t exist are added through soil amendments. I agree with most of what you say, but you’re incorrect there.

Sarah Prout  doctors agree, the best way to help yourself not die of COVID if you do get infected is:

1. Maintain a healthy diet.
2. Maintain a healthy sleep schedule.
3. Maintain a healthy exercise schedule.
4. Be vaccinated.

Edit: to the people saying "except number 4" unless you’re an MD or doctorate researcher, your "opinion" doesn't change the prevailing facts of the day. If you want to 'wing it' with COVID, go ahead. But it's just a fact that the vaccine is one of your best weapons (if not the best) to prevent yourself from dying prior to a COVID infection.

Sarah Prout  No matter what your perspective is, take care of your children and their future. Safe guard freedom, and stand against two-tiered societies. I agree, seeing this steady stream of COVID mania is exhausting.

Lisha Lockhart
Sarah Prout  in that case don’t watch the news , that’s all the spread is hate and fear .

Wendy Rogers Young
Connor Skudlarek  agree with everything but #4. I believe 4 is a personal choice and if you are doing 1-3 you don’t need 4 because your body does what it is suppose to do naturally.
Connor Skudlarek
Wendy Rogers Young but math doesn't care if you agree.

All 4 of them are personal choices. It isn't like getting a vaccine is any more personal than maintaining a sleep schedule.

The data is in, the math is done, and all 4 of them are your best bet for what you can do to prevent death should you become infected. (1-3 is also almost always your best bet in nearly all other cases; #4 is only applicable to diseases for which a vaccine exists).

It is up to you if you want to do everything in your power to not die. If you want to 'wing it' and proudly stand in defiance of modern medicine in the belief that your meat sack will do its job (something diabetics and cancer patients wish their bodies would do, but no amount of 1-4 will make that happen)... well, that's up to you.

**Connor Skudlarek** diabetes absolutely can be prevented with diet exercise with exception of type 1 which is a systemic type not a diet problem. Once the pancreas stops producing insulin you need insulin. But you can in some cases increase the body ability to heal itself and produce more insulin naturally. Not all diseases need modern approaches. And some certainly do. The key is the balance. And the knowing what is right for YOUR body. No body is the exact same. Therefore different approaches are needed to balance each individuals needs. Natural medicine adapts better and is more readily acceptable to our systems, therefore eliminating toxic side effects that destroy our natural immune systems. We need to eat better sleep better and turn off the TV! Try it. See how you feel!

Milton Douglas Allman The Flu Vaccine is redesigned every spring they decide which strains of the flu may be more prevalent during the year. One to three are usually included in the flu Vaccine.
So how that works for example they decide that H1N1 is going to make a comeback this year so they add that to the vaccine for this year. You get the vaccine but another version of the flu is going around in your area the shot does nothing for that. Its all up to your immune system to fight it with Tamiflu ect. Same with this one they are working off the original strain not the current D variant.
The other issues is the flu vaccine doesn't stop the transmission of the flu you can still give it to someone even if you have hardly any effects from it yourself. Just like whooping cough it no longer prevents the transmission so it protect the toddler who got the shot but if that toddler is exposed at daycare they can bring it home and give it to the unvaccinated younger sibling.
Do you see the pattern now we are not trying to stop transmissions of any of these now we are just trying to make the symptoms easier on the vaccinated individual.
Mariluz Collado

Per FDA mandatory disclaimer: Asea does not diagnose, treat or cure any disease. The FDA put the biggest 21st century in bio-tech ever in a dietary category. They would not give this breakthrough a stand alone category despite the fact there is nothing else like it on the market. Forced it into the dietary category when it has zero nutritional value. It is the discovery of redox signaling molecules that we all have in abundance during youth, but diminish over time until in our golden years we are really deficient. A decade ago this breakthrough was opened up globally. Now in 32 nations and growing. It has no competition and is the paradigm shift proving to be totally disruptive to big pharma. Sarah Prout I have a background of nutrition for over 15 years and here's what I've come up with. Take NAC, Zinc, and MMS, which is a liquid that includes Chlorine Dioxide and Citric Acid (lemon juice) for health and well being! I'm not allowed to say it's
a cure, but I am allowed to recommend health supplements! Graphene Oxide Exposed: Best Home Remedy
We had access to a sealed vial from Pfizer, and by means of a request for services to a university, specifically in my name, it was sent for an analysis of the vial, where we were looking for the material in question: graphene. After some time of investigation by Dr. Pablo Campra Madrid, Doctor in Chemical Sciences, Bachelor in Biological Sciences and member of the University of Almeria, we obtained this preliminary report where we are told that there is indeed solid evidence of graphene oxide in the sample and that it is also the main component of what they wrongly called a vaccine.

From here and with this solid evidence, which will be further complemented with other spectroscopy techniques that can be done. Those that have been used are transmission electron microscopy; EMF techniques, also, optical microscopy; and ultraviolet radiation spectroscopy, which coincide with the peak wavelength of graphene oxide. From here we began to study the toxicity or cytotoxicity that graphene oxide has on the body.

Pay attention to this finding: Graphene oxide inside the body causes thrombogenicity, thrombi. Graphene oxide inside the body causes blood clotting. Graphene oxide inside the body causes post inflammatory syndrome or systemic or multi-organ inflammations. Graphene oxide inside the body when it is above the levels of glutathione —which is the body's natural reserve of antioxidants—, causes alteration of the immune system, collapse of the immune system and cytokine storm. Inhaled graphene oxide spreads evenly throughout the alveolar tract and causes bilateral pneumonias. Inhaled graphene oxide causes inflammation of the mucous membranes and thus loss of taste and smell, possible loss of taste and smell: anosmia.

In short, graphene oxide behaves exactly like the supposed SARS-CoV-2 of the official version, generating the same symptomatology of severe COVID-19. When installed at the neuronal level, it causes neurodegeneration or, in other words, neurological COVID-19.

So, from here we started to see what possible compounds, drugs and treatments could degrade graphene oxide. And look what we found: N-acetylcysteine or glutathione administered degrade it. Because what glutathione does is counteract free radicals and oxidants, all the toxins that can enter the body.

And we discovered that there were about 300 clinical studies where certain hospitals and certain universities were using N-acetylcysteine with incredible results. For example, 100 patients with saturation levels below 50% practically dead —bluntly speaking—, with bilateral pneumonias, within an hour of intravenous glutathione or N-acetylcysteine administration. They were taken off ventilators and everything.

On the other hand, I have been asked about the efficacy of chlorine dioxide. That goes another way.

What it does is to oxygenate the cell, it prepares it so that it is not easily destroyed by this toxicant.

What glutathione would do is to provide the army with more numbers of soldiers in terms of glutathione to deal with toxins.

We now fully understand why those treatments worked: because they addressed all the symptoms of the disease supposedly caused by SARS-CoV-2. Given that to date there
is no scientific evidence of an actual sequencing and isolation of SARS-CoV-2, we suspect with many credible indications that COVID-19 disease is actually the side effect of the introduction of graphene oxide into the body by different ways.

After a couple days it will have dried completely into a powder and then you scrape the bottom of your glass pan and take that powder and put it into capsules, I make my own capsules with a variety of things in them!! Sarah, I was recommended to take 100 mg of zinc picolate, 2000 mg of Vitamin C and 14,000 units of Vitamin D. The combination of the three strengthens your immune system. Note: take the C 1000 mg in the morning and 1000 mg in the evening. For the folks talking about immune boosting

If you don't have an immunocompromised system, you already have a working immune system. There's very little you can do to make it "boosted," and even if you could you wouldn't want to. An overly "boosted" immune system leads to health complications, like allergies for instance.

When you eat healthy and exercise, you're mostly helping other things in your body. Making those parts of your body more resilient to damage and injury, and more adept at healing.

Olive oil and vinegar are good for you, in small amounts. Just like strawberries are good for you in small amounts, rather than 5lbs a day. 😊

Sarah Prout Exercise, eat right, take a multi. Been the advice for years and not many want to hear it and are fine with getting Type II later in life.

The vaccine just gives your immune system a heads up to prepare ahead of time. Your immune system is still doing all the work.

So how about exercise, eat right, take a multi, and get vaccinated. Boom, immune system primed.

**Richard Lougee** i know why it is missing. If you are unvaxxed you now have antibodies. Man made virus or not, you now have antibodies. If you do get the vax and youve had covid your body could react even worse as it will be in attack mode but it will be shooting blanks. With nothing to do, a cytokene storm of useless spike proteins is even more likely if I have understood anatomical pathologist dr cole from the independant idaho laboratory correctly. Thirdly, if you have been vaxxed your natural immune system is more compromised with every jab. First by 15 percent, then by a further 35 percent and every booster shot will diminish your natural immunity further. According to some professor who studied at oxford, sorry , forgot his name now. Basically, all the antibodies get usurped gradually by the newly engineered antibody that attacks the non specific antibody. On top of it, this delta etc variant story is preplanned and until today nobody has made a common cold (corona type) vax successfully because it has probably gone through 15000 new mutations since the last developed vax. So, by getting the vax, every different flu could kill you and getting a flu vax of a different type might also now kill you because with your artificially engineered immunity your immune system has become more and more rigid, only attacking one pathogen, the patented ( corona and not ALL the others. Anyway, why trust the poison patent holders with a cure for you. They want to kill you. This is population control and still experimental. What will happen to unborn babies? Thadalomide 60 years ago, rings a bell? It is agenda get rid of 3,2 billion people. Of course I am speaking under correction, please feel free to do y proper research, but dont get to judgement day and tell them that you got vaxxed because your aunt is a doctor and thought its a good idea. A day of reckoning will come.

**Sarah Prout** such a great call out Sarah. Prophylaxis is rarely mentioned with this administration. We are able to get ivermectin from many doctors across the country. People just need to research it to find a source. D3, Zinc, C, selenium, turmeric are all good immune boosters, esp D3. Even Lord Fauchi recommends D3

After the vaccines were available... someone I care about suffered from severe memory loss AFTER the second shot. A medical doctor could no longer remember where they lived or how to get home. Memory has yet to return. One life destroyed, and that life affected many others. But lives don't matter to you, you just seem eager to celebrate the death of the unv'd.

Age: 24 Years Old
Elliot's Story in his own words
Hello my name is Eliott and I'm 24 years old.
In perfect health, yet I had a pretty serious heart attack only 5 days after the second injection of the Pfizer vaccine.
I spent more than a week in intensive care at the Salpêtrière in France where I'm still, I also went not far of death.
24 years is very, very young for a heart attack, I specify that I never used drugs etc...
I was sporty because I wanted to become a pilot in the army, for those who know, I had passed a very advanced class 1 medical at the Toulon CEMPN that detected absolutely nothing abnormal 6 months earlier, I had been declared fit fighter pilot, now this heart attack has flown all my dreams for which ones i fought.
The doctors haven't actually found the cause and don't know what to say when I talk about the vaccine but admit it can be a cause, yet it seems more and more obvious to me.
I'm going to have to take life meds and my heart may not recover at 100 %, I'm only 24 years old, I was military, I'm devastated, my life is wasted, A month ago everything was fine.

Chris Kreider
Moderna December 2020
His story is told by Friends set up the Following Go Fund me Page and Chris gives an Update in His Own Words
To help the Kreider family with unforeseen expenses related to Chris’ reaction to the Covid vaccine, friends have come together to create a GoFundMe page that will help them through the next year.
Chris joined the ministry full-time last year after being ordained by Cityview Community Church. Only months into his first, full-time job as a chaplain at Marianjoy Rehabilitation Hospital, Chris faced head-on the increasing care needs brought about by a worsening global pandemic, something he bravely took on as his mission and calling.
Chris faithfully served Covid patients and survivors in the early months of the pandemic on top of his usual duties, and when vaccines were made available in December 2020, Chris was among the first wave of front-line workers to receive it.
Tragically, due to his body’s adverse reaction to the vaccine, Chris has suffered on-going health complications that will require the Kreider family to make potentially significant changes over the next year. To help the family navigate this time and cover important monthly expenses, we’re asking that you please consider making a donation.
If you’re unable to give to the Kreider’s at this time, we still invite you to pray for them and share this with anyone you know who might be interested in helping. While this year will likely be a very challenging one for the Kreider family, their trust in God remains strong and grounded in the unshakable and certain hope they have in Christ.
Told by Chris in His Own Words
12 March 2021
Thank you, everyone, for your continued support and generosity. We have been able to make significant progress towards tackling the unexpected expenses related to my initial injury and subsequent loss of employment.
Thank you everyone for your generosity, prayers, and words of encouragement! My family and I are so grateful for your continued support.
It has been 90 days since my injury and I am now at the end of my FMLA leave. Therefore, my need for recovery has required me to step down from my chaplaincy position as the on-going complications of the COVID vaccine continues to prevent me from returning to work.
As you feel led, please continue to pray for us and for my healing, If you are able, any financial support continues to be a blessing.
Thank you from the bottom of my heart,
31 March 2021
I continue to experience significant brain fog on a daily basis greatly impacting my ability to multitask. I remain unable to drive and still experience significant pain on the left side of my body from my left eye to my left foot. However, and gratefully, there have been occasional, brief moments which have allowed me to walk outdoors in front of our house and experience the warmer air and sunshine. Nature, especially more comfortable temperatures and sunshine, seem to bring my soul the greatest opportunities for peace, which I cherish when given the experience.
Blessings to you all.

Shana
Pfizer February 2021
Severe Adverse Reaction: Guillian-Barre Syndrome
Shana's Story Told by her Friend Susanna
Shana was placed on mechanical ventilator and placed in ICU. She was there for 41 days on the ventilator.
On Monday, 22nd February Shana started experiencing a tingling and numbness in her fingers and toes. She also had pain in her back and neck, and a pins and needles feeling throughout her body. By Wednesday, 2-24, the numbness had spread. She was now experiencing a loss of feeling in her hands and feet, but also still feeling pain, and having some trouble breathing. She scheduled a doctor's appointment that morning, but to her dismay, she was told that it was just a lack of vitamins in her body. She was given some vitamins to take and sent home.
By that very same night, the numbness/loss of feeling and pain had continued to spread. We finally convinced her to go to the ER. She was very scared and worried, and part of that was due to the fact that she has no insurance. She was worried about being sick, but also very worried about being able to pay for an ER visit. She spent hours in the ER with pain and numb limbs to the point she was beginning to be unable to walk on her own. They finally sent her home with a diagnosis of having anxiety attacks. She has never suffered from anxiety before, and we were all stumped that her arms and legs were going numb and they sent her away basically saying it was just anxiety and it was all in her head. She was given something to relax her and the only thing they prescribed to her was an inhaler to try and help with the breathing issues.
The next morning, Thursday 2-25, the issues continued to get worse. The numbness/loss of feeling and pins and needles feeling had spread further. It had moved up her legs, all the way to her thighs. She was unable to walk on her own at all, and she could not sit up on her own. She also had a heaviness on her chest that was making it difficult to breathe. So she decided to try a different place and ended up going to Tristar ER. They once again ran an array of tests, only to come to the diagnosis of anxiety attacks once again., she was given Xanax to calm her and Lorotabs for pain and eventually sent home again.

On Friday, 2-26, she was completely unable to walk or do most things for herself. She was basically paralyzed. And if it wasn’t bad enough, she was having chest pains and extreme difficulty to breathe. An ambulance was called and she was taken to Maury Regional ER once again. This time she was admitted. After further discussion of her symptoms, and speaking with a neurologist, she was diagnosed with Guillain-Barre Syndrome.

This disease is very rare, but becoming more common with people who have or have had Covid, AND with people who have gotten the Covid Vaccine. GBS is a disease where basically your immune system attacks your nerves. It is so rare that the hospital apparently doesn’t keep the medicine for it in stock, except enough for 1 person. And unluckily enough, there was already a person there with the disease.

The night of 2-26, she started the treatment for Guillain-Barre Syndrome. We have been told that she will be staying at Vanderbilt and being treated for a minimum of 5 days. But the recovery can, and probably will be much longer. She will also have to undergo months of physical therapy. By 14th May 2021 Shana was placed on mechanical ventilator and placed in ICU. She was there for 41 days on the ventilator. She was then transferred to a long-term care facility. She has finally got off the ventilator and they have removed her tracheotomy. She is still at the long-term care facility undergoing therapy to learn how to do basic day to day skills and walk again. She has not gained all of her feeling back as of yet and it’s taking a while for her left hand to respond. She is getting better but it’s a slow process. 77 days in and a long way to go to get back to somewhat normal. We are grateful for the prayers and support everyone is giving her.

Severe Adverse Reaction: Paralysis
Rachael's Story Told by her brother Below & Racheal Telling her story on WPXI
Rachael received her first COVID-19 Vaccine (Pfizer) on Wednesday, April 14th and woke up in a terrified state, in full-bodied paralysis at 1:30 am the next morning. She had to yell for her 3-year-old daughter Bristol to call for help.
She was taken by ambulance to Jefferson Hospital where they treated her with oxygen, took a CT scan, and they then immediately sent her to Allegheny General Hospital (AGH) by ambulance. AGH ran several tests including blood work, a 2-hour MRI, and a Spinal tap.
With all these tests and her medical history, she is a healthy 33-year-old and the only unknown is this vaccine. As things progressed, she was then taken to the Cleveland Clinic by ambulance.
The Cleveland Clinic ran another gauntlet of tests and they confirmed she had a distress reaction from the vaccine that caused her nervous system to trigger paralysis.
After the Cleveland Clinic, she was sent to in-house Acute Rehab at Jefferson Hospital. Through this time, Rachael regained feeling in her arms, but still lacks strength in her left arm. She has some strength in her left leg, but no strength in the right leg, and both of her legs have no sensational feeling. It's hard to believe she went from being fit and active one day to not being able to walk now.
Rachael is now home to work on these continued symptoms and challenges. While being home is what we all wanted, the road ahead still looks dark. She is set up at home with extensive in-home rehab with an occupational therapist, physical therapist, and an RN.

Severe Adverse Reaction: Neurological Damage, Tremors
Age: 34 Years Old
On the 29th June 2021 Georgia from the United Kingdom had her second Pfizer Jab. From then, she didn't quite realise what was in store for her and her family.
On Getting the first jab, she just had a headache and severe tiredness.
Although she had immediate side effects after the second, she started suffering headaches, dizziness, lightheadedness and daily fainting episodes. Literally fainting at the drop of a hat, leaving her boyfriend to scoop her up.
Fast forward approximately 10 days later and the tremors started, fully body tremors. She then slowly declined losing the ability to walk properly.
On Wednesday 14th July 2021 she was admitted to hospital, a week later still there and still awaiting on numerous results.
Following numerous tests, MRI's, CT, Lumbar Punctures and blood tests... Some she is still waiting on results.
The frustration she has is through the roof, along with the stress her family and friends are going through. They all just want to know 100% what is going on.
Assuming the tests are ALL clear it is being diagnosed as FND. But they are still waiting.
She had been reluctant to get it from the start, but after overwhelming pressure from her peers and the media to do so, she caved.
She Says "Do NOT feel pressured into getting this vaccine, please.I didn’t want it done. I felt pressured by peers and media"

Natalie Clancy
Pfizer 6th April 2021
Severe Adverse Reaction: April 16th 2021
Natalie's Story in her Own Words
I’m sharing this personal post in an attempt to create awareness and spread information about my severe reaction to the Pfizer COVID-19 vaccine. I hope to be an advocate and resource for others who are suffering from similar symptoms and horrific, life-altering experiences after
receiving the vaccine. I don’t want anyone to struggle through the weeks of pain and misguidance from physicians that I have.

My symptoms began on 16th April, 10 days after receiving the first dose of the COVID-19 Pfizer vaccine. It began with upper back muscle aches, on the same side as the vaccine injection. At first, I thought perhaps I pulled a muscle at a workout class, however after the third day of fatigue, the pain started intensifying throughout my body. My knees, ankles, wrists, back, neck and head started intensely aching and turned to flu-like fatigue and a low-grade fever which rendered me bedridden and unable to sleep or move much.

On 1st April, I checked into urgent care where both my COVID-19 and influenza vaccines were negative, so I was instructed to go to the ER to be evaluated for possible meningitis. At the ER, I mentioned separately to both the doctor and a nurse that I believed my symptoms could be related to the vaccine, but they both promptly dismissed the idea and discharged me with a “muscle ache.”

For two days I was in relentless pain, which left me basically moaning and crying for hours on end. Several of my previous gymnastics injuries from when I was in my teens had resurfaced. My knee swelled up so badly that I couldn’t walk, my previous fractured wrists started aching, my left foot became inflamed, ankles ached, and a rare skin disease I had when I was 19, erythema nodosum, large painful welts on the legs, also re-emerged.

On 23rd April, I saw my primary care doctor who also dismissed the idea of my condition being vaccine-related and misdiagnosed me with a respiratory infection, prescribing muscle relaxers that did nothing to ease the discomfort. Three days later I went back in to see her after my condition worsened and she ran labs and suggested it could be an STD (it was not).

On 28th April, the pain was intolerable, and I checked into a different ER where they admitted me to the hospital, ran labs and kept me overnight because my heart rate was so high. It was at this hospital, CPMC Sutter Health, where the Infectious Disease expert finally diagnosed me with having a severe allergic reaction to the COVID-19 vaccine and told me that he had seen other similar cases. I was discharged and put on Dexamethasone; the same steroid given to COVID patients, to calm the immune system.

My steroid dose ended on 3rd May, and one day later, I started experiencing violent sickness along with the same arthritic symptoms as before, so I checked back into CPMC ER where my knee was drained because there was worry of infection, and I was put on a longer, tapered course of steroid (prednisone) and referred to a Rheumatologist who ruled out autoimmune diseases and confirmed this was a reaction to the vaccine.

Five weeks later, I have now finished the steroids and am experiencing the same symptoms all over again, swelling and inflammation of the knee and other joints, severe neck aches, and sleepless nights. This time, I’ve decided to seek the second opinion of a naturopath in an attempt to refrain from continuing yet a third round of steroids.

What I have been told consistently from the many doctors that I have spoken to throughout this medical saga is that “we just don’t know enough.” At this point, there are too many unknowns and not enough data. I have been told that perhaps my body just couldn’t recognize and register the mRNA vaccine, and it’s possible that later down the line I could consider getting a more traditional vaccine, like Johnson & Johnson’s which administers an adenovirus. My body is far from being ready for that though.

I encourage you to share this story with your friends and family, and please reach out to me if anyone you know has experienced anything similar. Sharing our struggles will only make us stronger. I’m sure there will be many more to come.

Mary Anne Akins Harris
Pfizer 23rd April 2021
Adverse Reaction
Mary Anne’s Story in her own words
I’m a 51-year-old healthy active woman. I received the first Pfizer vaccine on Friday, April 23rd with my husband (he only suffered fatigue the day after) on my right arm. About 6 hours into the shot, I starting feeling numbness on my right side of my face and numbness going down my right side. If subsided over a few days along with foggy mindset, fever, fatigue, upset stomach. During that week into the next I didn’t feel like myself and then on day 14 two weeks on a Friday, I started experiencing my left leg swelling then within 2 hours tight chest pains along with upper back pain and throughout the night including my left arm and down my left leg.
In the early Saturday morning, I started feeling sick with pain and I never go to the doctor with illness or sickness much less hospital trips. I was admitted into the hospital for overnight observation to rule out stroke and heart attack with test and lots of blood work and was released on Mother’s Day afternoon with no diagnosis. I rested the rest of the evening. On Monday, I saw my primary and she wanted to rule out a blood clot and noticed my blood pressure was high as I typically have low blood pressure. On Tuesday the doctor discovered that the lab lost my blood work and because of her great concern she asked me to go back to the ER so they could test me for blood clots and after 8 hours they discovered none with more tests and bloodwork. So continuing with no diagnosis with pain and discomfort. I saw the cardiologist on Friday who wheeled me back to the ER for another CT scan but with contrast to rule out heart issues. That was clear. So, I was released. I rested all weekend and on Monday, I received a call from my primary that they found some unusual texture in my right breast so now I go to get an ultrasound and an MRI to rule out anything in my neck or back. I told someone that I feel like my body is playing a war game. My body is sending out symptoms that are serious ones but when they do test there is nothing which is a blessing.
I am Just ready to feel like myself. When talking to the doctors everyone wanted to dismiss my comment what about the vaccine and finally after my 3rd ER trip an ER doctor said it could be a vaccine reaction because he had seen a bunch of side effects in the ER. I did report it to the CDC and VAERS. I had an ultrasound on Monday they found something and they are saying that it is the vaccine. My blood pressure is still high even now being on two pills and I’m tired, dizzy and nauseous at times. After racking up over $10k in out of pocket medical with zero results. I’m still fighting everyday with listed and more. It has never gone away nor shows any signs of improvement.

AstraZeneca 10th June 2021
Severe Adverse Reaction: Clot in Renal Artery, Two Large Haematoma's in Abdomen
Karen's Story in her Own Words
Prior to having AstraZeneca vaccine, I had routine blood tests and not long before a heart scan, both indicated I was very healthy
10th June I had the AstraZeneca
11th June had the headache for a couple of days and very fatigued
15th June My husband called ambulance as I had sudden lower back pain radiating down my flank, went to local hospital and had a CT scan and a very short ultrasound. NA detected sent home with have a Panadol or come back. I survived on Panadol for the next 8 days
23rd June my husband called ambulance and I went to the private hospital where a CT with contrast was done. The Scan Showed a clot in the renal artery. Placed on clexane unfortunately I suffered a bleed and had two large haematoma in the abdomen. The clot is still there. I have no history of clots or bleeds and was very healthy prior to the AZ, the doctor is pretty convinced my misfortune was due to the Vaccine.
My brain is still not quite clear and I still suffer from pain in my abdomen and side, my body is definitely not the same
I am by no means an anti vaxxer. I chose to have the AZ as we were going traveling in a few months' time with my 89-year-old family member and I chose to protect her as well as myself. I had a gut feeling about having it and yes, I really should have listened to my gut
My GP is pretty sure my case is related to the jab and he has tried very hard to find out the avenues to have it proven, unfortunately and apparently, I don't meet the criteria according to the scientist he spoke to
I feel the politics that are being played out are not for the benefit of the population in regard to covid

Jamie Walton

Johnson & Johnson Serious Adverse Reaction: Guillain-Barré Syndrome

Jamie started feeling numbness and tingling in her feet and hands. "I know my body and I knew something wasn't right, so I kept trying to go to different doctors and I kept being told, 'You're dehydrated. You're fine, "One doctor told me I had anxiety. "Otherwise healthy, Jamie started falling and ended up paralyzed from the waist down and was not able to walk. She went to the emergency room twice and met with several doctors before she found out what was wrong. When this first happened, I honestly thought 'Am I dying?' "It's so weird when you have everything being taken away from you, and it was pretty fast moving up the legs to my hips to where I was numb, waist down, then the arms and the fingers."

Jamie spent 22 days in the hospital suffering from Guillain-Barré that she said her doctor determined was brought on by her COVID-19 vaccine.

Please keep me in your prayers!! I have taken a few steps back again this week. I lost use of my legs on Wednesday, I was able to get a walker on Thursday to help me around but it's definitely taking a physical and mental toll! I'm trying to keep in mind the good days I have too but these bad ones are really bad!
Shawn in her own words - 4th June 2021
As most of you know I took the Vaccine on 4th January 2021 and since my life has forever changed! I have lost many friends, most of my co workers have abandoned me. My job terminated me!
Everything I loved to do I can no longer enjoy, my family is suffering! I miss my job, my patients, that was my calling! It has all been taken from me and American Senior Communities, Good Samaritan Home and Rehabilitative Center dropped me like I was nothing! Workmans comp denied me even though my DON told me to go to the Er. It's on my chart I’m allergic to the Moderna vaccine yet can't get a real diagnosis or any medical help!
Bills continue to pile up as we’ve gone from 2 incomes to 1. Please continue to pray as I’m 5 months in today! I have attached a video that holds who I was, who I am, and what this jab has left me like! My go fund me link as we need all the help we can get! Pray, and share!!! No matter what I hope the ones that dropped me appreciate that I continue to fight for you! I continue to speak out and hope to stop this mandate so you don’t end up like me!

AstraZeneca: May 2021
Adverse Reactions: Hair loss, Fatigue and Blood loss.
Lynette’s Story Told in Her Own Words
I Had the AstraZeneca jab early may and probably lost 50 to 60 percent of my hair since. I've gone from going to cross fit 5 times per week to lucky if I manage a 30min cycle 3 or 4 times per week. I'm just wiped.
Oh, and I bled vaginally worse than after I had both children. Way too much info but it was literally flooding from my body. I'm talking sitting on the toilet and clench my stomach and blood landed in the toilet for a full 24 to 48 hours
I Spoke to the practice nurse who told me I was being ridiculous and to not to Google. She went on to say she's ran the covid clinic since March and never heard anything like this. It wasn't a sign of cervical cancer so I had nothing to worry about (I was there for my smear and brought it up as she said have I noticed anything irregular)
Now my iron levels are low and kidney function is low.
I wasn't anti vax but the fact I'm now still not right and the only difference being is the jab equates to categoric certainty I won't have the 2nd.
Currently waiting to see a private endocrinologist.

Kathy's Story in her Own Words
I'm 63 and live in Spain
Since April the 13th I have had severe reactions to the AstraZeneca vaccine only had the 1st one, my symptoms are:-
Excruciating pain front left hand side of head
Mumb face same side
Deafness same side
Dizziness
Blurred vision
Itchy skin
Pins and needles in hands and feet
Heart Palpitations
Lethargy,
Brain Fog
Memory Problems and Suicidal Thoughts
Generally feeling Unwell
Loss of appetite
My Symptoms are so bad I am frightened to go to sleep this is all very scary.
I am an an asthmatic and have epilepsy although both are well managed
Before the Vaccine I was leading an active life and I got the vaccine as I was told it would make me safe from Covid and I trusted what I was told by the government and now I am left with horrific symptoms and devastated by what has happened

AstraZeneca 10th March 2021
Pfizer 24th May 2021
Please note Elaine was led to believe that she had two doses of Pfizer and did not agree to be part of a trial in mixing Pfizer and AstraZeneca!!
Elaine's story in her own words
I was perfectly healthy up until I had the 2nd dose of the Pfizer vaccination last Monday. On Wednesday I landed up in A&E after a TIA. I'm now on aspirin & awaiting a brain scan & not allowed to drive until they've cleared me. No reaction to the 1st dose. I asked if this would be reported as a possible reaction, and they said it wouldn't, as it's probably not due to the vaccination.
There was another older gentleman in with the same symptoms who had just had his 2nd dose on the Monday. Also not being reported.
I will be filing the report to the MHRA myself. How many possible reactions are being covered up? I'm not saying don't vaccinate. This is a personal decision. Make sure you have the facts before you permit anyone to inject your body with anything.
JUST GOT A COPY OF THE VACCINATION BATCHES WHICH WERE INJECTED INTO ME… PHOTO ATTACHED.
Claire Hibbs
AstraZeneca 31st March 2021
Severe Adverse Reaction: Portal Vein Thrombosis, Pulmonary Embolism - Vaccine-induced Immune Thrombotic Thrombocytopenia
Age 48
Claire's Story in Her Own Words
I had the AstraZeneca vaccine on 31st March.
I fell ill 5 days later with a bad headache, bad back and vomiting and fatigue. After 5 days of feeling like this I then had blood clots coming out of my nose and blood in my ear so I went to A&E, initial blood tests showed a very low platelet count and very high D-Dimer, then done a head CT but it came back clear but luckily they kept me in for further tests, a few days later they done a scan on my abdomen because I was in excruciating pain, they found blood clots on my liver
I had a portal vein thrombosis, then I started to get chest pains, further tests showed blood clots on my lung’s Pulmonary embolism.
I have and still am suffering from all sorts of other side effects/symptoms. I am now on blood thinners for 6 months initially and have constant hospital visits. I’m signed off work! It has been confirmed the vaccine caused this as I have no underlying health conditions.
It is written on my records as ‘VITT induced by AstraZeneca vaccine’. The word needs spreading far and wide that this is real! AND people need to know these symptoms.
I am writing this post purely for awareness, I need to make as many people aware of the symptoms people should look out for following the AstraZeneca vaccine. I am not doing this for sympathy or to scare people or to advise people not to get the vaccine.
I am 48 and have no underlying health conditions. I had my AstraZeneca vaccine on the 31st March in the morning, the vaccine centre told me I may have some mild symptoms that evening or the next day of which I did, this soon cleared and I was perfectly fine.
My blood platelet count (which is what makes your blood clot when needed) was significantly low at 13 and my D-dimer count (which is what causes dangerous blood clots) was significantly high at 5000, this should be 250.
They sent me straight for a head MRI which showed there were no clots on the brain, I was so relieved because this is what the doctors has suspected. A couple of days later my bloods were still abnormal and I started to have pains around my liver, my bloods then showed that my liver enzymes were raised, so I went for an ultrasound on my liver. This time it showed blood clots on my liver and in the vessels that carry blood into the liver and out. The pain them became excruciating.
A few more days went by and I was having pain everywhere from the pelvis upward, so I had a CT contrast scan, this showed a blood clot in my lung. I was put on a drip of immunoglobulin which is to help the blood come back to a normal level but because my platelets were so low I could not go on blood thinners to help the blood clots, it was now a race against time as the fear was that more blood clots will form due to my D-dimer blood levels. Gradually my platelets started to rise and once they reached a safe level I started the blood thinners.
So at 14 days in hospital, I now have a kidney infection and all sorts going on with my gut, I am on so much medication and will now have to live the next 6 months in pain and on medication and live-in fear that these clots may move to a dangerous location.
I have spoken to lots of specialists over the 2 weeks and learnt a lot about this condition.
This condition has now been given a diagnosis name; it’s called VITT - Vaccine-induced Immune Thrombotic Thrombocytopenia
The government are still not admitting a link between the vaccine and this condition but eventually they will have to.

Murderers

Steve Cullen
AstraZeneca June 2021
Died: Fecal Peritonitis & Bowel Perforation, the tear was caused by a rupture caused by clots from the vaccine.
Age: 55 Years Old
Steve's daughter Becky Jeisman Telling her Father's Story:

My dad worked in meat works in Victoria. To keep his job, he was coerced into having the jab. He immediately got unwell and lost him job anyway
After 1 week he was completely unable to eat and keep anything down and bed ridden
2 weeks post AstraZeneca he went to the doctor complaining of severe abdominal pain, they did an Xray and saw free air in his abdominal cavity, sent him away for a CT (Monday)
Got to book in for a CT in the town over 4 days later (Friday)
He died on Saturday
Fecal peritonitis and bowel perforation is listed as the cause of death but the tear was caused by rupture caused by clots cause by vaccine.
Dad was 55 when he passed. Weighed only 41kg when he passed due to not being able to keep anything down for 2 weeks prior to passing.
Final coroner's report would not state vaccine link as it was not definitive.
Died 3 weeks post jab.

My 87 year old mother who has COPD and a heart condition had Covid in December 2020 before the vaccine came out had made it through that was recovering and the health department and the hospital both pushed for her to get the vaccine 2 weeks later which literally almost killed her she had a severe reaction was in the hospital for a month with side effects and now she has very substantial memory loss. Now of course they tell you that you shouldn't get the vaccine if you recently had Covid it's just the not knowing that is so scary

Sue Stuever
Kimberly Thomas Mount Um, no. That's not how it works.

Missi Beth Dobbins
Michelle Thomas It was most likely the ventilation and the drugs used when they have to sedate a patient that caused her after effects. You can look them up. It's quite common. Unfortunately, she became victim of the system, not the virus. If she can get into a brain injury program that treats with different therapies, she may regain some of what she has lost. Some hospitals call them concussion clinics.

**Andrea Clark** unfortunately I have heard a lot of similar stories. That's why a lot of people are taking different supplements as it seems to help with the side effects of the jab as well as from the vaccinated shedding on the unvaccinated. NAC, CBD, zinc, quercetin, vitamin C, D3, selenium, and melatonin at night are helping a lot of people. Everytime we go to our friends house each week who are vaccinated we are usually sick for a couple of days after. Much less noticeable if we take CBD (50 to 100mg) NAC (600 mg), zinc and 1000mg buffered C.

This story is very sad, but it’s complete ignorance to assume the ONLY solution that would have prevented this was the vaccine.

We don’t know if she had underlying health conditions that made her case worse, we don’t know how her immune system was/is functioning and we don’t know how she was treated at the hospital- oftentimes patients are given treatments that make it worse.

All of this can be substantiated but you have to find other sources besides MSM.

Natasha Tanev I agree that's possible only there are 100s of ppl with the same side effects so maybe we need to do something to try and prevent it in others instead of ignoring it and demanding we all get the vaccine without knowing what triggered these responses and or deaths. How can we make an informed choice if we could die or be disabled when Noone recognizes the fact that adverse effects are NOT RARE, I'm sorry rant over.

Colloidal Platinum can repair DNA and damaged organs, is said to detox the spike protein, and help with memory problems. Colloidal Gold can help with hand-eye coordination and mental focus (But obviously don’t take them if you’re allergic to platinum or gold. Nor take them at the same time). White pine needle tea, and dandelion tea can detox the spike protein as well.

I'm so sorry to hear that, sounds like you've been on a very rough journey. What if the stick they shove up your nose also has cvd or other substance on it? Where are the sticks made? Lots more tests being done, to avoid vaccine. Lots more tests=lots more cases suddenly?? This is all very fishy to me.

I personally knew three people who died shortly after getting the jab. One lived next door to me. The other two were aunt and uncle married, got jab, and both died within a month of each other. They didn't all have the same brand, either.

I was asked why I distrust our government so much? I responded why do you put so much undeserving trust in them? I got no reply back. Here’s my reply to their question. here’s a short list of reasons not to trust the government. There’s a thousand more I could add but here’s a few for you all to chew on and digest.
By 1944 the medical team of the Manhattan Project, headed by Stafford Warren, concluded that a controlled experiment on humans was necessary. They came up with a plan to inject radioactive elements, including polonium, plutonium, and uranium, into civilian patients around the country. Between April 1945 and July 1947, eighteen subjects were injected with plutonium, six with uranium, five with polonium, and at least one with americium. The experiments were performed at Manhattan Project-affiliated hospitals in Rochester, New York; Oak Ridge, Tennessee; Chicago, Illinois; and San Francisco, California.
The 1932 Tuskegee Study of Untreated Syphilis in Black men was a real experiment. In this study, the CDC and the United States public health service observed 600 African American males as the progression of syphilis ravaged their bodies. They were told that they would be treated for “bad blood” but didn't receive any help. This experiment lasted until 1973, and these men could have been cured as early as 1943 with the use of penicillin.
In 1991, federal officials for the first time admitted that the military conducted mustard gas experiments on enlisted men during World War II. According to declassified records and reports published soon after, three types of experiments were done: Patch tests, where liquid mustard gas was applied directly onto test subjects' skin; field tests, where subjects were exposed to gas outdoors in simulated combat settings; and chamber tests, where men were locked inside gas chambers while mustard gas was piped inside. From 1950 through 1953, the U.S. Army conducted Operation LAC (Large Area Coverage), spraying chemicals over six cities in the United States and Canada.
A 1953 article in the medical/scientific journal Clinical Science[106] described a medical experiment in which researchers intentionally blistered the skin on the abdomens of 41 children, who ranged in age from 8 to 14, using cantharide. The study was performed to

https://m.facebook.com/wxyzdetroit/photos/a.461583946134/10158207966696135?refsrc=deprecated&_rdr#_=_
determine how severely the substance injures/irritates the skin of children. After the studies, the children's blistered skin was removed with scissors and swabbed with peroxide.

Operation Top Hat: Seven research projects involving chemical weapons and human subjects were submitted by the Chemical Corps for Secretary of the Army approval in August 1953. One project involved vesicants, one involved phosgene, and five were experiments which involved nerve agents; all seven were approved.

From approximately 1951 to 1974, the Holmesburg Prison in Pennsylvania was the site of extensive dermatological research operations, using prisoners as subjects. Led by Dr. Albert M. Kligman of the University of Pennsylvania, the studies were performed on behalf of Dow Chemical Company, the U.S. Army, and Johnson & Johnson.[109][110][111] In one of the studies, for which Dow Chemical paid Kligman $10,000, Kligman injected dioxin — a highly toxic, carcinogenic compound which is found in Agent Orange, which Dow was manufacturing for use in Vietnam at the time — into 70 prisoners.

MKUltra

In 1953, the CIA placed several of its interrogation and mind-control programs under the direction of a single program, known by the code name MKULTRA, after CIA director Allen Dulles complained about not having enough "human guinea pigs to try these extraordinary techniques".[130] The MKULTRA project was under the direct command of Dr. Sidney Gottlieb of the Technical Services Division.[130] The project received over $25 million, and involved hundreds of experiments on human subjects at eighty different institutions.

More than 50 mentally disabled children, ages 5 to 10, under the care of Dr. Saul Krugman, a respected pediatrician from New York who wanted to determine if there were multiple strains of hepatitis and whether a vaccine could be created to protect against the disease. Krugman and his partner, Dr. Joan Giles, used the Willowbrook residents to test a preliminary vaccine for this disease that had killed millions worldwide. From 1955 to 1970, the children were injected with the virus itself or made to drink chocolate milk mixed with feces from other infected children in order to study their immunity.

Bonnie McLean I know 4 people this sort of thing has happened to.

Friend’s father very (early 70’s healthy, independent, living alone in the country running equipment, driving into city daily) blacked out and fell after 2nd Mo—na shot. Broken hip, hospitalized several weeks, will never return home. Was placed in assisted living a couple weeks ago. Only 6 weeks from 2nd shot to full blown dementia.

Friend’s mom and dad (late 70’a) are both showing signs of Alzheimer’s/dementia and have begun failing rapidly physically with multiple complications. Headaches, weakness, imbalance, fatigue.

A family member (male 70’s) also developed dementia type symptoms after the shots. He had absolutely no problem with his memory etc prior.

A friend’s 42 year old female friend died less than 24 hours after 2nd Pfiz jab. Shot caused HLH, went into complete organ failure, dead the next afternoon. Single mom of 2 kids.

It’s all so devastating. I’m sorry to hear your story as well. Sending our best wishes to you!

If you’re open to treating inflammation naturally there is some good information on Dr. Livinggood’s site and page. Turmeric is a great anti inflammatory but you need to pair it with black pepper. So you can’t take just straight up turmeric or you won’t absorb it. “Turmeric and black pepper each have health benefits, due to the compounds curcumin and piperine.

“As piperine enhances curcumin absorption in the body by up to 2,000%, combining the spices magnifies their effects.”

Bonnie McLean Omgosh this is exactly what happened to my Mother! And she hasn't regained it all back!
Heather Degn Allison
Pat Clark Sz this happened to my mother as well! The swelling in my moms hands and her memory loss has forced her to retire early!

Katieleigh Rooney
Erinn Nolan

Heather Degn Allison
Diane Brown Amend There are soooooo many! On my moms way home from getting vaccinated she randomly stopped at a restaurant and sat in the parking lot from noon until 8pm! She had no clue why she was there, where her keys were (they were in the ignition) how to use her phone etc. Finally at 8pm an employee at the restaurant (who noticed my mom had been sitting in her car all day) came out to check on my mom. My mom was completely confused on what was going on and was taken to the hospital. They tested her for a stroke but that came back negative. She was hospitalized for 4 days. All the tests that were run came back ok except they say my mom suffered a rare kind of heart attack The hospital refused to believe that this had anything to do with the fact that my mom was vaccinated an hour before these symptoms appeared! Now they say my mom has early signs of dementia and gout! My mother was fine before she was vaccinated! This is the same story with too many people I personally know! Now my mom will stop mid sentence completely forgetting that she was even talking! Early dementia my a**! This is a direct result of that toxic vaccine my mom felt pressure to get!

Kimberly Yerex
Sarah Young Bowman
Wow....for a few weeks after I had a terrific time finding words I wanted to use! I seriously thought I had dementia. Didn’t bother with the second shot!

Heather Degn Allison that makes me so sad to hear. I’m so sorry for your experience. It is absolutely criminal, what happened to your mom. It should absolutely make the medical professionals sit up and take notice. It should be reported as a vaccine reaction. I feel furious and sad for you.

David Brooker
Friends wife is the same way after her 2nd jab She was always very outgoing and very smart. Know she can’t remember who anyone is
Kelvin Rosario
Who is working on this story!? Really sick of this narrative that the Mrna Gene therapy is the only answer. It's not a vaccine just because you change the definition of vaccine to fit the narrative. That's actually called lying. Pluto is not a planet (because they changed the definition of a planet from what mankind has known for 1000 years)... Climate change isn't a natural cycle of the earth (the melting of the ice caps marked the end of the ice age long before pollution and its still going)... People are really getting sick of this BS and manipulation.

Leah Prairie Leah, you gotta look at from the big pharma’s perspective, we have ivermectin at two cents a tablet, great safety record and in many clinical trials has produced very encouraging results both has a preventative and has a treatment but we don’t make any money from it. On the other hand we have remdesivir, terrible safety record, does very little in preventing deaths but the really good news is….we sell it for $3,000 a shot!!

Justin Barclay Having just lost my husband to Covid, I would encourage everyone to research the protocol used by hospitals in your state for treating Covid patients. You won't be there to observe the treatment, to offer strength to your loved one, to object to certain procedures or meds. If the hospital is following CDC Protocol, that's it! When protocol is complete, there's nothing else the doctors will try. You don't suggest anything else! Please think twice before admitting your loved one to the hospital and walking away. Why are we not talking about PREVENTIVE CARE, I'm offering halotherapy out of my office as a stand alone treatment or a treatment add on with massages...was doing this PRE- Covid to help with the "Clovis Crud" issues...Might add I've been full on exposed 3 times and not once have gotten Covid! Salt is cheap! A halo micronized particle treatment is way less than a hospital stay and allows the particles to get deep in lungs creating a inhospitable environment for viruses AND thins mucus! We have known for centuries the benefits to the lungs that micronized salt particles give, since Russian salt miners NEVER got viruses and respiratory issues...but they won't talk about THAT! 575-693-2838. If post covid and NEGATIVE, set up an appt today and change lung potential for getting viruses, pneumonia, etc. Great for asthma and COPD, cystic fibrosis also, in certain cases.

Paul Stevens
Michael Anderson They will try. But keep in mind, they twist the term "Unvaccinated" around to suit them, depending on the context that they use it. I found them indicating "Unvaccinated" people in a chart, but they failed to disclose that they meant "People who had 1 shot" and it didn't include the people who were free of ANY covid-vax, because they simply have no idea how many of them / us there are. It's deceitful and outright criminal what they're doing.

Susan Sander Ruff
Emily Rice very sorry for your loss
Amy Tyler Stewart

Paul Stevens According to the U.S. Centers for Disease Control and Prevention, you’re not counted as fully vaccinated until a full 14 days have passed since your second injection in the case of Pfizer or Moderna, or 14 days after your first dose of Janssen, despite the fact that over 80% of deaths after the vaccines occur in this window. How convenient Anyone who dies within the first 14 days post-injection is counted as an unvaccinated death. Not only does this inaccurately inflate the unvaccinated death toll, but it also hides the real dangers of the COVID shots, as the vast majority of deaths from these shots occur within the first two weeks

The CDC also has two different sets of testing guidelines — one for vaccinated patients and another for the unvaccinated. If you’re unvaccinated, CDC guidance says to use a cycle threshold (CT) of 40, known to result in false positives. If you’re vaccinated, they recommend using a CT of 28 or less, which minimizes the risk of false positives

The CDC also hides vaccine failures and props up the “pandemic of the unvaccinated” narrative by only counting breakthrough cases that result in hospitalization or death

Hospitals are still also reporting non-COVID related illnesses as COVID-19

Barb McKinley

Laura Brown so very sorry for your loss. May God Bless you

Zanyé Hatfield

Stacy Lyons Less than 1 percent. What I’m not okay with is people dying from a preventable disease (665,000). And I’m frustrated that we literally have a cure but not using it when other countries are begging for it.

Dan Beard

Zanyé Hatfield bill gates owns the CDC literally. His father was a huge advocate for population control and gave seminars on it regularly. His son bill took up where his father left off and began pumping money into experimental shots and pushing them heavily in africa. After killing and crippling thousands he and his shots were ran out. He has done the same in India and other countries.

Zanyé Hatfield

Dan Beard I trust science and studies. I do my best to look at multiple sources. Questioning things is fine but if everything is a conspiracy then nothing gets done.

Mark Teymer "Most individuals with cerebral palsy are born with it (85-90%), but those that acquire it in early childhood typically get it from head injury, environmental factors, and infections. The age for acquiring cerebral palsy after birth tends to vary, but most research papers will define it no later than 5 years old." Only 12 yo and up can get the vaccine. Do you have any references?

VAERS accepts reports of adverse events and reactions that occur following vaccination. Healthcare providers, vaccine manufacturers, and the public can submit reports to the system. While very important in monitoring vaccine safety, VAERS reports alone cannot be used to determine if a vaccine caused or contributed to an adverse event or illness. The reports may contain information that is incomplete, inaccurate, coincidental, or unverifiable. In large part, reports to VAERS are voluntary, which means they are subject to biases. This creates specific limitations on how the data can be used scientifically. Data from VAERS reports should always be interpreted with these limitations in mind.

The strengths of VAERS are that it is national in scope and can quickly provide an early warning of a safety problem with a vaccine. As part of CDC and FDA’s multi-system approach to post-licensure vaccine safety monitoring, VAERS is designed to rapidly detect unusual or unexpected patterns of adverse events, also known as “safety signals.” If a safety signal is found in VAERS, further studies can be done in safety systems such as the CDC’s Vaccine Safety Datalink (VSD) or the Clinical Immunization Safety Assessment (CISA) project. These systems do not have the same scientific limitations as VAERS, and can better assess health risks and possible connections between adverse events and a vaccine.

Key considerations and limitations of VAERS data:

Vaccine providers are encouraged to report any clinically significant health problem following vaccination to VAERS, whether or not they believe the vaccine was the cause. Reports may include incomplete, inaccurate, coincidental and unverified information. The number of reports alone cannot be interpreted or used to reach conclusions about the existence, severity, frequency, or rates of problems associated with vaccines. VAERS data is limited to vaccine adverse event reports received between 1990 and the most recent date for which data are available. VAERS data do not represent all known safety information for a vaccine and should be interpreted in the context of other scientific information. VAERS data available to the public include only the initial report data to VAERS. Updated data which contains data from medical records and corrections reported during follow up are used by the government for analysis. However, for numerous reasons including data consistency, these amended data are not available to the public.

What this means is that if a doctor has a patient who died immediately post vaccination, if it is because they are old and sick or because they had a sudden heart attack, that death is reported to Vaers. The number of deaths is not outside of what you would expect for the number of people-half our population. Then people (not you people, obviously) look at those deaths and adverse reactions to see if there are patterns that indicate a problem. They found three deaths of young women from blood clots that they attributed to one of the vaccines. They found cardiomyopathy (very rarely) in young men-and they recovered from it. This is nowhere near the number of deaths from the illness, or even the long term effects from the illness. Vaers doesn't mean what you think it means.

Robin Black and it is a known fact that if they had used outpatient therapy rather than just stepping a ventilator down everyone's throat that got sick with this they would have lost in the United States less than 50,000 people it would have been out of 650,600,000 people would have survived. But they stopped the use of the inexpensive medication that cures it.

Darlene CA and it is been stated by many well known doctors that VAERS only reports 1% of all the adverse effects that are happening. But just with the numbers that they're showing there's never been this many deaths as a result of a vaccine in our nation's history. They have shut them down first.

What is the protocol now for when a covid patient is in stage 1?
When our family got it last year we were sent home...they monitored us with a phone call.
I started Dr. Zelenko’s protocols with the suggested supplements and fortunately we never reached the advanced stages.
Why do they not allow HCQ and Ivermectin for stage 1?
There are medical studies showing they’re most effective in stage 1.
The claims on HCQ side effects seemed to apply to people using it for long term use not short term.
Possible side effects from Remdesivir on the other hand, looks more concerning than these medicines.

Marie Maynard remdesivir doesn't work. My dad was vaxed and died two weeks ago. When Rem.. ran out they did nothing more for my father. He died 6 days later. They sent my dad home on monday when he first went in. On Thursday he was so bad off his friend compromised her health, picked my dad up at 4 am and took him back to the hospital, he died 10 days later. They didnt give my father immune boosting supplements, nothing. I had to beg for them to put him on high doses of Vitamin D, Zinc and micro-dose Vitamin C. They only gave him 2000 btu D a day after I begged, they gave him 150 mg zinc and didnt micro dose C. I begged them to try Ivermectin or anything! The Dr said she had to consult the pulmonologist. They didnt start any other potentially life saving meds. They left my father scared, suffering and he died. He vaccinated like he was told. He wore masks like they said. I wish he would have listened to me. The money making vaccine gave my father a false sense of security. He died.

Lisa Porthan Carson

Kathy Slone I have a friend who was 42, prime of health, fit, owned a dojo, 2 healthy kids and a wife… few days after the shot, collapsed and was brain dead within hours… want that story .. doc said he threw a clot lodged in his brain and had some cardiac myopathy- sound familiar? I'll take a horse gel over that...

Chad Kozloski

Adam Lee Marcus I do. cause I

Kari Daly

Amy Jade English they just don't want to hear that. Correlation does not equal causation but that isn't something they understand. This country is wild.

Rachel Cressy-Kent

Adam Lee Marcus the media won't post that side- unless they are paid to do so… everything is propaganda when it comes to politics and media.

Seth Burkholder

Sara Keltner Ellis this administration had a giant failure with messaging. The science is clear though. Even though they aren't as reckless as the last administration, they still involve politics in their decisions rather than just the good of the people. The are the ones that believe everything but the science

Brian Lawrence

Adam Lee Marcus yes we do. Share share share! People need to hear the truth and wake up. The jab was not created to help with the virus. The virus was created to get people to take this experimental poison. The media is an enemy of the people! Thanks in advance.

Richard Qualey McCracken
Adam Lee Marcus like how many people do you know that died from the “vaccine”

I know none personally. I personally know 3 that have died from covid.

So my personal experience is way different

Sara Keltner Ellis
Seth Burkholder the science is clear as mud … depending on who the “experts” are.

The so-called C vax is dangerous. It does not save anyone from C. It does more harm than good. That is not a vaccine.

Julie Marie
James C. Patterson the problem is when there’s many millions that’s a higher chance, but let’s not let one life go unexplained let alone several hundreds of thousands.

Colleen Young Higgs
Ellen Kraft right??! Unfortunately they get the same

Exactly story and you could

Watch the news in CA snd it’s the same as in VA! Weird??! Bahahahahaaaaa. I’m surprised people

Still watch the “news”
In the USA, we administer 1M COVID Vaccinations Daily. For such a large number of people, we will expect a large number of UNREALTED adverse events to normally happen within any two week period.

The following numbers are the expected number of adverse events within 2 weeks, based on normal rates (I'm using 2019 statistics)

- 129,000 will die
- 69,000 will suffer a heart attack
- 37,000 will die from a heart attack
- 36,000 will suffer a stroke
- 187,000 will become pregnant (yes the shot causes pregnancy too)
- 38,000 will lose a pregnancy

Lesson: We expect to see lots and lots of anecdotal stories that may seem to be compelling evidence that vaccines are not safe, even if they are perfectly safe. Also remember that J&J put a pause on their vaccine for only 28 clotting cases (3 fatal).
Shane Raymer
Adam Lee Marcus doubt it.

Tracy Stapleton-Lutkins
Robin Bailey how does the shot cause pregnancy?!

Sabrina Medynski
Adam Lee Marcus well lets hear it.

Albert Sutlick
Adam Strother that is indeed the $64,000 question. It may take years to sort that out to an extent. Technically, a lot of the people are dying of pneumonia, but except for the covid virus, only a few would have been expected to get pneumonia. Same for a lot of other illnesses. I think some of our "experts", and certainly the media, have done a very poor job of explaining just how something like covid can trigger other, more life threatening, illnesses.

Janie Juliette Lowry
Mark Hight exactly! If there’s a treatment, no authorization for a vaccine. Why do you think they threw 350+ doctors off the steps in Washington? Shame on them for finding something that would save lives!

On December 18, 2020, the U.S. Food and Drug Administration issued an emergency use authorization (EUA) for the second vaccine for the prevention of coronavirus disease 2019 (COVID-19) caused by severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2). On June 25, 2021, the FDA revised the patient and provider fact sheets regarding the suggested increased risks of myocarditis (inflammation of the heart muscle) and pericarditis (inflammation of the tissue surrounding the heart) following vaccination. The emergency use authorization allows the Moderna COVID-19 Vaccine to be distributed in the U.S for use in individuals 18 years of age and older.

SIDE EFFECTS OF THE PFIZER VACCINES...

On December 11, 2020, the U.S. Food and Drug Administration issued the first emergency use authorization (EUA) for a vaccine for the prevention of coronavirus disease 2019 (COVID-19) caused by severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) in individuals 16 years of age and older. On May 10, 2021, the FDA expanded the emergency use authorization for the Pfizer-BioNTech COVID-19 Vaccine to include adolescents 12 through 15 years of age. On June 25, 2021, the FDA revised the patient and provider fact sheets regarding the suggested increased RISKS OF MYOCARDITIS (INFLAMATION OF THE HEART MUSCLE) AND PERICARDITIS (INFLAMMATION OF THE TISSUE SURROUNDING THE HEART) following vaccination. The emergency use authorization allows the Pfizer-BioNTech COVID-19 Vaccine to be distributed in the U.S.

Amy Jenna Thompson I'm sorry that's horrible. Prayers to you and your family. I was admitted to ICU after 9 days of 102 temp and dry heaving and my O2 dropped to 82-85, and told I was in respiratory failure, I had pneumonia in both lungs, hypoxia, and sepsis. I was given Remdesivir right after admit before they took me up to my ICU room and I already started feeling better. My temperature had dropped. I stayed in the hospital 4 days in ICU on Remdesivir and doxycycline with injections of anticoagulant medication in my stomach each day. I had to sleep on my stomach, which helped greatly. And was given musinex. No antibiotics, no vaccination. And I had underlying conditions. I am considered obese and have managed high BP, fibromyalgia, hashimotos thyroiditis, parasthesia,large fiber neuropathy without diabetes, IBS-C, acid reflux, and PCOS, and migraines. I was sent home after 4 days on only O2 at 2and am off completely now it's 3 months later, I was given musinex I stayed on a month, and given 6 more days of doxycycline. I slept on my stomach and still try to. I have read so many success stories in a long covid recovering group I'm in and some that weren't but more positive than not. I hope you know your not alone. Steve Howard actually, over 400k had severe vax responses, and over 12k died. In America alone, according to VAERS, before they started messing with the numbers. Only about 1% get reported to VAERS so you can bet the number is much higher. And deaths/hospitalizations for vaxed are being counted as UNVAXED if they are within 2 weeks of having the 2nd jab. Guess how soon after the vax people are having issues? Within days.

Tracy Stapleton-Lutkins my personal freedom is exactly that FREEDOM. WE LIVE IN A FREE COUNTRY ! Right?! If I choose to not get me or my kids vaccinated, that is my CHOICE! You can say we're selfish and irresponsible, well so is me putting an unknown vaccine with risks into me and my kids body. I don't care what the news says about it being safe. I don't know what's in it so it's not safe for me. We're healthy; no preexisting conditions. Why would I want to risk putting something unknown into my kids that could potentially make them sick? To each their own. It clearly doesn't help everyone. I'm not judging you for getting the vaccine, that's your choice. But my choice is mine. Its actually a disgusting trait to have and people shouldn't be accused of being "selfish and irresponsible" because someone doesn't agree with you.

Latasha Skouby I know! Somehow on the posts are never from people who actually experienced the negative events! Not that we don’t believe some happened, but it seems odd it’s never from those who had bad reactions. I do belong to sites where actual vaccine recipients post their bad after-effects themselves and I definitely believe them! I know dozens of family and friends of all ages from teens to my 98 year old dad who did fine other than the expected couple days feeling tired, arm pain, flu-like s/e. My adult kids do know quite a few co-workers and others they know who have died from Covid itself.

Nina Smith Lenartz He asked if I want the stories...

Rachel Franzen

Go ahead and cite the deaths. Adverse reaction reporting includes anytime death follows a vaccine. So if I get hit by a bus after I get the vaccine I’ll be reported on adverse event index.

But in terms of actual confirmed vaccine-caused death, that’s a number that is very small.

But please cite the confirmed vaccine-caused deaths

Marvin Cruz

James C. Patterson But with Covid it was one death is too many. But if someone dies from the vax its not so bad. Why can’t that be applied to the vax?

Teri Christman well... if you scroll through the comment section you can read them yourself and contact the individuals commenting and you'll get your firsthand information.

Rachel Franzen think u need to look at yellow card scheme where 1000s of deaths have been reported but that info not shared very well cos they don’t want people knowing and I personally know 4 people who have had vax and 2 been hospitalised 2 suffering home and 1 had 1 vax and was in hospital and told under no circumstances to take the second vax!

Jessica Adams
Kelli 'Baggett' Wildman Incase you haven't noticed, the people who are not vaccinated are the ones dying in droves. Including so many individuals who beat that drum of no vaccine for them! … right up til they got Covid and DIED you idiot.

Teri Christman
Hailey Ludlow Um news stories generally include that kind of information. I personally know plenty of people that have died of Covid. But I have not heard of anyone that has died from the vaccine. So yeah I would like to follow up with that information.

Rachel Franzen It seems as though you live in a bubble. You trust the science? Ok. What about young men (teens) developing pericarditis and/or myocarditis shortly after receiving the vaccine? What about a study taking place right now involving women having more intense menstrual periods shortly after having the vaccine? I work in retail and I’ve had at least 4 different people on different occasions tell me that they’re attending funerals because someone they knew died shortly after getting the vaccine. Science is to be hypothesized and tested. What the government is doing is hypothesizing, testing and realizing that it isn’t working, but they won’t ever admit it. On a moral level, while referring to the Nuremberg code which had been written shortly after ww2, is completely absurd. Do your research and wonder why, for any reason(s), they would not want the truth to be told. Do you remember the news article that came out in 2009 with Bill Gates. The title was “ Depopulation through forced vaccination”? You might not since you’re only 12.

Sadly we see that third or forth person story and we all know how facts travel downstream- maybe why the news posting is asking for stories of your loved ones. Shane Haston I know 5 people I work with that had the shots and then came down with covid, so people are getting the shot and thinking there cured, that rt there is causing death.

Denise Daugherty Smallwood
Shane Haston here’s a video with people from different states who are suffering from side effects from the vaccine (most were part of the trials) & they manufacturers won’t recognize that they are having issues, nor have they helped them pay for the medical bills acquired by trying to get help. Furthermore, the docs that are helping & recognize that they are suffering from side effects don’t know how to treat because they have never seen these side effects from another vaccine.

Senator Johnson, families speak: COVID...
Heather Barto

Diane McAllister the media isn't going to tell you that. A friend of my son's works in icu and 75% of the people in the icu are fully vaccinated. Brianna Hilson

Rachel Franzen Have you heard of vaers? It stands for vaccine adverse event reporting system.

Teri Christman

Keely Love I was talking long-term as in longer than a day or two of feeling icky after receiving your vaccine. But it has been many months so long-term issues would have started showing up by now. I mean 5.76 billion doses have been given. We would certainly hear if there was a major issue.

Cora Bentley

Rachel Franzen I don't know where you're getting your information, but you might want to consider finding a better source.

VAERS data released Friday 9/7/21 by the CDC showed a total of 650,077 reports of adverse events from all age groups following COVID vaccines, including 13,911 deaths and 85,971 serious injuries between Dec. 14, 2020 and Aug. 27, 2021.

Robin Bailey
Lani Rose In the USA, we administer 1M COVID Vaccinations Daily. For such a large number of people, we will expect a large number of UNREALTED adverse events to normally happen within any two-week period.
The following numbers are the expected number of adverse events within 2 weeks, based on normal rates (I'm using 2019 statistics)
129,000 will die
69,000 will suffer a heart attack
37,000 will die from a heart attack
36,000 will suffer a stroke
187,000 will become pregnant (yes the shot causes pregnancy too)
38,000 will lose a pregnancy
Lesson: We expect to see lots and lots of anecdotal stories that may seem to be compelling evidence that vaccines are not safe, even if they are perfectly safe.
Also remember that J&J put a pause on their vaccine for only 28 clotting cases (3 fatal).

UNRELATED, YOU SAY? No way!! That is utterly absurd!! That's 496,000 people out of 1 million - a whopping 49.6%. UNRELATED?? WITHIN 2 WEEKS AND UNRELATED?????? ?!!!!!

Carie Anderson  
Adam Lee Marcus we have a friend who after getting the vaccine so she could see her grandbaby, while visiting, ended up in the hospital in a coma. They have said it’s from the vaccine. That her body rejected it. The family was told that she will not come out of the coma. They have to make a very painful decision.

Pamela Zero  
Emma Love right? A few thousand people at my hospital got vaccinated, not one person died or had anything other than an immune response.

Jennifer Stallman  
Ryan James Sanville I do, but he was over weight and had heart conditions. But since his work was forcing him to be vaccinated or lose his job. He did it, first shot was fine. 3 days after second shot he ended up in the hospital and died three weeks later. So yeah, people die after the COVID shot. The also die from COVID. An some die from crossing the street or in accidents. It should be a persons choice to get vaccinated based off their own comfort level after checking all side affects and how ones current health could play a role. Real hard to do that when at first, your own doctor wasn’t allowed to administer the shot.

Heather Barto  
Kevin Hartman you're hilarious . Then why are these people dying within 2 weeks of the vaccine? And why won't they release the autopsy reports? And why are there Dr and nurses refusing the vaccine? Because they're seeing first hand what the vaccine does. I wish I was being paid.

Pete Audlee  
Michelle Thomas I had covid, as did my pregnant gf, and 3 of my cousins. Also a childhood friend who has the worst asthma I can remember seeing. We were all fine. My gf thought it was seasonal allergies. I thought it was a hangover. No big deal

Michelle Thomas using that logic it’s sad to say he would have passed away with or without the vaccine. As the vaccine does not stop transmission only the severity of the effects of the virus. Carie Anderson

Dale McDonough I’m saying I know people who have had complications from getting the vaccine. It’s everyone’s choice if they want to get it or not. Just like it’s a choice to get the flu shot. What I know is, that drugs are tested usually 7-10 years with test groups. And usually it’s in house and 2 outside to see if they get the same results. Which is why most drugs are so expensive when they first hit the market. They know side effects based on these test groups. That’s why insurance companies do not cover experimental drugs for cancer patients. It’s also why you sign a waiver stating you won’t sue if something happens after getting the vaccine. Their story is true. And they are not the only ones I know who have had medical issues since getting the vaccine. They have done tests, I am not disagreeing that. But, look at all the drugs that companies do get sued over years later for side effects that happened that were not listed but later found out. The Chicken Pox vaccine was in the market, then off the market because it was reworked due to some of the ingredients and side effects, then re-released to the market. While they are a majority who have gotten the vaccine and not had any issues since getting it, and that’s great, they need to acknowledge that there can and already are side effects that were not expected. I just know, for me, and for my kids, I want it tested more. I do not want to have to go sign a waiver that says I won’t sue if it causes something or creates fertility issues. I am willing to wear a mask, take my vitamins, and get deliveries (which I did before Covid-19 because it made my life easier) and take extra precautions. I’m not saying we are hermits, but, we don’t take extra risks.

Jeremy Rogers

Verónica Palma every vaccine has a chance to kill you. The flu vaccine has a higher chance than others because it changes so often. This is the reason many were waiting for fda approval. If you receive a vaccine that's non fda approved you get nothing, can't sue vaccine makers in the US. If it's fda approved your family has access to the federal fund.

Julie Pichette unfortunately I don’t believe most people. And most who are not vaccinated laugh at people who have family who have died of covid or who have disabilities because of covid. How many times have you heard “what underlying issues did they have”. My FIL had issues with his breathing because he was hospitalized with covid for 2 weeks and I have had people who don’t care about that. I am sorry for you.
After the vaccines were available to everyone, information. We may reach out for a story we're working on.

Sorry for your loss and yes those stories need told. I heard a doctor say, “people who vaccinate are ticking time bombs”

Dom Pang

Dawn Dorsey Bruce
Julie Pichette My dad was in the hospital with Covid when (after he was no longer contagious) he got a roommate who had just had his first shot and had a heart attack. Dr told him not to get the next one. Also a church member after first shot had stroke like symptoms...lost ability to walk and talk (it was temporary) but no stroke was evident. He was told not to get the second shot. Sister in law's uncle died after vaccine...no underlying health conditions. I am not anti-vax, but I would like to see everything presented equally, good and bad.

Jennifer Palmer Winkelpleck
Julie Pichette so sorry! And he won't get any assistance from the government because of that vaccine that disabled him and caused all these medical bills and pain!

*Callie Calhoun* found the tweet. This “Doctor” is one of the white coat fraud brigade. So, it can take up to 14 days for the vaccines full effects to kick in. That’s what part of the article is about. Nothing to back up what she’s saying really. She’s a doctor and doesn’t seem to understand much. She also posted other BS. She participated in storming the Capitol, she an anti vaxer and proud, she says she’s worked places but they do not remember her or have a record of her, she’s spoken at Trump rallies and is a fan, she was sacked from her hospital job… Need I go on? The woman is horrendous as are the other white coat morons. She has no background working on or with vaccines, no scientific background. In her tweets she twists a lot of things around. She’s dangerous because believe her lies and many have died because of her.

Elizabeth Key-Ryan ah yes someone's been watching Tucker Carlson and not understanding how numbers work

Matthew Mohrlock
Kaitlyn Letke that is not too be expected at all, what are you even talking about as if you are talking with any authority on the subject.
There has been MANY nationwide vaccination campaigns in the past. Those numbers make those nationwide rollout minuscule in comparison.... and I'm not talking individually.... I AM TALKING COMBINED. THERE IS MORE DEATH AND ADVERSE REACTIONS IN THE LAST 9 MONTHS THAN IN ALL SHOTS COMBINED SINCE REPORTING BEGAN. COMBINED. DOES THAT WORD NEED TO BE HIGHLIGHTED ANYMORE----- NUMEROUS NATIONWIDE ROLLOUTS--- ALL COMBINED ARE NOWHERE NEAR THE REPORTS FROM THESE SHOTS IN THE LAST 9 MONTHS

Jesse Puckett
Adam Lee Marcus can you share those stories? Because we can't find them anywhere

Kathy Lambert
Adam Lee Marcus I stay away from everyone and get a full bag of all vitamins once a month, never have gotten the flu or this Covid thing. My doctor says she can't see me in person anymore so I got the first shot and got nasty nasty sick. Thanks!!

Valerie Brock
Adam Lee Marcus those stories will never see the light of day. No one will admit vaccine can be dangerous
Matthew Mohrlock

Michael Hodgendo the numbers work how they work. Let alone the studies on their under reporting.
What are you trying to say a billion dollar system is useless??
These reports have already gone to change the warnings with moderna for heart attacks due to myocarditis. ---because so many people were dying--- and they were giving it to people with histories of heart conditions!!!
Superkarla Rose
AmyJade English That is not a respectfull comment, how can you know and write something like that to a family member that has suffered such a loss.

One of the ingredients in the wag is potassium chloride, which is also one of the ingredients in the execution injections.

Every FDA approved vaccine which has 25 deaths must be pulled, that is why they are keeping these "vaccines' as experimental because there are now over 9,000 deaths reported in Vaers from this "vaccine" and if FDA approved, it would be pulled immediately.

Lori L Lombardi don’t be heartless. A death if due to vax or covid is a death and we must stay united in these sorrow times. The difference that is raised between the deaths is the age bracket and the state of health of individual. That's were we're the conversation starts. If the doctor is convinced that the cause of death was the vaccination then they should be able to back it up with evidence. In fact, as a medical practitioner, it would be morally bankrupt of him not to declare this evidence for the reasons that many are claiming here - that vaccines are harmful and the risks outweigh the benefits. So where is the evidence and the public record proving that these 3 people died from the vaccine? I certainly would like to know.

In Australia, if someone dies, they blame it on Covid to scare people into getting the vaccine, if they die after getting the vaccine they blame it on how they died, ie heart failure, kidney failure, or the their magic word,"underlying health conditions" they wont believe it was the vaccine, when we say,"they were perfectly healthy and suddenly they are dead," Just like they refused to believe me when I said, My baby was perfectly normal, walking , talking, playing like any normal baby would at 18mths and then after the his vaccine, the triple antigen, his eyes rolled back in his head, then one went crossed eyed, he could not walk, he started to have seizures, he couldnt talk, he wouldnt eat, now he needs 24/7 care, his brain is full time in seizure, this is just a snippit of the 50 or more conditions he now has, not to mention the hell we have been through as a family with 3 other boys as well, oh no it could not have been the vaccine they say, we have even been told by school teachers that it was bad parenting, oh no it cant be the vaccine they say, Im happy to let my immune system do what it was designed to do.

Susan Whalen Hughes  
**Deborah Cullers Brosius**  [Link](https://thelibertyloft.com/2021/08/29/west-virginia-sees-25-increase-in-deaths-of-fully-vaccinated/)

Alyssa Dee Spellman  
**Dom Pang**  There you go, this is exactly the problem. People don't know what's going on. Tests are so wrong all the time no one knows what is going on! The only test worth taking is the antibodies test. But not many people take that. Aren't the tests about to be recalled? So how do we even know if anyone has covid or not. Most of the people who have gotten the vaccine already supposedly had covid so how can the numbers really be accurate with anything. The 20% of vaccinated covid patients in the hospitals; are those patients who've never had covid?

The vaccinated that have stayed out of the hospital, is that because they've already had COVID and have those antibodies? and that's why the numbers look good for vaccinated people? So many variables. I don't care who has or gets the shot. Idc. But leave the vaccinated alone and stop trying to make us feel guilty and stupid and trying to present us with “facts” because we have our own too and we simply decide not to get it. End of conversation.

Iulia Cluj

Katie Tate the problem with a mandate is that even those of us who live incredibly clean healthy lives will eventually be forced to accept a foreign substance into our bodies. A foreign substance that can never be removed. I worked very hard for several years to remove chemicals, cleaners, fragrances, preservatives, etc, from my home and person because I had debilitating allergies. Now that my immune system is strong, I am not willing to take a chance on triggering those allergies again.

Allie Twyman so a lot people take these high numbers (26%, 21%, 25%) and run with it instead of seeing the whole picture. Yes there may be an increase in vaccinated people also getting Covid (there is a more contagious variant: Delta) but that doesn't show us the whole picture. Of all the hospitalizations a much smaller percentage of them happen to be vaccinated. While the others are not. This is from the office of WV Governor's website:

Deborah Stanton, I'm so so sorry for what you're going through. You're living every parent's nightmare. Thank you for sharing your story amid what you're going through.
Cheryl Low-McCarty
Adam Lee Marcus me too!! Or have heart problems and a life expectancy of only 5 years

Kitty Jane
Anne Gianfagna Edwards yet the narrative you believe says “just one life lost by Covid is too many”

Heather Stratton
Mary Hock Webb, that's ridiculous. VAERS reports events, but does not address causation. I know 4 people personally who have died of Covid, one after the vaccine was available. But to be clear, I respect all opinions, but comparing the vaccine to the gas chamber is hardly a convincing argument. As my doctor said “we have a hospital full of dying Covid patients. Do you know what we don’t have? A single patient dying from the Covid vaccine.” I trust my doctors much more than YouTube research.

Kitty Jane
Anne Gianfagna Edwards yet the narrative you believe says “just one life lost by Covid is too many”

Kim Friedman
Adam Lee Marcus my precious Aunt did 18 hrs after getting 1st dose. Perfectly healthy. Was told by the county hospital where she lived, to have an x-ray from a fall, she had to be vaccinated. Would not let her husband even inside to see her

Barbara Kawalerski  
**Adam Lee Marcus** the media wont televise that...the truth what really happens after the COVID VACCINE. The news makes me sick! Pit us people on it!
Mary Hock Webb: This isn't a vaccine in the true sense of the word because there's no covid in it because nobody's been able to isolate the covid virus in a laboratory, and the inventor of the PCR test used to determine the presence of covid stated categorically, on video, that this procedure isn't suitable for testing for viruses. Not only that but this toxic injection, apart from human baby fetus and other horrors, has graphene oxide in it which in itself is poison, but it also creates an electromagnetic field, which, when triggered by a positive current, 5G, destroy everything in its path, particularly its human host... maybe do some research... and find out what your close acquaintances really died of.

Anne Gianfagna Edwards: I assume you voted for Biden.

Lance Creviston: I know six that were hospitalized from the vaccine and 2 died from the vaccine. No one that I know died from the virus.

Deborah Stanton: Your 18 month old got the vaccine?

Lance Creviston: I know six that were hospitalized from the vaccine and 2 died from the vaccine. No one that I know died from the virus.

Deborah Stanton: Your 18 month old got the vaccine?

Lynn Harris: 13,000 reports of adverse effects. Not death. Out of 200 million shots administered.

Adam Lee Marcus: My dad was fully vaccinated and died of Covid June 14, 2021.

Christina Miller I can give you mine Monday after I sit down with the ongologist. Having biopsy tomorrow. Absolutely healthy, strong as an ox. Got the first Pfizer jab in June and over 3 months, went from being 54 to a crumbling senior who probably has cancer. I felt effects beginning 2 days after the shot.

Kathy Sanders
Lance Creviston My experience is the polar opposite. We know of no one dying from the vaccines, but plenty from covid.

Darrell Prince
Susan Whalen Hughes 26% increase in positive cases amongst vaccinated people, which means if there were in one month 100 out of 200000 amongst vaccinated people and then there were 26 more, that would

From A Vaccinated person! His advice to the vaccinated.....

Michelle Castagnini

Erin Ciokiewicz

Anne, what an awful thing to say to someone! He voiced that he knew people who died from it. Are we so far gone into socialism that a person can't verbalize their own life's experiences? Who are you to tell somebody that they're ignorant for sharing an experience of losing a loved one? You should be extremely ashamed of yourself for being one of the many reasons people don't trust this vaccine, the current administration, everything being shoved down their throat's right now! Silencing peoples experiences that don't fit a specific agenda or narrative is the exact reason why people don't trust what's happening. ALL of the experiences should be shared. If we want people to trust this and move forward, transparency is key. Allow people to make their own educated decisions. Medical autonomy is all they're asking for. When our president makes statements like, “it's not about your personal choice or freedom” when speaking about a vaccine on the same exact day that the vice president make statements like, “When people are able to make choices without government interference for themselves — in terms of their wellbeing and the wellbeing of their family, in consultation with whomever they may choose — we are a stronger society.” In reference to abortion... Again it makes it very hard to trust what's being forced upon people. You get to make your choice, allow others to make theirs. You don't want people to judge you on yours, don't touch them. The golden rule is a very valuable tool to have in your toolbox.

Meg Zudycki

Kim Friedman this makes no sense
Veronica Buzzanca

Meg Zudycki that's a funny question "why didn't this make the news"... Because it didn't fit their narrative!!!

I have a friend that lost 2 family members within two days of getting the first shot. I have another friend who got a blood clot and I have another friend who got the first shot and could not sleep for two weeks and the doctors still managed to talk her into getting the second and she proceeded to get dizzy spells so bad that she ended up falling nearly breaking her arm and badly hitting her head. Lots of the world are depleatwd in vitamins and minerals. But randomly taking supliment and vitamin can be bad if your not deficient in a certain vitamin.we need to get them check d same with gut bacteria good and bad or we don’t know how much and what we lack or have. Hcl is one thing that raises stomach acid to where it should be and eating electric foods like full of antioxidants and alcoluzing foods not acidic processed food. Dairy encourages viruses and we are the only ones that drink another’s milk. Sugar is what bacteria feed off and gluten may not cause you an intolerance but still sensitivities that mainstream tests test for say celiac and if n varicella gluten could still cause issues. Grains. Lectins and more. Household cleaning products. Skin care and mould in home or work place can be an issue to some. I have mthfr gene mutation and it makes it hard to detox and lots have the gene but the 2 types of variants that get mutated is the issue. Genetics is key to be able to help us put the right stuff in our body and do our part of looking after ourselves the best way we can. So many things some folk are shocked to find they eat or use cause issues which they didn’t realise like lectins as per dr Gundry the renowned cardiologist.books and YouTube.

Jennifer Adkins , I only know personally of 3 people (2 in UK and 1 in USA) who have had Covid and none needed to go to hospital.
I know of several first hand who have had truly awful reactions in the first 24 hours, first week and month after the jab. This has included death in 2 cases, one a local mechanic another a school friend of a friend. Have these deaths been accepted as proven, no. On the Australian Government Theraputic Goods Administration Database Adverse Events Notifications. There are over 500 reported deaths and over 50,000 notifications of issues related to Covid Vaxes. Adam Lee Marcus, if you did your research, which by your comment you did not, you would know that those deaths that were reported "due to the vaccine" were not actually by the vaccine. If anyone dies within 6 months of taking the vaccine, it is reported to the CDC and goes into a database as an adverse reaction. The only true way to find out if that person died as a result of the vaccine is to do an autopsy. Btw, Covid is real! People are dying like crazy! I work at a hospital where our morgue is full, our critical care unit is full of ventilator patients, our PACU is now overflowed with vent patients and our ER is keeping vent patients down there. So, don't speak on something you have ZERO knowledge about!

Why are they not treating them properly? CDC has mandated a protocol that is obviously not working and we all know this first hand. Last time I checked when saving a life you do what ever it takes and you don’t use drugs that kill people. Government (fauci) is banning life saving drugs from the hospital’s. Stephanie Crimm the masks do not help my husband has worked non stop the whole of the lockdowns as a key worker before masks even came in but he’s choice was not to wear one as he needed to breathe fresh air he could not cope with the mask on he used common sense to keep safe took regular testing no covid even when I caught covid he did not catch it our choice is not to use masks but to keep our hygiene top of every thing We see masks discarded in the streets we see people with scruffy masks on we see people eat and use their grubby hands straight after eating to put that mask back over their face we see people cough into those masks and use those same masks time and time again The masks are germ carriers they don’t even fit tight to your face to stop any germs and did you know the germs from covid are so minute they can pass through your tear ducts And the vaccine is not a true vaccine Vaccines work to protect you so you never catch that disease again a vaccine stops you from spreading the disease a vaccine protects you The covid vaccine does not protect you You can still catch spread end up in hospital and die from covid so why they call it a vaccine is a mystery The vaccine is nothing more than a trial booster jab that no one Really knows the side effects properly They don’t know the long term health issues from it but we do know it has caused swelling of the heart it has caused blood clots in a lot of people we do know it has caused a lot of deaths we do know it is still in trials and only ever given emergency use to be distributed to our elderly and infirm to help those who need help like they do every year with the seasonal flu which is also a deadly virus to most of us The masks and the so called vaccine gives people a false sense of security thinking they are safe thinking they are protected when in-fact our hygiene habits would do a lot better to protect you than those masks and jab out together What was it we did in the beginning to keep us safe and our NHS keep safe wash hands keep your space Hands Face Space It worked till these germ ridden masks came in it worked till the trial jab came in Common sense is your best chance of survival with a viral chest infection Stay safe

It cuts down on the likelihood of transmission in the event you are not maintaining social distancing. Vaccines are NOT designed to keep you from getting any virus it is designed to keep you from DYING AND KEEP YOUR SYMPTOMS LESS SEVERE!!! Just like the flu vaccine!!! As far as the deaths you are referring to, unless you have read autopsies on those people, they likely did not die from the vaccine. Do your research!

**Stephanie Crimm** how would an autopsy determine without a shadow of a doubt that it was the vaccine that killed someone? If they die from a heart attack, cause of death is listed as a heart attack. Is it a heart attack brought on by hypertension? Is there a history of it? If not what caused it? Autopsies do not go into that depth. They show what organ failed or what system was compromised, not necessarily what compromised it.

Stephanie Crimm you've done your research? There isn't research available, lady. This is the first mRNA vaccine ever to get any sort of approval. Ever. A completely unique vaccine. It hasn’t been around long enough to give us any real historical data. The CDC and the FDA have been wrong before. Why is it so unthinkable that they’re incorrect? The FDA has approved some AWFUL things in the past. The CDC told us masks were useless in the early days of the pandemic. You’re treating people who’ve watched vaccinated loved ones die like they didn’t see what they saw. There’s 150,000 people on here commenting. A lot of this is anecdotal, sure. But to think that there is no truth in what 150,000 other people have witnessed is pretty ignorant.

Banna, my husband is a paramedic, an ER nurse & a critical care nurse on an ambulance. He takes chemo daily to manage a blood cancer, he is not vaccinated & has not contracted COVID. A co-worker of mine was positive, I have antigens, which means I brought it home & no one else was affected in my house (I was a asymptomatic).

Now we have hospitals forcing employees to get vaccinated or be terminated, when last year they were running them into the ground & calling them heros for being on the front lines. You have trained, educated medical professionals refusing to take the vaccine. People need to sit back & think about why they don't want it. It isn't for s & giggles.

Isn't this calling the kettle black, we were called names for questioning actual Covid deaths yet you are going to question actual deaths caused by the vaccine? Lol!! Isn't this same concept? How many people actually died from Covid without any other health issues? The numbers I would guess are much smaller. And those deaths shouldn't count. It wouldn't with the flu or any other virus, yet here we are. People have been affected by vaccines for a long time, this is nothing new, what is new is releasing a minimally tested vaccine out to how public, and using us a guinea pigs as they co it is to do their research as to efficacy and they will not have real data for years. Meanwhile people are dying and no one wants to think it's the vaccine well because then what.

Rhys Collins

Van Walker Shearer You do understand that they have changed their definitions again and are now labelling anyone who hasn't had the shot in their body for a full two weeks as still being unvaccinated right?

If any adverse reaction, including death, comes within that first two week period it is then considered an 'unvaccinated death' and the numbers are manipulated further.

It is the same for three months after the shot. You are no longer considered vaccinated after that period. That's where the boosters come into play.

Look into it further if you'd like.

On August 26, 2021, the definition of “vaccine” on the CDC website was “a product that stimulates a person’s immune system to produce immunity to a specific disease.” The definition of “vaccination” at that time was “the act of introducing a vaccine into the body to produce immunity to a specific disease.”

As of September 7, the new definition of “vaccine” on the CDC website was changed to “a preparation that is used to stimulate the body’s immune response against diseases.” The new definition of “vaccination” describes “the act of introducing a vaccine into the body to produce protection from a specific disease.”

VAERS Website: There Were 3,296 COVID Vaccine Deaths in US Since July 24 – Or an Average of 70 Deaths per Day

By Jim Hoft
Published September 13, 2020

The VAERS website released its most recent weekly numbers on Thursday, September 9th.

There are now 14,701 reported deaths from the COVID vaccine in the United States, according to the latest numbers.

https://openvaers.com/index.php

There were 11,405 reported deaths from the COVID vaccine in the United States back on July 24th

And this was up from 9,125 reported deaths from the COVID-19 vaccinations total from earlier in the month in July.

The number of deaths linked to the CDC-promoted vaccines this year has absolutely skyrocketed, according to the CDC’s own data.

https://wonder.cdc.gov/vaers.html

The VAERS database contains information on unverified reports of adverse events (illnesses, health problems and/or symptoms) following immunization with USLicensed vaccines.

The CDC government website links to VAERS platform.

In June, VAERS reported 6,985 deaths due to the COVID vaccines.

Then it jumped to 11,405 in July.

And now it is at 14,701 reported deaths.

That is a jump of 3,296 since July 24th.

This comes out to 70 average deaths per day due to the coronavirus vaccine in the last 47 days.

This needs to stop!

Jaimie Marx You do realise that statistically if no one go vaccinated more would die from COVID19 than from the vaccine. Do you want you and your community to have a higher or lower chance of death from the pandemic? If you want higher, then don't get vaccinated. If you want lower, then get vaccinated. Pretty simple.

Laura Regan I've saved these all to my photos . Thx Laura

Sharon Elwell

Christy Kröhne so if people want to take their chances against covid then they can right? I'm used to it and accepting of that, seems others aren't and think they can tell others, for example, not to drive their car!

Christy Kröhne

Sharon Elwell No 4.6 billion got vaccinated. Only a 00.01% had severedide effects. That is life, unfortunately. For most people, it worked out just fine. STOP FEAR-MONGERING!

Michael Scott

Christy Kröhne what actually happens isn't a conspiracy theory, you do know that right? Or is the vax having some effect on your brain function?
After the vaccines were available to everyone, we may reach out for a story we're working on. 

Christy Kröhne Just waiting

Sharon Elwell and if we go there... is it not a small percentage compared to total positive cases that you will die from covid?? You don't want to get covid and take that chance of dying... well I had and know several people with covid and survived. I don't want that small chance of an adverse reaction from the vaccine. We should both get that choice. It shouldn't be mandated.

Christy Kröhne you cant argue with stupid, let them carry on with their tin foil hats

Christy Kröhne so a small percentage of people dying from covid makes a pandemic where we shut down the country, but a small percentage of people who have adverse reactions including death to a vaccine is no big deal? Maybe stop watching the msm and take a look at the grip of people having a multitude of problems. If you want the vax and are ok with the risks then that's your choice you can make, if you rather run the risk of covid then again that's your choice to make. You can still catch and spread covid even with the vax so the only person the outcome changes with is the vaxed person, so why are you so pressed everyone get it and so upset with those who chose not to because they rather take a chance with a 99% survival rate over the unknown short and long term potential side effects.

Christy Kröhne your experience is anecdotal & the truth is, a very small percent of people who get vid die from it, too, so not only do you have no leg of empirical data to stand on, you're also acting like a hypocrite for saying the lives of those who died from the vidjab were marginal, but not those who died from the vid itself.

Christy Kröhne lol only a VERY small percentage of people die from Covid. You do your own research to get those numbers your throwing around right? Or do you just listen to cnn or fox? The cdc retracted their original death toll and admitted the numbers have been wrong since the beginning. The PCR tests are almost guaranteed to produce a + test when at the level they were used at. M.Ds were being bribed to put Covid on the death certificate. Autopsies are very rarely performed during normal circumstances, the past year they've been pretty much unheard of. So that "very small percentage" that you're referring to when trying to tell a bunch of "conspiracy theorist" that their loved ones being MURDERED is no big deal because at least YOU didn't die is sick. You’re what’s wrong with America. I still hope you only got the placebo though. Because the spike protein does in fact keep replicating, they don’t know when or if it stops and it does in fact go to about every organ in your body including your brain. And it’d be really bad if you let them put a piece of HIV In you because it is in fact pieced into the spike protein to "stabilize" it. But what would I know, I just read hours of peer reviewed studies on pubmed. One of if not the most reputable sight(s) for medical journals and research. While you obviously watch the Colbert show or msnbc and the likes

Nick Sagris

Christy Kröhne 4.6 billion dosages is not 4.6 billion vaccinated. Especially when most vaccines are two shots. Even the CDC is admitting that due to rapid deployment of vaccines worldwide severe adverse reactions data is significantly lagging. I'm not an anti-vaxxer but I would appreciate more transparency by the bureaucrats and pharmaceutical companies. Being vaccine hesitant due to some serious concerns is a genuine concern.

Marcus Boothby

Christy Kröhne oh and may I suggest you get antibody treatments along with your “safe” Vaccine. Because the virus is created with HIV like traits causing it to weakening your bodies antibodies, while the virus is able to slip past them, mutate, and become a variant. At least that's my understanding from reading the literature. Variants aren't known to be caused from natural immunity. It's pharmaceuticals that do that. But what do I know I'm not a doctor im just offering advice because while I believe you're a terrible person from your comment, you don't deserve to be murdered to like all these peoples friends and family members were
My neighbor had several strokes after his vaccine and he can't walk anymore. So sad last fourth of July he was so happy. I'll keep that memory of him forever.

**Christy Kröhne** You wouldn't feel it was a "very, very small percentage" if you were in that percentage, but I am and it's really disgusting that you I obviously feel that this "small percentage" is expendable, if it means you're safe. Well, my husband doesn't think I'm expendable, neither do my 6 children or 13 grandchildren..nor my sister with cancer who I go and take care of every day or my other sister who just lost everything that I am now financially taking care of...my brother who I make laugh when he's feeling the pressure of raising a special needs child....I am not expendable, but I'm sure the world would be a better place if we could ditch a few of you self absorbed, narcissistic sycophants....just sayin'

**Christy Kröhne** I personally know (5) folks that had covid weeks after their "vaccines." One is in the hospital in critical condition, the other one ended up in ER being treated for covid a SECOND TIME (he got it a couple of weeks after the Pfizer a 2nd time). The other three are coworkers who also got the Vax. Vaccinated people are shedding the virus, walking contagions. If you want the Vax, that's fine. However don't impose it on someone else and definitely DO NOT MAKE this about the "unvaccinated." We are being lied to and that is a fact. Look at the "side effects" listed on the pfizer insert for the Vacs... Notice how they refer to people as "participants" and "phases" of the study. We are the lab rats. If someone wants to cheerfully roll up their sleeve that's great and their choice, however everyone needs to respect the choices of others who chose otherwise. My body, my choice. Remember?

*Spike Protein Protection Protocol*

For those:

- Who have already been injected with the experimental shot
- Concerned with the #spikeprotein transmission coming off those who’ve been jabbed

- Zinc (30-80mg per day)
- Vitamin D3
- Lypospheric Vitamin C (30ml, twice daily)
- #Quercetin (500-1000 mg, twice daily)
- Iodine
- CoEnzyme Q10 and PQQ

- Pine Needle Tea for shikimic acid or shikimate (from green edible pine needles)
  There are toxic pine needles, careful! When drinking #pineneedletea, drink the oil/resin that accumulates too! #Shikimate, shikimic acid and their derivatives possess: cancer fighting, antiviral, antimicrobial, anticoagulant and antithrombotic properties.

- Fennel and/or Star Anise Tea: These are also an excellent source of shikimate or shikimic acid (which is known to neutralize the spike protein)
  - C60 (1-3 droppersfull per day)
  - Charcoal (2-4 capsules a day): Charcoal is the pre-eminent detoxifier and when taken on an empty stomach, works its way down into the intestines and activates a blood purification process known as “interstitial dialysis”.

- Citrus fruit (especially blood oranges, due to their high hesperidin content — hesperidin is a chalcone like quercetin that deactivates spike protein)
  - Peppermint (very high in hesperidin)
  - Wheatgrass and Wheatgrass Juice (blades are high in shikimate)

- Superherbs to help disable spike protein:
  -Schizandra Berry (high in shikimate)
  -Triphala formulations
  - St. John’s Wort (shikimate is found in entire plant)
  - Comfrey Leaf (rich in shikimate)
  - Feverfew (leaves and flowers are rich in shikimate)
  - Gingko Biloba Leaf (rich in shikimate)
  - GiantHyssop or Horsemint (Agastache urtifolia) (rich in shikimate)
  - LiquidAmbar (Sweet Gum tree) A tea of the spiky seed pods is rich in shikimate.

Angel Waugh the claims are not verified either. Basically, anyone can make claims which may or may not be related to the vaccine and is definitely subject to bias. Also, if you look at the graphs, many of those people died months after the vaccine. The components of the vaccine are metabolized in roughly 48 hours so the likely hood of them being related to the vaccine is little to none.

No ma'am thats not how science works.
You test and verify what the cause, and you dont speculate or assume, just because you want to find issues with the vaccine.
Can you show autopsy records that confirm so many are dying from the vaccine.
And ma'am, no one has never said that there wouldn't be side effects for some in the population.
But no real verifiable data has shown a large percentage of vaccine recipients have died from the vaccine.
Just random people on the facebook saying so is not credible.

Tara Hamby Ferguson well thats funny. That VAERS system that you call “not credible” was established by the governmental entities called the CDC and FDA! Don’t just go saying all of a sudden that that system isn’t credible just because it doesn’t fit your narrative. A Harvard study, years ago, said that roughly 1-10% of incidents get reported. So you can SAFELY surmise that the numbers on there are extremely underreported.

Mary Brodman now that is a truth, right there! Wouldn’t it be wonderful if THIS POST caused WXYZ TV Channel 7 want to do an investigation into why so-o many on here are saying the things they are saying and totally changed the course of their objective, which I’m sure was to get some great stories about people that didn’t get venomized and their tragic endings and then sensationalize the hell out of those stories (use them as Poster Children for “this is what happens when you don’t get venomized”!) but alas the media is so very corrupt, so corrupt that I haven’t paid any attention to them for the last over 12 years!

Vicki Devine understand what you are reading seems to be hard. Over here anti-vaxxers have been falsifying the data in our ‘VAERS’ by using the death announcements and pretending to be relatives of the deceased and claiming they died from the vaccine. It does correlate with the numbers of the coroners/doctors. Besides the call to do so was done through social media so we all know they did it deliberately. So who are you calling dumb?

Tim Harris not anti vaxer . I have received all of my prior Vaccinations. This is not a Vaccine , it doesn't even fit the definition.

More deaths have been attributed to the covid vaccines alone that any other vaccine that we have been inoculating Countries with.

This is Genetic Engineering, and this will go down in history.

You think it hasn't happened before ? It most certainly has.

Here are four instances in which vaccines failed the public big-time.

In the 1955 Cutter Incident, some batches of polio vaccine given to the public contained live poliovirus—even though they had passed the required safety testing. More than 250 cases of polio were attributed to vaccines produced by one company, Cutter Laboratories. The mistake resulted in many cases of paralysis, and the vaccine was recalled as soon as new cases of polio were detected.

In 2017, the Philippines stopped a school-based dengue fever vaccination program after reports of complications and several deaths linked to the product called Dengvaxia. The French manufacturer, Sanofi Pasteur, later stated that the vaccine posed a risk to those without prior infection from one of the disease's four stereotypes. The result was that it actually increased the risk that a child would contract a more severe form of the disease.

( Predicted to be the same with SARS-CoV-2 Vaccines)

Next on the list is the widespread vaccination against the childhood disease measles. In the early 1960s, thousands of children received a particular inactivated vaccine, so if they were exposed to the actual measles virus, they developed atypical measles. This was characterized by high fever, severe abdominal pain and lung inflammation and often required hospitalization. That particular vaccine was eventually withdrawn.

The final case deals with the vaccination attempt of the respiratory syncytial virus (RSV). Children treated with one type of vaccine in the 1960s developed an enhanced form of the disease, often suffering from high fever, bronchopneumonia and wheezing. Dozens ended up being hospitalized and two died. There still is no vaccine to prevent RSV infection.

Ellen Marston Thurlow looking in a mirror? Just basic math, and the fact that it is simply human nature to lie. 664K people have died from COVID, yet the majority of anti-vaxxers can’t give a first hand account of a friend or loved one dying, yet they have countless first hand accounts of the vaccine screwing up people, despite the fact that the # of those severely affected by the vaccine is maybe 3-4% of the total deaths? Yeah, big lies.

Carol Harris

Tara Hamby Ferguson I would say the numbers are likely skewed. Look at Israel that has 80% of their population v a x e d. Their hospitals are full of patients who had the jab. Many deaths too.

Nicky Castro

Adam Lee Marcus

If you said I know a single person who had a bad reaction to the vaccine I would say absolutely but you said people so I call your bull.

In all vaccines you will get a RARE case in which an individual will have minimum to extreme reactions and in most cases they can care for it. This is why when getting your shot you have to stay at the clinic for 15 min (timed)

So I’ll go ahead and say you are over playing a situation in your life or just straight lying to support your belief.

I know many people who have gotten the vaccine and are doing awesome and many who refuse and are doing just as well. I have lost friends during covid specifically and directly related to covid and lost friends who past away in the time of covid just because of life. So I can’t stand when people say bull just to make there point made but the only point they are making is I want to be right. Get the shot or don’t get the shot that’s on you and when kids get a case of covid or any sickness fir that matter remember you chose your comforts over there’s.
Linda Bly

Ana Ramos that's incorrect. that's the FACT SHEET NOT the package insert from the pharmaceutical companies. you know what it is...the huge piece of paper that is covered with tiny print on tissue paper. even a box of vision has a package insert. so they give us the fact sheet that anyone can type up. Please hurry up and go get me the fax to tell me and show me that 9000 people who aren't vaxxed are being hospitalized as we speak in one area because I highly doubt that but when I can assure you is that anybody going into that hospital with any symptoms related is being counted as covid so yes I'm sure that number is pretty high. But I'm getting the feeling that you're a lot higher so please get over here so I can smoke some of that s***

Adam Lee Marcus My mother never had Covid. She got the vaccine. Developed numerous blood clots all over her body. Protein spikes on every major bone in her body mimicking metastatic cancer (my mother got full body scans every 6 months for years) we have a bleeding disorder that runs in the family. For the record she didn't have cancer never did. Ending up with multiple pulmonary embolisms. She died within 6 weeks of getting vaccine. Before she died visited doctors and ER. All they did was blood tests and test her for Covid only to send home. By the time she could no longer walk (EMS was called) and admitted into ICU it was too late. I got to hold her hand as they removed her off the ventilator. I said my goodbyes as she took her last breath. I lost my mom 06-05-2021. From a vaccine that was continually pushed for her to get. In the end when I saw my mother she did not look anything like herself. She was so swollen and bleeding/leaking out of every crevice. It's a picture I will never forget. I miss my mother every day. My kids miss their grandmother. My step dad misses his wife. Covid is horrible yes. The vaccine can be just as horrible for people. There are no black and white areas. There will be people unable to get this vaccine. There are people who choose to not get vaccine for other reasons. We should not lose our means to support ourselves and provide for our families. We should have a choice to get it or not get. I could care less if others choose to get the vaccine. Because it is their choice. Don't take my choice away from me. I recovered from Covid and I don't think I will from the vaccine. I still have a daughter to raise. I have been in the medical field for over 11 yrs. I have been working around Covid patients since the beginning. I have seen/experienced what Covid does to people but I have also seen what the vaccine can do. So I am well aware from it.

As if correlation equates to causation?

Have you checked the VAERS report for those that died after drinking water? It is literally millions of people that have died after drinking water! Am I stupid enough to believe that means that drinking water caused the deaths. Nope.

Only in political debates does correlation get used to try to prove causation.

In AZ, almost 60% of the population is vaccinated. Recent report indicates that 93% of people in AZ hospitals are unvaccinated. That means that in ratio, there are significantly less people being hospitalized that are vaccinated then those that are unvaccinated. 40% of the population is causing 93% of the hospital Covid occupancy, and 60% is causing 7%. Anyone that understands basic math can see it is much more dangerous to go unvaccinated. And much of this surge is being caused by a mutation, variant D, that the vaccines were not specifically designed for, and they are still mostly affective.

Even taking all the negative side affects claimed, but not proven, getting the vaccine is still significantly safer than risking Covid.

If someone dies of something other than COVID within that time window, they're NOT LISTED AS A BREAKTHROUGH.

That is the medical science of it. If they died 10 days after their second shot, it is likely they had Covid before their second shot, meaning that indeed they were not fully vaccinated.

Most of the data I have read talking about breakthrough cases, cases in those having received at least on dose, have included those that have had one dose. Last data I saw was just over 14,000. Out of 176,000,000. Pretty good odds considering that many of those got Covid before their second dose, and 93% of people suffering and dying in AZ hospitals are unvaccinated.

At what point will people stop being blinded by their own pride and start to see the simple mathematical truth of the efficacy of the vaccines?

So y'all are laughing because the CDC is only a reliable and trusted source on matters of COVID when it fits your agenda but not when it justifies why people are questionable about getting the vaccine? Talk about hypocrites and I'd call you brainwashed but that would require having a brain to think with to begin with. Keep making your decisions off “how you feel” and how they tell you to feel about things, that's your right and choice but I'll make my own choices off the reality and facts in front of me. Don't need the government to make decisions for me. So quit trying to silence the people and take the freedom and rights away because you are so easily manipulated and bought.

Nicky Castro that's what we are saying anyways. Get it or don't get it. Deal with the results. I trust my immune system. Plus all 8 of my close family have had covid and all fine. Recovered after 2 weeks. I should get a strong immunity card. My choice shouldn't affect yours. Some people have reactions and some don't. The justification isn't needed to make the “correct” choice. It should just always remain a choice.

Sarah Silveira

Shavon Williams that is not true. If the antibodies take weeks to build, if a cytokine storm causes the trouble, it would not be in 15 min...that would be an allergic reaction to an ingredient

Sara L Kinney

Josh Lankford there are thousands of reports of it doing serious damage to a healthy person or worse.. and why do i have to show you unless your too lazy to do the research yourself don't have to prove Nything to you a non beleiver.. all you need to know is I have done the research I have seen the videos of people seriously injured or worse and I have read and watched videos of the doctors coming out with the truth.. and the hospitals aren't over run cause it will take 2 to 3 yrs before everyone who has taken the vaccine to die.. and the ones who hVe already died either died instantly or died within months..of taking the 2nd dose and now they are saying yall need boosters..lol.. wake up people.. if the jab really works you wouldn't need a booster 6mints after 6montha after 6months.. get real

Shavon Williams

Rob Childress
Lindsey Laasch | are you saying just because you haven't seen anyone die from civid after being vaccinated it just doesn't happen?
The document cites data showing that “The rate of vaccinated individuals among individuals with verified COVID cases is close to and even identical to their relative
proportion in the population even when sorted by age group, and even though the regulations of the Ministry of Health encourage a large number of tests among the unvaccinated.”

The second false assumption, that the unvaccinated infect others more easily than the vaccinated. Data from the CDC, Public Health England, and other studies demonstrate that once infected, the viral load is similar in both the vaccinated and unvaccinated.

Since viral load is the most significant factor in the ability to infect others, both vaccinated and unvaccinated pose a similar risk to pass the virus to others.

The third false assumption is that asymptomatic transmission is common. The paper states “Studies show that the rate of transmission of asymptomatic persons is 20 times lower than that of symptomatic patients (who are tested and isolated anyway, regardless of their vaccination status), so that the likelihood of an asymptomatic healthy person who does not know that they carry the virus to infect another person is significantly lower than 1%”

The paper also points out that high vaccinated countries such as Iceland are also experiencing a new wave of COVID despite their very high (80% – 90%).

“Therefore, unvaccinated persons are not what causes the pandemic to continue, nor do they endanger the vaccinated in that aspect. In fact, it seems that the hope of eradicating COVID by achieving “herd immunity” through vaccination of a high-enough percentage of the population has been proven to be unrealistic.”

Putting the burden on the healthcare system from the unvaccinated into perspective, In Israel, about 3% of the hospital beds are for COVID patients. At the time of writing, about 30% of them were occupied by unvaccinated people.

Notwithstanding the lack of scientific basis, politicians, health officials, and many in the media continue to blame the unvaccinated for the latest rise of COVID. This raises a number of ethical issues that the council addressed in their paper.

These attacks on individuals’ choice not to take a medical intervention is a slippery slope. Whether it’s someone who has lung disease and continues to smoke, or a heart attack survivor who refuses to alter their diet, or, not to mention some 80% of people who don’t take the vaccine to prevent the seasonal flu.

“The mission of the healthcare system is to serve the public, and it must not exercise any consideration that would restrict individual liberty.”

Health decisions should be made freely, otherwise, there will be a loss of trust between patients and healthcare providers: “Public-health policy is effective only when it is based on education and dialogue. Aggressive discourse might result in the loss of trust of significant sectors of the public, and lead to lowering the rates of other routine vaccinations that are of crucial importance.”

Blaming the unvaccinated could “foster the illusion that vaccination protects against contagion” and can result in vaccinated people thinking they are more secure than they really are.

In concluding their position, the Council writes “In a democracy, in whose core are human dignity and human rights, there is no room for calls and incitement of this kind.
The right of society to protection prevails over the right of the individual to freedom only when there is a real danger (as is done in the case of violent psychotic patients, or in the very different case of prisoners). It is wrong to restrict a person’s liberty due to a remote potential risk

Lindsey Laasch

Maureen Bolda tell that to the people in the ER for days waiting on a bed because we have no where to put them. We do not have an empty icu room. I could tell everyone that doesn’t work in a hospital saying they aren’t full to stop as well.

I bet you do!!!

I bet you do!!!

I bet you do!!!

Stories mean nothing without hard evidence. So please keep up the logical fallacies all day long. It won't change anyone's mind.

for many many years now you have been required to be vaccinated against highly transmissible and deadly diseases/illnesses to work in any medical setting. covid has killed nearly 5 million people in less than two years. would you want a nurse to spread chicken pox or polio to you when your immune system is already compromised? don't think so.

so right—that's just blatantly false. But cool tactic.
Nick Parker
THs makes a lot of sense. As you get a higher percent of the population vaccinated, of course you’re going to see a higher percent of cases from vaccinated people. The vaccine is not 100% effective. It's largely effective and also keeps most people out of the hospital.

Imagine if the vaccine is 80% effective, and 100% of people are vaccinated. What percent of the cases would be for vaccinated?

Mahalia Fuentes
Josh Lankford, you're uneducated on it and speaking about it. Great combo.

Marc Henze
Death after vaccination doesn't mean the vaccine is the fatality reason, right? Even when, you should set this in relation to the covid fatalities in the US ... 44,1 million infections and 660000 fatalities..

Nicole Hlavac
Scott Titus oh but you know science is only valid if it supports the agenda and propaganda.

PLEASE DM ME! IF FB does give me a notification of a reply, they won’t show me where the reply is and in a thread this big, it’s impossible for me to see your response. Send a friend request, or just DM, I answer DM’s from people I am not friends with, too.

You can find us on Bitchute and on Roku as VLTV. We have interviewed many whistle blowers - John McAfee, Bill Binney, Robert David Steele, Sherry Peel Jackson, Cynthia McKinney, Del Bigtree, Dr. Judy Mikovits, Dr. Richard Bartlett, Dr. Carrie Madej, and many many others.

Marc Henze so 1.51% of infections lead to death? Yeah the numbers sound scarier your way which is why they do it, instead of the actual % and the same could be said for covid related death numbers, if you have it or had it, automatically it’s a covid related death? A lot of deaths aren’t even from covid specifically but more so the secondary infections and conditions it weakens you to be more at risk for. A large % of severe and/or death cases are related to immunocompromised including smokers, diabetics, over 50yo individuals who are higher risk for everything. I just find it interesting that everything nowadays is covid related like the flu, anxiety, stress, depression, sinus infections and allergies, etc doesn’t exist anymore when all the signs and symptoms for covid are some of the most common generic symptoms for a wide array of common alternative etiologies.

Gavin Burton define "reliable source." None of the media outlets qualify at this point. We literally have information being controlled and exercising freedom of speech apparently puts Americans on the same platform as terrorists. It's scary.

Brooke Reed
Jim Stevens hard evidence is hard to produce when "stories" are excluded from the narrative.

Kyle Edwards
Mahalia Fuentes I personally think this is all anecdotal. People have all had different run ins with covid and the vaccine. Like me personally all of my friends and family have the vaccine and none of them have had any issues at all. I knew a few people who died from covid and I know a lot of people who have had it and almost killed them. That's my circle. I'm sure for you it's different. Everyone will have different stories when it comes to this stuff.

Angie Miesner Blake

Nicole Hlavac
Becky LaPlante the vaccine related ones are from the VAERS (vaccine adverse events reporting system) site, and the % I gave was based off the numbers from Marc's post but are close enough to the average numbers you find reported most places.

Kelly Anglin Hart
Gavin Burton this post literally just asked for unverified "Do you know someone who was vaxxed and died"? To write a slanted article. I didn't see them ask all the people who got Covid and are fine, if they got it twice, or think they need the vaccine.

**Nick Parker** while you are right about more cases in the vaccinated as more get vaccinated, this is black and white data. Percentage of cases amongst vaccinated should be lower than percentage vaccinated if you are touting efficacy of the V.

Rob Teal

**Robyn Wolph** even the CDC website has over 5,000 deaths from the vaccine. That's reported not actual. Actual numbers are sure to be higher. Do some homework first.

Lindsey Laasch

Drew Salem did you even read some of those? Some literally say “vaccine failure” because the person got covid. Well we knew you could still get covid. I even saw a report because the patient failed to go get the second dose…. Come on. Not all of these are legitimate. There’s hardly any history or any information provided about any of these. Very hard to believe some of these with nothing to back them up. Or reported just because they had a positive covid test. Or death from general malaise, but no autopsy performed so we’re just going to call it the vaccine?

Oh I'm sorry I guess I'll give a “valid argument” too.

The global network of epidemiologists, immunologists, virologists, medical scientists, medical researchers, and PhD-holding experts in every discipline of science related to vaccine development all recommend the COVID-19 vaccine is safe, effective, and our best path forward.

Steve Kloepfel

Kelley DeTrollo deaths by COVID vaccinations are less likely than being struck by lightning. Yet in this comment thread people are claiming they know multiple people that died from the vaccinations.

Statistically people die at a similar rate of random natural causes as the rate of those who have been vaccinated.

Yes... rare cases of vaccination deaths occur. Yes 97% of all hospitalizations are unvaccinated patients currently.

Take it or don't.... perpetuate the overload of hospitalizations if you feel that's your right.

Less than 0.0019% of vaccinated patients have died within 1 year of vaccinations. This includes patients who are 90 years old and died 1 year after vaccination.

You're promoting vaccine fear, yet ignoring 97% of all current hospitalizations and nearly all current COVID deaths are unvaccinated patients.

Have a nice day, and good luck to you and your family through this endemic.

We'll all have to be exposed to the Virus at some point, whether we're vaccinated or not.

Nick Parker well based on the CDC numbers (120.2 million infected and 767,000 deaths) when 0.63% of total covid infections lead to death and the total number of covid related vaccine deaths is higher in less than 1 year than all other vaccine related deaths from 1990-current (6,296), I think I'll take my chances and trust my own immune system and take precautions when and where appropriate.

My father passed away a month after his second jab. A coroner said post mortem wasn't needed as week before he passed he was in hospital with COPD (but made worse from a chest infection) he had COPD fine for so many years it just seemed normal to us and i'm talking 10 years all fine. Not that i feel a post mortem would have given us the truth either way. Paramedics found him and said heart failure. Coroner said COPD on the phone due to seeing the hospital admission. However i sincerely wonder if it was that vaccine and i will never ever know awful times. Also my mother has had both covid and the vaccine as caught covid after only 1 jab... she has had side effects like black dots in her vision which won't go away in the corner of one eye and the start of a stroke. I have asked her why she wouldn't upload symptoms on the yellow card site she has said it is because she doesn't know if it is the vaccine or covid because of how close together the two were.... probably lots of this also so not accurate figures on side effects website. My husband had someone at his work tell him his mother had the vax and a stroke a few weeks ago to. I do not trust any of it anymore and if i lose friendships after what i have been through and my choices because of this... i am more than glad!

Jen Schein Obal they are on VAERS and over a hundred thousand censored off Facebook in May. They deny relationship to the vax because it happens within weeks usually and they aren't correlating them. One of my friends dropped dead weeks after hers. Stroke. Not counted. My niece is injured now and has new untreatable heart condition. She looked horrible last weekend. My friends dog sitter got booster and is now in icu unable to breath, vomiting profusely. He family knows it was the booster. The people railing for choice aren't just doing it to be trouble. Most are very concerned. Many physicians and scientists being censored are also. We all should be. It isn't one size fits all. Most are fine. Some are NOT and some are dying. Informed consent isn't what it should be either. There are risks and no support for injuries. I am a prior vaxx injury myself. It happens and much more frequently with the new tech. They always say stuff is safe until yeats later when they can no longer deny it. That is fact with pharma and many chemicals inundating us and the planet.

Jen yeah you must be the only person capable of digesting data or having first hand experiences. Why should anyone have to justify anything to the likes of you. Just listen to yourself with your haughty arrogance with your "you people" and science bs. Shame on you. Where in the hell do people like you get off? Don't answer it was rhetorical because you just don't get it. BTW science isn’t science when it is formed by one side of an equation it is studied and questioned over several lens looking for abstractions and illegitimacies something you people do not want to accept. It isn't hushed or omitted because it doesn't fit within a narrow window. Fact is, people who are vaxed are dying from covid at a rate that tops unvaxed. Why would anyone mandate anyone lump themselves into that category? One day you will find out what the science is all about and pack of bs you have eagerly begged someone to spoon feed you and you will have regrets. Today i have none. Twice survived covid. Natural immunity is better. Always has been always will be. BTW, that doesn't mean I won't get it but it does mean i am more likely to beat it. Good day!

Laura Jaunice Dewitt a friend of mine's mother, father, sister and BIL had their first shots. BIL died 2 days later, 6 days later his sister died, another 7 days his father...all with sudden chronic kidney failure. Currently his mother is critically ill. Her bone marrow doesn't produce red platelets and her doctor told her its due to the vaccine.

Nick Parker
Nicole Hlavac you need to read VAERS requirements. Every single time someone dies, no matter the cause, they are supposed to report it, even if they think it's not related to covid.

**Jen Schein Obal** my brother died with 24 hours of receiving the covid vaccine - due to vac injury. Two close friends of mine also passed away from vax related injury. 6 personal friends have passed from covid - all were vaccinated. Of my friends who got covid but were NOT vaccinated - all got sick - some worse than others - but ALL of them have survived. It's a personal choice whether to get the vax or not but my choice is NOT

Jason Carter you are clearly someone who was comfortable not knowing the truth. Please do share with us any evidence that contradicts Adams story instead of just calling him a liar. I'll wait.

Kenzie O'Connell

Tina R. Tesch eh not so sure about that. I'm not a close minded person so by no means am I trying to argue I'm right and you're wrong, but it seems that covid protocols are a bit messed up. I've heard that some hospitals are jumping almost immediately to icu and ventilators when that's only filling the hospital more and sometimes isn't even needed. There was a woman telling the story of her husband being put in icu that really didn't need it at all. And some of us still can't get Healthcare for other reasons such as insurance or lacking a job. I mean this vaccine has caused some places to fire employees over not being vaccinated and I wouldn't be surprised if there's some smaller businesses firing people for getting the vaccine. And there's still people who get vaccinated and end up in the hospital.

Felicia Gallegos

Alex Paul you obviously haven't talked to medical professionals who are seeing a surge in patients coming in from having heart attacks, multiple heart attacks, strokes, blood clots, etc. Crazy thing they all have in common is the covid 19 vaccine. Stop being a sheep

Ashley Jersey Williamson not here to argue one side or another. But please before you go stating that no one has died from the vaccine, just simply do a quick search on your phone on the CDC website and read the VAERS data. I did it from my phone in 5 minutes two weeks ago. I had to narrow it down to just the Pfizer shot and "death" as a reaction. 6,486 at that time. Prob more now. Scroll through the details of the Dr reports. That's the Science. That's the data. Free to the public. And according to Harvard, only 1%-10% of actual reactions get reported to VAERS.

They've tried a couple of years earlier and suspended the trail after 54 deaths. Now they'll go full throttle, because people don't care anymore about their health and lives, so why should they? It's become an inhuman society, and we're supporting and we're partners in CRIME.

Jennifer Zirkle Lovelace

Adam Lee Marcus, everyone wants to talk about pre-existing conditions that complicate COVID but when the same is said of the small amount of folks impacted by vaccines it’s like that doesn’t compute. I haven’t heard of anyone who even got more than a sore arm. I’m not saying it hasn’t happened but instead the % is so small- the likelihood of knowing someone who has had serious side effects is low. I know a few folks who’ve gone to the hospital with COVID and a few who have died.

Teresa Wickersham believe what you want. VEARS is trusted to use for ALL vaccines deaths & adverse reactions. There have been at least 14,000 deaths from these covid jabs & over 600,000 adverse reactions. If you believed VEARS for all other vaccines, why are they suddenly to not be taken seriously with this one?

Chris Walden
Teresa Wickersham wow! I cannot believe that you aren't aware of the THOUSANDS that have died from the vax. You will NEVER hear it on the news. They are in kahoots! The VAERS system is a reporting system for vaccines. They say only 1%-10% get reported. They had over 1200 deaths. After it started getting popular, it changed to a LOWER NUMBER!!! They are hiding it. So if they are under reporting, that means 12000-120000. Dead. The families cannot sue. The government has suspended liability. Many many many people are injured for life. I am so completely shocked that you aren't aware if this. Get rid of the tv and find other places for news.

Teresa Wickersham
Sue Freeman look for the disclaimer. Under data.

Cheryl Daley
Chris Walden 100% correct, but the VAERS covid vaccine deaths are over 13,000 now. Even though it's self reporting, everything is verified by the CDC.

Ashley Jersey Williamson Wow! I'm in shock that so many people still think that this "vaccine" is safe! It's killed over 14,000 people. Kids are suffering from heart inflammation. **Lynn Poag** 14,000 deaths from vaccines. Laura says 2,000. VAERS is anecdotal and the majority of reports do not have medical authentication. Likewise, are these deaths from the vaccine, or deaths after the vaccine and unrelated?

Marisa Leonard Abelseth

**Meegan Williams** You can't even read that it's so tiny take a picture of half of it in large it and then take a picture of the other half in large it if you want people to believe the story

**Jack Slater** you should take something for your TDS

Stephanie Jones

**Megan Robinson** Hmmm. Then why doesn't Dr. Malone, the inventor of the mRNA technology support the shots and mandates?

J.J. Zeitvogel

**Chris Walden** 100%! Incorrect total of deaths are not reported. Numbers get changed to lower amount to hide the actual true numbers. Not to mention, with all other vaccines there are trials that have been required and if there are 25 deaths or more, the trials or actual vaccines itself have been shut down completely. Why not now? No trials. Emergency use never used before in history. Vaccines halted after 25 deaths. Just like the DS, VAERS cannot be trusted.

Steenie Steenie I think your argument might be with the CDC. It is their tracking that has recorded more deaths from this one vaccine than all the deaths from all the other vaccines combined over a 22 year period. It is their adverse reporting that is showing record numbers of hospitalizations and adverse events.

And, a recent study indicates the actual numbers being reported to the CDC are 1% or less of actual events meaning the damaged parties number into the millions.

Glad your patients are all ok. I'm sure that is great comfort to those who have suffered great loss because of this most dangerous shot. 4

Where in God's Bible did you find that? Oh, it's not in there. We ALL die, including Paul the apostle who suffered physically. Those who have received the gift of Jesus Christ paying for their sins are children of God who took on the punishment for our sins. We live for Him!!!

Adam Lee Marcus "I know people who died painfully from the vaccine. Want those stories?"
Yes, please. I have heard of people dying of Covid who had been vaccinated ('breakthrough cases'), but I haven't heard of anyone dying from the vaccine itself. If there is any substance to this, I'd like to hear it.

Mike Florendo
Look up vaers.

Karl Wieser
Stephanie Odine It's even lower, considering that 4000 people have not "dies" from the vaccine

Naomi Smith
Steenie Steenie unfortunately not everyone is as fortunate as those you care for. See How good they are doing when they need to keep getting booster shots, probably won't be around in a couple of years

Carol Oszczakiewicz Clements
The vaccines didn’t even test on animals ...there are reasons why they were able to get EUA's without a smidge of liability. We will never know the full truth. We must act on what is true for each of us. I have had two different bouts with COVID and do not believe any so-called COVID vax can make my body perform better against the virus.

Mark Hays "Either profits are more important than millions of humans lives destroyed and to be destroyed or this is genocide, those are the only 2 possibilities." Actually, I can think of one other possibility, and that is that the premise or your statement ("the media and the government as well as Facebook are all heavily invested in the vaccine and the truth about all of the MASSIVE vaccine deaths and life changing injuries cannot get out to the public") is totally false. Can you provide supporting documentation for this claim?

David W. Mallory I’m not for or against the vaccine, because I think people should do what they want with their own bodies. I will say this though. People will die from this vaccine, just like people have died from other vaccines, or meds, or shellfish, or nuts. Anytime you put something in your body or ingest it you’re taking on the risk of an adverse reaction. I think trying to scare people from getting the vaccine by pointing out deaths, which sadly is inevitable, is as shady as trying to scare people into getting the vaccine, which is what this article is also doing.

Scary Reports of Deaths Following... muhealth.org
Leslie Kim Bodes  
Carol Oszczakiewicz Clements hi I started reading the paperwork submitted to the FDA. They tested I a specific breed of rats, but when it came to the findings of reproductive issues, their stays was “on going”. Mind you, rats breed fast. They had plenty of time to report on this particular issue. They also tested on monkeys, same status for reproductive. They chose only healthy participants for their human testing, nobody with crohn’s, diabetes, heart problems, etc. so you are partially correct. FDA approval should not have been given.

Florence Fly

Mike Florendo which is also drastically underreported, by VAERS own admission. Perhaps 1-10% reported. The deaths and injuries from the jabs are massive. Propaganda is a powerful tool. Same folks pushing MSN are funded by big pharma. The media, the politicians, the regulatory agencies ffs, even the so-called peer-reviewed "science". All bought-and-paid-for. Wakey wakey people

Brian McKay not true. 80% of those reporting are doctors and nurses. It takes 30 minutes to an hour to make a report and everything has to be verified. Then the one making the report has to sign saying they understand that any false report is under penalty of perjury and punishable by fine or jail. AND VAERS only captures 1-10% of actual adverse reactions. In addition, about a week or two after submitting the report, someone calls to verify all information. So what is on there has been verified and substantiated. Don't believe everything you read.

Me too. It’s heinous. This is what ABP says to us:

Expertise matters, and board-certified physicians have demonstrated that they have stayed current in their field. Spreading misinformation or falsehoods to the public during a time of a public health emergency goes against everything our Boards and our community of board-certified physicians stand for. The evidence that we have safe, effective and widely available vaccines against COVID-19 is overwhelming. We are particularly concerned about physicians who use their authority to denigrate vaccination at a time when vaccines continue to demonstrate excellent effectiveness against severe illness, hospitalization and death.

We all look to board-certified physicians to provide outstanding care and guidance; providing misinformation about a lethal disease is unethical, unprofessional and dangerous. In times of medical emergency, the community of expert physicians committed to science and evidence collectively shares a responsibility for giving the public the most accurate and timely health information available, so they can make decisions that work best for themselves and their families.

Brian McKay
Nothing on VAERS is verified.

Tina Hahn
We aren’t allowed to tell parents that kids have gotten heart problems after it or strokes. We are just supposed to Parrot Safe & Effective - For Pharma I guess. I wonder how much they pay ABP & AAP to Threaten doctors.

Glen Aley

#BrianMckay, you talk of people listening to quackery and consorting with liars and refusing to believe stuff except the fantasy conspiracy theories on YouTube. That's an interesting concept, other than the fact that these big money industries you missed were those in pharmaceutical products. Why do you think they have been calling HCQ and Ivermectin unauthorized treatments? If you had a clue about this, you might also know that to get an EUA, there can be no other effective, approved treatment options for the same disease or purpose as the product seeking EUA. Both of those medications have been approved for decades for treatment in anti parasitic, antibacterial, and antiviral applications worldwide, including the USA. Ivermectin received the Nobel Peace Prize in 2015 for treatments in humans for a wide range of different medical conditions. So why shame them? Because the very same big profit centers for that industry, that have made billions on these same vaccines, has contracts with all these countries in order to receive their vaccines, along with paying off quite a few government officials, (which is nothing new to Pfizer) in order to make those billions off of a vaccine that all these countries are now mandating on their citizens. But I guess you have a much better theory, other than the propaganda spewed by the lamestream media of course, that might explain why they want to manipulate numbers, deny facts, censor legitimate medical professionals who speak out against the narrative, and mandate an experimental vaccines, or should I say gene therapy, for a renamed disease with a 99% survival rate? And then deny, hide, or otherwise manipulate any adverse reaction to those same gene therapy vaccines? Play the rating, publicity, or whatever card you want, probably just the usual name calling and virtue signaling tactics used by sheep everywhere else, but keep in mind that those same people speaking so highly and so much in favor of mandating this crap on everyone are also getting paid for their advertising and promotion of it like you claim the other side of the argument are.

David Lloyd As a Pediatric ICU nurse with 28 years experience, I too am ashamed of my profession. The number of skilled, educated nurses that I work with following the narrative, taking the jabs and ignoring the true science. It's completely irrational. And the incredible physicians that I work with also following along. All the while, patients not being treated early outpatient and/or inpatient with protocols that work. Fear is a dangerous weapon. Stand your ground. My sister and I have 58 years nursing experience combined. She takes care of fully V'd adult ICU patients. We will lose our careers over this. No one will connect the dots. They don't want to. This is like a horrific science fiction movie that we are living in.

In the 1930-1940’s in Germany, Hospitals, Nurses and Doctors bowed to the dictates of the State after being subject to mass propaganda and State threats to livelihood & threats of Death. These Hospitals, Doctors & Nurses acting on behalf of the State as State Agents, murdered 10’s of 1000’s of their disabled & elderly neighbors. That’s a historical fact.

Now, 80 years later, something similar is Happening.

We have a Trusted News Initiative (which I call the Trusted Goebbels Initiative) producing massive amounts of State Coordinated Propaganda and Censoring Truth. We have State Agencies Threatening Doctors and Nurses and providing financial incentives to hospitals for Coding Practices.

Disabled children in the Hospitals in Nazi Germany were murdered in Hitler’s T4 program. They (nurses & doctors) murdered psych patients in the hospital and elderly in the nursing homes.

We have Hospitals, Nurses, Doctors & Now Pharmacists serving as agents for the state. Doing the State’s will and Hurting the people just like they did 80 years ago.

Pharmacists refuse to provide early treatment. Hospitals won’t allow anything but State sponsored drugs. Millions of people are being injured & are dying.

All we can hope for is for God to wipe it all out because everything is corrupted w/evil.

If you have ever fixed an old car w/Bondo, you know that unless all the rust is removed the corrosion just comes back. That’s where we are.

We haven’t discussed ADE -aka Immune Enhancement. We haven’t had a single report explaining all the ten’s of thousands of deaths in VAERS. We have had no report on how many deaths Medicare / Medicaid is Finding w/their data analysis of hospital claims, nothing from V-safe, nothing from the Kaiser Group, or the other systems noted in the October 2020 ACIP presentation on Vaccine Adverse Event Monitoring. Why Not?

It is what it is. I put my faith in God. I look forward to the time when the lies and the Gaslighting are no longer allowed.

I look forward to a time when we live in a world of Integrity, Honesty, Decency & Truth.

Doris Mullen I hate to tell you this but I wouldn’t trust the opinions of nurses in regards to COVID. Your trained to administer that which was created out of science but not to be the scientist. That a nurse feels qualified to make scientific assessment (especially bad ones) is truly a violation of what your ethics should be. I tell people all of the time not to take the opinions of nurses in regards to this. You are proving my point.

Jessica Coleman by the next day she ached all over, couldn't get out of bed and just kept saying she couldn't swallow and had trouble breathing. Her voice and speech complete changed and everything was garbled. When she was transported to the hospital, they treated her for an "infection" in her throat. While at the hospital she was treated with steroids and 6 different antibiotics, she ended up hallucinating and having to be restrained and was then sedated and moved to the ICU. Nothing was improving with all the meds and after a CT scan the diagnosis was an infection in her throat and a swollen epiglottis and by now her chest/lungs were filling with fluid. She was released on hospice late Sunday night, and passed at her home Tuesday afternoon. It was very upsetting/traumatizing to watch her gasp for air to breath and basically suffocate as her lungs filled with fluid. You can't prepare for that experience to happen in a short 10 days. But in some ways she knew she was home and knew she was going to see Jesus and that brought us peace.

Alex Lofgren Actually, we don’t know why someone took a vaccine. Their job could have pressured them, family could have pressured them, they may have felt like they didn’t have a choice. After all, Biden is trying to force all businesses with over 100 employees to force said employees to get the vaccine or lose their job. You don’t always know everybody’s story of WHY they did something. Laughing at the fact that someone lost a family member is very cruel. Try being nice to someone who is going through a hard time.

on Tue Like Reply More

Natasha Fleshman

Alex Lofgren that’s nothing to laugh about. That’s like laughing at a child whose parents abuse it but it continues to go back to that parent in hope for love. No sir. You don’t laugh at other people for having hopes for something they was lied to about.

BrettandCasey Rodgers I agree 100% but the sad truth is people don't want to hear the truth they would rather live in fear because of lies. I've seen vaxxers on these posts and they are evil, atrocious, despicable human beings. Laughing at people who lost someone to a vaccine. They call the unvaccinated selfish when in all actuality they are the selfish ones pushing and bullying others to take an experimental vaccine that could potentially kill them. That's ok for them to do but when someone talks about the truth they are hiding all the deaths and permanent damage that it has caused your a crazy tin foil hat who only cares about themselves. Pathetic really. I stand by my choice I know what is best for me. NO ONE has the right to enforce or bully someone into something that could cost them their lives. I pray that the veil of lies comes down and people realize things aren't what they seem. There's a lot going on behind the scenes and it's not good.

Katherina Cullen

I completely agree. No one should force a vaccine on anyone. I personally have not had it and do not want it for myself or my family. But laughing at someone for a loss of someone they loved is very cruel.

BrettandCasey Rodgers

I wasn't the one laughing just simply stating why. If the government pushed physical health as much as the have been pushing the jab then I bet there would be a lot less fatalities. There's 100000 ways to die every time you step outside of the house, but people jump at a vaccine to feel validated so they can say they saved a life when it doesn't do anything. We were all lied to so hopefully you learned a lesson not to trust this

Katherina Cullen

I totally understand. People can be so cruel. They need to learn how to be kind and compassionate towards fellow human beings. Everyone is going through their own personal struggles and a little love and kindness goes a long way❤️

Philip Fox

Alex Lofgren it's so ironic that the good intentioned people who trusted to authorities and took the vax are now actually the ones that are shedding off the variants — destroying the very society they thought they were saving. If this really is a bio weapon Fauci and Company that that created it are geniuses. Maybe it will solve the global warming “problem”
Laura Burbo
Hillary Simpson VAERS dont verify.

Alex Lofgren
Philip Fox yeah exactly they just need to validate themselves to feel part of something even if it means destroying America. If the “global warming” problem was real, banks would never give out home loans and builder loans to do anything across states and countries that have a low elevation because essentially if it were true they would be under water and the bank out of money

Natasha Fleshman
To me… this devastates me just as bad as 9/11, Benghazi, and Kabul… because these were human beings who didn’t deserve all of this death and suffering. Nobody in their right mind deserves this. These were and are workers… nurses… policemen… military… children… teachers… doctors… friends… sisters… brothers… fathers… mothers… this was a GLOBAL GENOCIDE!!! Which is absolutely NOTHING to laugh about. NOTHING AT ALL to laugh about. But everything to lean on one another and come together as a friend. Anyone laughing at somebody else’s loss is absolutely the ugliest person inside. I do not care. Truth is the truth.

Shannon Nicole Mclelland it's a reporting system. That's it. And none of the stories about tens of thousands of deaths in there are true. Doesn’t that make you think just a little? Don’t you wonder why people someone would tell you their are thousands upon thousands of deaths in system they know you’ll never look in and none of what they say is true?

Shannon Nicole Mclelland
Brian McKay cool so no one has died from vaccines

Brian McKay
Shannon Nicole Mclelland should you wish to look at all of the data since vaccines started being administered, you can download the csv file yourself and open it in Google Sheets or Excel

Brian McKay
Shannon Nicole Mclelland so those numbers mean the vaccine is safer than COVID by the amount of stars in the Milky Way galaxy. Seriously.

Bon M Longo Das
Yeah and the vaccine probably triggered it!
Melanie Marie

Hillary Simpson are you willing or able to share the complications?

Glen Aley

*BryanMcKay*, it would almost seem as though you might be on the payroll to harass those with beliefs that go against the narrative. We can look up those documents as you say, and study the data, but at the end of the day, we are still left wondering exactly why they are still forcing a gene therapy vaccine on the population that has had more deaths associated with it that most if not all vaccines in the last few decades. You say you have an MBA, have lived all over the world, and speak multiple languages. That's quite an accomplishment, congratulations. I myself have lived in a few other countries for brief periods of time, don't speak any other languages, and have been in 2 war zones, so I'm fairly sure that qualifies me to be able to think critically about what is going on in the world concerning this "novel" virus and these "novel" vaccines. Normally when something is considered to be a novelty, it's not something that's dangerous, life threatening, or genuine, but hey, this is the new millennium right? So, back to this data on all these vaccines. We can look them up, then compare that information on the same product on VAERS, and wouldn't that give us the same verified information? You know, since it's information on the same vaccines? Yes, you can report on the VAERS website yourself, however, that leads to the same skeptical lines of thought that you are displaying, it's made up, it's false reports to vilify a certain product, (interesting side note here is that they are doing those same things to Ivermectin and Hydroxychloroquine), or any other position regarding the validity of those reports on the website. However, since the format for reporting threatens doctors against perjury, wouldn't it stand to reason that it would do the same for anyone reporting on that site? According to the FDA, they do follow ups of the information reported, so it wouldn't be hard to discover whether those were valid reports, or false reports. Then we have a very large number of people who claim a loved one has died from health problems associated with these forced gene therapy vaccines, to which I am also one who has lost a loved one, as well as a few acquaintances from these vaccines. Now, to say that there are no deaths that can be attributed to them is a blatant lie. The bad thing, is that any other vaccine would have already been pulled having the same adverse events that these have, especially the Pfizer vaccine. Look at the studies from Israel and Scotland, (although Scotland denies their numbers because roughly 90 percent of the country is vaccinated. More people are catching and transmitting the virus that are fully vaccinated, and dying from it in those countries that the unvaccinated. Why is that? Nothing is 100% guaranteed except eventual death that will happen to us all, but to justify those numbers by either saying that someone is considered unvaccinated if they have not had the booster, or that in a country where 90 percent of the population is vaccinated that it stands to reason that their death rate will be higher than the unvaccinated is blatantly misleading the public. That is, and has been a constant throughout this entire campaign against C19, misleading the public through inflating numbers, scare tactics, and programming. People don't see, or hear of anyone dying of natural causes, the flu, pneumonia, cancer or anything else that people normally die of, it's all C19. We went from 10s of thousands of flu cases, or deaths prior to 2020, down to just over 1800 last year. You don't find that even remotely odd? I know that not all of us can be paid promoters, experts, or even crisis actors, but that is way beyond the realm of believable.
Margaret Ann
Owen Szymanski so how do you. Know it was from the vaccine?

Fact Check-VAERS data does not prove...

Amanda Loewen
Hillary Simpson
the disclaimer alone makes Vaers an unreliable data source

“VAERS accepts reports of adverse events and reactions that occur following vaccination. Healthcare providers, vaccine manufacturers, and the public can submit reports to the system. While very important in monitoring vaccine safety, VAERS reports alone cannot be used to determine if a vaccine caused or contributed to an adverse event or illness. The reports may contain information that is incomplete, inaccurate, coincidental, or unverifiable. In large part, reports to VAERS are voluntary, which means they are subject to biases. This creates specific limitations on how the data can be used scientifically. Data from VAERS reports should always be interpreted with these limitations in mind.”

Felice Troutman
Jennifer Kelly any vaccine after the first is a booster.

Jennifer Kelly
Felice Troutman any Moderna or Pfizer vaccines take 2 shots. They are now saying that these vaccines have lost effectiveness, so a booster is required. The 1st 2 shots are a round, & not effective until 2 weeks after the 2nd shot. So no, the 1st round of these shots isn't the booster. The booster hasn't been distributed yet.

Felice Troutman
Jennifer Kelly it actually almost always takes at least 2 vaccines to have any protective benefit. An exception is for rabies in our pets. It is also normal that you are not protected until a couple weeks after a second vaccination (aka booster). The fact that they are adding a 2nd booster just validates that the vaccines for COVID-19 are likely to be about as beneficial as vaccines for coronaviruses in other species or even the numerous coronaviruses which cause many of the common colds we deal with because they can't develop effective vaccines for the common cold. This is one of the many reasons I’m definitely not eager to get vaccinated.

Elaine Reed
Amy Jay me and my nurse practitioner was talking and she said she is also seeing cancer resurgence as well. The American people need to stop this campaign! Our government has turned on us globally. This is serious.
Courtney Herring Tapscott
Shelby Jené Gonzalez I'm not saying the vaccine will not and cannot cause blood clots. I'm saying that a blood clot can be caused by things OTHER THAN the covid vaccine.

Sasha Slattery
Russell Dickerson my daughter, fully vaccinated, had routine oral surgery And started spitting out massive blood clots, the first thing out of the surgeons mouth “oh, are you fully vaccinated? We are seeing a lot of this!”

Jennifer Smith Corder
Courtney Herring Tapscott there can be a correlation, especially if within 1 week of the shot. The thing that irkes me so much is that we have looked at VAERS for decades and investigated when people started making reports on vaccines. Now, there are more reports of death in VAERS in the past 6month from these new shots than there have been with ALL other shots COMBINED in the past 30 years!! What is the govt doing about that!? NOTHING! Just now mandating the shots to hundreds of thousands of more Americans. Sickening…

Antoinette Whitten
Courtney Herring Tapscott Courtney Herring Tapscott in other words, there was no “control group “ established as we “lab rats” were injected and sent out with out being monitored. This is the problem when one of the supposed vaccines has just been FDA approved because it has undergone human trial studies. If this is how studies are conducted.

Russell Dickerson
Speaking of studies.. the studies of the vaccine focused on antibody response, not outcomes. The media played along. Statistically those who died of COVID with and placebo group was the same. So it didn't affect mortality. They knew this before they rolled it out.
Shelby Jené Gonzalez
Courtney Herring Tapscott I get that.. I'm for people making whatever choice they feel most peace with, but I just believe people need to be properly informed on something being so pushed of the fact these side affects are not as rare as claimed. I know so many people who have had horrible side affects and doctors even claim it as bad reactions to the vaccine.. multiple strokes, heart attacks, heart damage, seizures, brain damage, even people who died. Just sad reality these stories are not what's broadcast and even some hushed.. removed from social media. It's just time that the public starts acknowledging that there is another reality to these vaccines that is affecting people in heartbreaking ways also. It seems just like how you never know when covid will affect someone badly no matter their state of health or age.. it seems vaccines have randomly affected some people in awful ways. It's just also a very real risk that needs to be made clear.

Norris Scott
Charlamaine Butler Smart choice!!

Susan Ganey
Charlamaine Butler Wise!

Courtney Herring Tapscott
Shelby Jené Gonzalez i absolutely agree with what you are saying and there definitely IS a correlation. I just simply mean correlation doesn't mean causation in every case. Some people just get blood clots. Now within the week of getting vaccinated, that's definitely wrong and vaccine related. I mostly meant blood clots overall because someone mentioned how only one out of 68k people get them. This whole situation needs to be handled better, and i am all for making your own choice.

Dave Semotink
Charlamaine Butler I am sorry to hear your loss!! Everything I have read says that if you've had SARS Covid 19 and had mild symptoms, the second shot is killing more people than it is helping. Obviously I don't know if I believe that but we will never know the truth until 20 years later.

Antoinette Whitten I’m not telling you to go get vaccinated at all. You do what you feel is best for you, absolutely. Do I think the vaccine was rushed? Absolutely. I majored in biology. I know how studies work and I know there was no way in hell one was done properly in the given time frame. I’m literally ONLY saying that of all the bad side effects mentioned, blood clots have the most random causes that after immediate vaccination (within a couple of weeks after the fact) you can not definitively say it was a vaccine side effect. More so, I meant that blood clots can be caused by a multitude of factors. I have unvaccinated patients who have never had covid that have blood clots. I’m all for the truth, even if it’s not on my side. Just saying that the covid vaccine isn’t the only cause of blood clots. They were around before covid and they’ll be around after. However, some people are getting them as a side effect and that is when it becomes not okay. I guess I was speaking generally about blood clots and not only in relation to the vaccine.

Jen Robi

According to Dr. Charles Hoff, the Moderna shot contains 40 trillion mRNA molecules.

Just 25% of these molecules remain in your arm, the rest picked up by your immune system and transported to your body. Your body uses these molecules of mRNA for the vaccine.

Circulated into the vascular system, into the vascular network, turning smooth cells into rough, spiked cells that more easily clot.

Kathy Sullivan

Courtney Herring Tapscott They lie about the stats from beginning to end...from the 80% or more false positive PCR tests to lying about mRNA safety/transmissions to the falsified death counts in the hospitals...all incentivized. Whistleblowers remind us that most doctors don’t even know what VAERS is much less report any "correlation" reactions following the shots. Harvard 2009 study stated that only 1% of reactions are reported to VAERS.

Don't believe any of the stats from the CDC who holds the only patent on all coronavirus research.

Example. Stanford had 1500 Covid positive tests, that tested positive for influenza A and B. So they did the logical scientific research. They asked CDC for a Covid sample to use Koch’s Postulate testing, much more advanced than the fake PCR tests. The CDC, the ONLY place to go for support when researching coronavirus said they had NO Covid sample for them. Hopefully that wakes up a lot of people about the corruption on all levels.

FDA is funded 75% by drug companies when it comes to drug approvals. Basically pay to get approval and when paying more, the fast track process speeds up.

Charlamaine Butler So sorry..

Courtney Herring Tapscott

Christa Alexander Wright eh, I've treated a few actually. Are we talking pulmonary embolisms/strokes or people getting DVTs? I think the thing here, that I keep trying to explain, is that blood clots are pretty common. It's why every patient is on lovenox or some other dvt prophylaxis. Deadly blood clots like PEs, strokes, etc, especially from vaccines, should not be common. Which I've said multiple times, and even agreed with the fact that too much correlation makes it sketchy. I'm not arguing that. Birth control pills carry the same amount of risk for blood clots and are taken over a long period of time, but we don't see people freaking out and being anti-birth control. Again, I'm not on here telling you to get vaccinated. I think the reactions people have had should be taken more seriously. I. Am. Not. Arguing. That. At. All.

As a RN for over 25 yrs, 23 yrs as a Icu nurse. We had our share of covid 19 last yr. I was 2nd in line for my first and 2nd vaccine shots. I had no reservations about getting the shots. Nor did my wife nor my adult kids. I had zero side effects. My wife my son and daughter had mild HA and fatigue for about 15 hrs then gone. I know that all of our current icu covid patients are unvaccinated.99.5%. That number is real. Yes i have read all these testimonials. Im sorry these people?did not fare as well asi did. I dont know any of these people. I also do not know any of their pm hx. I do know the only way we get out of this pandemic is by way of vaccinations. If other treatments have worked for you im happy for you. But with covid 19D 17 times more contagious then covid 19 if you do not practice?social distancing and mask up in crowds or get vaccinated..covid D will find you. We know it hits hard and fast and spreads fast. I also know vaccinated people can contract covid d. But the sx are much less severe. Not requiring hospitalization. None of ANY of my nursing or medical collegues have contracted covid 19D. I believe this vaccine is safe. 1.6 billion doses given. Yes some have had complications. Some severe. And im sorry for them. But with any medication they can come with side effects. Every drug comes with side effects. I believe this drug works and i also believe these vaccines are the ONLY way we will come back to?anything close?to normal again. I only pass on accurate and correct information on covid to my patients and their families. I dont believe in conspiracy theories. Only facts. I believe in the science. Always have. Misinformation is the biggest detriment on this vaccine. Its not political. Its science. Please get vaccinated. And be safe.
Irene Simonson

Courtney Herring Tapscott older and after surgery is one thing. healthy young people that all of a sudden get blood clots, and all after taking this vaccine, nah, that isn't normal.

Alison Carter Plahitko

Courtney Herring Tapscott That is misinformation and you know it. Blood clots have specific causes and post-surgical patients are at high risk of them. So are stroke patients, and diabetics. That's crazy, in my day, which I know advancements have been made, but we would get surgical patients up and walking soon post op as preventive, use ted hose on at risk surgical patients. Never were drugs prescribed the likes of Lovenox for ambulatory, no pre-existing conditions basic medical floor patients. I guess I'd definately have to take a refresher course if I were to go back to work. Good thing I've no intentions of going back

Sunshine Heinemann unfortunately covid is serious for some, but instead of treating early, we are telling people to go home and wait it out and the. Go back to the hospital when they can no longer breathe. At that point, they pump them with a drug that is proven to cause kidney failure and put them on a vent. They are doing this because they are getting paid an additional 36k for every person who dies in the hospital with “covid”. It is atrocious and these leaders need to be charged with crimes against humanity!

Shelby Jené Gonzalez

Courtney Herring Tapscott yes.. I think the biggest thing is that the media only wants to put out and focus on one side to the point of even flagging and even removing the negative vaccine related stories.. & the general public most commonly shames people who are skeptical because they are weary of the negative sides to the vaccine. It’s so wrong. Especially in regards to people who have suffered from the negative effects that so many want to discount. There just needs to be more openness and honestly all around, and people be able to freely make their choice based on all the risks.

Jennifer Smith Corder

Fred LeBlanc I’m sorry that you haven’t taken the time to search out the scientific literature showing that you’re wrong. These shots are very dangerous. More so than covid. There is a great deal of new (and old) research showing that the shots can and likely will increase viral escape and mutations. The US and Canada are the only countries that have 99%+ hospitalization of the UNvaxxed. Every wonder why that may be? Is the virus (D) different here than the REST of the WORLD? Please get off google and find a search engine that is not censoring the science that doesn’t fit with the governments narrative. We are not spewing conspiracy theories- we are concerned BECAUSE of the real science.

Donna McBroom-Theriot

That is absolutely selfish.

Fred LeBlanc

Jennifer Smith Corder dear jennifer. I do not use google. Please be respectful. I do my research with our epidemiologists. The people who study this virus. And you know im not wrong. 1.6 Billion. Vaccinated. The benefits clearly out weigh the risks. And yes not all of the world?may have covid 19d. I also did not say you are spewing anything. I said i do not believe conspiracy bs. Andi am concerned about the side effects some of the people have? suffered. I work in health care and see what i posted upfront. 99% of all new covid addmissions unvaccinated. That figure?does not lie. I meant no disrespect to anyone. I didn't discredit anyone. Please dont come at me like i dont know?what im saying.
Lorna Gajewski
**Charlamaine Butler** I believe that shot is extremely dangerous and the powers that be probably got shot with a placebo because they know how dangerous it is. They have to push the vaccine because they don't want a real live control group of people that stay healthy and survive when others die of long term effects!

Jennifer Smith Corder
**Fred LeBlanc** I didn't intend to “come at you like you don't know what you’re saying.” I am an RN and also know a great deal about interpreting science. All I am doing is urging you to please search for data that may not reflect what you believe is the truth. Both sides should be seen so that we can make informed decisions about this topic. I know that the US is saying that 99% or more of the population being hospitalized are unvaccinated, but what I am saying is how does that make sense when the rest of the world has sooo many vaccinated hospitalizations and deaths? How is the US so very different when we are fighting the same virus?

Jennifer Schmitt
Sunshine Heinemann probably because they gave him Remdesivir, which is now the “protocol”. Which does NOT treat COVID, and causes kidney failure and usually heart failure. And denied him the PROVEN medication regimen that works. So, he is added to the mass genocide list. They are killing people. Denying appropriate treatment and, with thousands of studies showing efficacy, still denying appropriate medication regimens. It's horrifying.

Jennifer Smith Corder yes! The same people that are complaining that the hospitals are over run are the same people who refuse to treat early onset of the disease. And when rhey are full code me and our entire icu team work as hard as we can to save them. Try experiencing that once or twice. **Matt Hay** I have Factor V Leiden. I cannot get a medical exemption and thankfully work from myself. Just my world is becoming smaller and smaller and I have plenty of friends and acquaintances who support required vax. It's like playing Russian roulette with three bullets in the chamber.

Jason Vollmer

Fred LeBlanc, being a doctor, you've probably also seen there are more reported Covid vaccine deaths and AE's reported to VAERS (and verified by CDC) than all previous vaccines combined since the inception of VAERS.

Catie Yingling Martin

**Jennifer Kelly** The booster is available. Maybe only to some at this point but it is. My elderly mother in law went to inquire about it and they gave it to her and her husband the same day. She didn't think it was available yet and just wanted info on it. She had both shots and the booster.

Unfortunately, money speaks and I’m afraid many more people have lost their lives to this virus due to facility malfeasance. So many lives could be saved if we stop telling people to wait until they can’t breathe before giving them the chance to have early treatment.

Crystal Urban if you vax everyone, how is there a control (placebo) group? Everyone who was in the study probably got vaxed when it's over, so there's no way to do a long term study.

Lee Perkins Leaupepe

Kellye Sandlin
Russell Dickerson Pfizer unblinded the "placebo" group, on purpose, then "encouraged" them to take the vax. That is NOT good science. Trial participants were healthy 18-45, no elderly, no pregnant, no immunocompromised. That's NOT good science either.

Crystal Urban
Russell Dickerson when reading the FDAs approval they started that they received a placebo.

Fred LeBlanc I'm just curious your thoughts on natural immunity? If vaccines are the only way out of the pandemic does this mean natural immunity wouldn't contribute to being out of the pandemic? There is REAL science to back it. Also are you saying since only a low percentage die from the vaccine its okay because as long as everyone is vaccinated it will end pandemic even though some won't make it to the day the pandemic is over because they will be taken out by this "SAFE" vaccine? I say we need a much safer vaccine after reading these comments. CDC changed the guidelines. If you get put in the hospital within 14 days of the vaccine, they mark you as unvaccinated. Look it up & do your research. Because in Indiana it is the vaccine people that are in ICU...

Megan Nichole
@kimAnthonyJohnson

We know why the numbers are so inflated. Why didn’t they use the ships and the hospitals they built? Why didn’t they use all those ventilators that were mass produced in record speeds?

Jeff Veit tell it like it really is. It's all about control and depopulation.

Eric Harvey
Israel has confirmed around 85-90% of hospitalizations are from fully vaccinated
Stephanie Orr

Cindy Ferrari Ras 99.6% survival rate can look like being in the hospital for 3 weeks with increased oxygen and decreased oxygen saturation then finally being placed on the ventilator for 3 more weeks. Now you're in the hospital for 6 weeks. Come off the vent, still in ICU for a couple of more weeks before being transferred to a regular room for a couple of weeks. Now your body is so deteriorated and you're still requiring significant amount of O2 so you're going to go to a rehab facility for 6 weeks. In this time span you have also lost your job because you have been out of work more than 12 weeks and even if you hadn't your body is so tired & weak doing minimal things that you probably couldn't work anyway. Eventually you recover enough to go home with outpatient therapy, but now you are a Covid “long hauler” with potential life long medical problems that you never had prior to your Covid Dx.

My point is this...people with these exact same stories are also a part of the 99.6% survival rate because they did “survive” Covid.

Jennifer Schmitt

Shawna Gentry these are the people who should be imprisoned.....filth.

Jennifer Schmitt

Beth Cary it’s the FDA.... Not the pharmacies. Most of the docs, hospitals and pharmacies have been threatened with their licenses and their funding if the prescribe. By OUR ELECTED GOVERNMENT..........BY AND FOR THE PEOPLE.......
Jennifer Schmitt

Jennifer Smith Corder for me also. Go to America’s Frontline Doctors online. There are great resources and places to order meds online. I have seen countless healthy people go into the hospital with mild Covid, be isolated from family and nurse friends, be given Remdesivir, which is killing people, be sedated and intubated without family permission and even AGAINST families permission and even after hiring attorneys and fighting for appropriate meds, be denied and patients have died. The most recent....42 years old, in perfect health, and mild Covid. Dead. Because they caused his kidneys and heart to fail and vented him until they killed him. Against his and his families wishes. It's illegal, it's immoral, it's against everything I've ever stood for in my medical career. It's genocide and it's despicable and these people should be the ones put on a vent and killed slowly and painfully. And the lay people don't even understand enough to question it. Especially when the doctors are just saying sign this DNR, there's nothing we can do.... If you DM me, I can tell you where you can get the meds you need.

MEDIA IN BIG PHARMA’S POCKET, ATTACKS...

Courtney Herring Tapscott But in the stories people are sharing, it IS from the vaccine. Is it just a coincidence that one woman knows like 3 people, 39, 28 and 19 who were perfectly healthy, received the vaccine and either died or had blood clots? I know a nurse who was the picture of health, get brain swelling after her first dose. I also know two people who were given the vaccine and got blood clots. These are people with no prior history who are now affected. How is it that if it's only 1:68000 people, how do I even know one, let alone 3 people who were injured? Could it be because if the real information was released, people wouldn’t get vaccinated? Why are they pushing so hard when Singapore (81% vaccination rate) is now having a massive spike in COVID cases? Weren't they supposed to have reached herd immunity? It's ok to be a health care worker, and admit that many of these cases are coincidence. You're not a scientist, you're a nurse. It's ok to openly oppose the healthcare system when something sinister is happening. It doesn't mean you're a bad nurse because you are honestly acknowledging there's a problem. A 42 year old head nurse now has brain swelling from the first dose of Moderna. This woman has a 22 year old son to care for. She now has severe migraines and cannot work. This wasn't an issue prior to vaccination. She now opposes something she originally believed in because it caused her to be unable to work in a field she spent YEARS going to school for. She’s been in school since graduating high school and continued to get certifications (wound care etc) up until 38. A mere 4 years ago. She worked 4 years as a nurse before now being unable to work. There is something seriously wrong with these vaccines being pushed.

Mari Samali

THEY KNEW BETTER! It was THEIR JOB and RESPONSIBILITY to KNOW BETTER!!! THAT IN ITSELF speaks VOLUMES - and with THAT being said, it does NOT surprise me they are forcing the military.... HAVE YOU HEARD of the military members taking DISCHARGE over being forced to get the shot?! I personally only talk about friends and family members of people I know personally who had vaccine effects if you want personal stories though there are loads in the ‘I've had the AstraZeneca’ group on fb where people report reactions good and bad. Of course there are lots of people who haven't had reactions I'm sure but absolutely loads who have. If this was any other vaccine it would have been pulled by now.

Sarah Louise

The problem is they over estimate covid deaths by including any death if the person had a positive test within 28 days and then it’s almost impossible for people to get vaccine illness related to the vaccine:

What I see it seems to be that it brings out underlying things. Like I have a friend who got the jabs and an old issue he got rid of years ago flared back up, I've seen two people I know go through sudden early menopause just after the jabs etc I think in a lot of cases it's bringing out underlying things in an extreme way. Deborah January WOW!!!
So sorry for your family.
My husband woke up one morning, 2 months after his 2nd shot
Numb from the knees down. He has MS, but never had anything like this happen before

Jean Bailey

Shae Jackson umm because people dying everyday. If he was old and had underlying health conditions then his system couldn't handle the stress. I'm old, just trying to understand. I go to memorial tomorrow for my bonus Dad, he was old, not covid!

Rochelle Holsworth

Helene Bishop I'm so sorry! Praying for your dad! Unfortunately, his story doesn't align with the current commie and chief and his admin that wants to govern my force!

Shae Jackson

Jean Bailey but what does it matter how old he was? She said he died from covid. Did you read that before you commented?

Helene Bishop

Deborah January I am so sorry, there's no reason for this. Prayers to you and your family
Helene Bishop

Danielle Slanec Williams no but if enough people come forward. I had several customers that were in the medical field that told me last year that the hospitals were empty and they were laying off Doctors, yet the media was saying how full they were. I had another customer tell me that she was a nurse at one of the Henry Ford Hospitals, her best friends dad died from an aneurysm and did not have covid. They were told to list covid on his death certificate, the family was suing the hospital.

Helene Bishop

Another sad thing to all of this, they are trying to find my dad a rehab center to go to when they release him, his apartment complex won't allow him back because he has covid. So where is my dad 83 years old to go. Is the government going to take care of him.

This is what I found: The data reported from these states indicate that breakthrough cases, hospitalizations, and deaths are extremely rare events among those who are fully vaccinated against COVID-19 (see Figure 1). Rianna Lehmkuhl Barnes
Jean Bailey you don’t have to explain yourself to someone like that. People need to use common sense. Helene posted about her dads condition from covid on a public social media website, on a news channel at that, for the very reason of wanting to help others with their story & wanting to be heard. She obviously posted it to make it everyone’s business & warn us. Most people know different ages, conditions, etc. are affecting individual reactions to covid & the vaccines & were all confused & torn. No one knows the truth but what best than to ask each other. As a community, it is our duty to help each other when we can. Even if that means sharing intel/info/ personal experiences to help someone choose against or for a vaccine. So don’t feel bad. Btw my condolences for your dads passing. Praying for a full recovery of Helene’s dad in the hospital. Good bless you both.
Rianna Lehmkuhl Barnes

**Shae Jackson** there’s nothing wrong with her question. Helene obviously shared her father’s story in the public eye, on social media, on a news page at that, cuz she wanted & chose to share their business to help others. She obviously wanted to communicate about her father’s condition from covid. We are a community & we should all look out for each other, so if that means giving insight on our own personal experiences to help others...why not? Maybe this lady is older & is scared to get the vaccine or maybe her hearing he had an underlying condition will give her relief about getting the vaccine or comfort she may not get from covid. We’re all in this together, we’re all confused & torn & trying to make sense of all this. You don’t have to be so harsh. God bless!

Rianna Lehmkuhl Barnes I wasn’t being harsh, the lady said what her father died from, it was clear what she said why ask about other ailments he may or may not have had? What does it matter?STILL! The man is gone! If someone loved one passed, I don’t keep asking them how did they die. It's out of respect. That isn’t being harsh especially if They’ve stated how already.

Let’s not forget, the elderly and most vulnerable were told if they were fully vax’d they would most likely be spared severe illness, hospitalization and even death. Helene Bishop I am sorry to hear that. I myself have lost many vaccinated family and friends this year. I hope the hospital your Dad is in, is not treating him with Remdesivir. Everyone I know that went into the hospital for Covid that was treated with it died. The drug caused all their organs to fill with fluids, including their lungs and they died from drowning in their own fluids, not Covid. Fauci’s "approved" drug to treat Covid symptoms is making the symptoms worse and killing more people than it's helping.

Sheryl Robert Baton

Helene Bishop So sorry about your Dad I agree 100% they should definitely be telling stories like yours!

Kathi Dawn

Helene Bishop So sorry to hear that about your dad and yes the news needs to be telling the truth concerning the side effects/deaths of vax as well. There are many out there. My sister-in-law died had covid and unvaccinated. The whole story is though after a few days in hospital she was sent to rehab at mid-jefferson(was never in ICU or vent). Sent during a severe freeze in the middle of the night. She died there the next day. They gave her a breathing treatment her oxygen level dropped. They left her in there she apparently stood up and fell. They sent her to hospital where she passed. She was only 46. They said we would have to have a lawyer to get her records of what really happened. Lawyers said if death says covid noone can touch it. She died alone and scared of neglect but listed as covid. Wonder how many others that has happened to.

**Helene Bishop** I know all about rehab screw ups. In our case they let my husband develop sepsis from a UTI that he had recently been cleared of at the hospital across the street. Inspite of the fact that he had TWO clearly visible urine collection bags. It would be impossible to miss if anyone was actually paying attention. He had been there several years earlier when he first started using them with no issues. Wasn't expecting them to muck things up. I will always regret not checking them myself as I had taken care of them for years. Expecting company and trying to get ready for that. It ended up causing multiple blood clots and a stroke and multiple organ failure. He lasted two days.

CDC under fire for decision to limit tracking of Covid-19 cases in vaccinated people

The agency’s decision to limit its reporting of breakthrough cases has prompted wide variation in how states keep tabs on them.

Helene Bishop so sorry to hear this. But good this is being outed. Thank you for sharing.

Samantha Garner

Joan Hampton my grandmother passed 2 weeks ago due to the hospital as well, she was transported to the er by ambulance because she was so weak, no one could get her to the car. This had happened several times before over the years (either from a uti, low potassium, or fever). The er admitted her for a UTI. Next day they called and said she tested positive for covid and the UTI was a misdiagnosis. They blamed the weakness on “covid”, all over her vitals were good, no fever, no trouble breathing, chest X-ray was good. Only symptom was weakness. We asked that they retest in case it was a false positive and they refused to retest. (Btw she had COPD) when asked what they were going to do for treatment they said “nothing” and just kept her on the covid floor. We requested they give her vitamin d, they refused. They refused the antibody infusion also. Just let her lay there. We requested she be released and that night they let her aspirate, she was without oxygen so long that she couldn’t move, speak, or even blink. Family was called in and she was put on bypap machine. She passed after we said our goodbyes. Dr told us it was NOT a result of covid but was a “bad accident” the hospital’s don’t care anymore.

Carol Williams Castleberry

Debbie Thomas THIS IS THE MOST HATEFUL THING IVE EVER SEEN

Amy Kronstedt

Samantha Garner that is just horrible. I am so sorry for your loss.
In a normal life that would be a huge medical lawsuit just waiting to happen. I hope you can get some answers.

Samantha Garner

Amy Kronstedt it has really taken a toll on our family. She was such a good and godly woman that had been through so much in her life. She didn't deserve to go the way she did! I know without a doubt, she would still be with us if she hadn't have went into the hospital! Btw they told us that they were “keeping her comfortable” when we got there. She wasn't on any drip or anything. I asked a nurse if she could get drip or were they just going to let her starve and dehydrate to death, she informed me that was what the “comfort measures” are, no drip or anything, just waiting for them to pass!

Reuby Tuesday

Carol Williams Castleberry ..you've led a charmed life

Samantha Garner,
So sorry about your unfortunate loss. Your story is the bigger story and this is news they should be writing about. I don’t think the problem is that the hospitals don’t care, I think there is a bigger story behind tragedies like these. Basically, follow the money. Plus, if they categorize someone as Covid, aren’t they immune to liabilities from accidents?

Vieyaan Yaldo

Joani Lindsey her symptoms started the day after the shot. Her doctor told her it was a normal reaction. But she kept getting worse and worse. So about a week after she felt like she couldn’t walk anymore, she was very weak, she was cloudy, couldn’t think straight. She almost passed out. Ended up calling 911 and took her to the ER. They told her she had a clot in her carotid artery. Her other scans showed 3 strokes. She was in the hospital for almost a month after that. If they’re not feeling well, go to a doctor right away. She would’ve died had she waited longer to go to the ER
Joani Lindsey

Vieyaan Yaldo wow I'm am so sorry to hear this !! My prayers that thing may get better ! I have so many concerns for my loved ones so far so good but one person does have issues they are not relating to the shots not sure the whole story she is ling time friend of family! Helene Bishop they want because it's the truth

Joy Silva

Helene Bishop

Our neighbor (in his 40s) just told us that he had a heart attack last week and was dead for 20 minutes. He coded twice and they had to do chest compressions to bring him back to life. Doctors said that one of his valves in his heart was blocked at 99%. They have since put a stent in his heart. He did say that he got the Covid shot on Monday and then on Tuesday night he had a heart attack at work. Coincidence? This all despite having his heart checked last January and everything seemed okay then. He's very lucky to be alive.

Cherilyn Morgan

Lisa Lucka that would be because people are finding it very difficult to survive without incident all the way to 2 weeks after the second jab....so they are counted as unvaxxed

Ashley Smith Vickers

Helene Bishop I wish the Jews wouldn't try so hard to divide us and make unvaccinated people look sick. They need to be telling the truth about what's happening with the vaccines causing damages and deaths.

Helene Bishop WXYZ-TV Channel 7 you guys are fake news. Report these other stories

Megan Partlow

Helene Bishop How's your dad? Is he better today?
Lynelle Stewart

Pam Budd “most likely” is not 100% safe. I’m 72 and I understand that because the vaccine is not 100% effective, that I could get a breakthrough case. I do not have underlying conditions that could be an issue, but someone who does could still get very sick and die. But our chances of recovery are much greater if we are vaccinated. I think the question about underlying conditions is a reasonable one.

Holly Renee

Kate Hall Godsey exactly and how do we know what’s all not being reported to VAERS because most don’t know it exists!

Karin Gilbreath Becton have you seen the criteria for determining who's vaxxed? You can have both doses and still be called UNvaxxed if it has been less than 14 days since you got the second shot or if it's been more than 3 months. So if you receive a second dose and come in 13 days after, they record it as unvaxxed. If you have two doses and come in 91 days after, you are recorded as unvaxxed. Bad math, bad science... Misleading numbers.

Kimberly Russell
Helene Bishop same with my mother she is fully vaccinated and she almost died of COVID

Lynne Brady Koch
Helene Bishop YES to stories like yours. I am so sorry about your sad.

Kimberly Russell this really needs to be told, I'm hearing more and more of this. There are cases of people shortly after the vaccine having major medical issues.
Melinda Kelly

**Ann Marie Chudzik-Dedischew** he's not they only one! I have a patient that her husband hasn't worked in over six months bc he now has the same thing. What I'm so confused about is now he's going to start all over and get a different brand of vaccine.

Kimberly Russell I was leaving for Fl with my husband back at the end of January to spend the full month of February down there. We got there and I knew the next day my dad was getting his second dose. I begged him not to do it. Then day after I called him, had my daughters call him, finally at 9 pm he called me. He was in the hospital and very sick. Come on a fever and fluid on his lungs. This is a man who only left his apartment for Dr. appointments, always wore his mask. I am not by all means not an anti vaxer, but this vaccine is made up differently than any other ones we have ever had. It was not studied enough.

Helene Bishop it all really scares me I have four children and now they are wanting children to get The vaccine I watched a video a few days ago I'll posted if I can find it of a mother in court I believe with her 12-year-old daughter who is now paralyzed after getting the vaccine
Cheryl King
James Derek Musgrave Does it really matter? They are dead. I’d like to know how many of these underlying patients received subpar care. I’d like to know if they are as aggressively treated as a young person. James, it should matter to you what happened and why. One day you could be on the losing end of the stick. Your question implies it’s not a loss if they were old or had underlying issues. How many people do you know don’t have some kind of underlying condition? We live in a sick world eating sick food and breathing sick air. Dusting of poison from the sky every now and then....

Cheryl King
Melinda Kelly Wait, what?! That can’t be true. Did he not connect the dots?

Tracy Wager I'm so sorry for your loss. I can guarantee you that the amount of people they are claiming that are unvaccinated are way higher than what they are trying to say. I have a 19 year old who has epilepsy, asthma, and migraines. My other daughter has some Heath things as well. I suffer from migraines. I absolutely refuse to have that crap put into my body. Katie Sre
Helene Bishop I'm sorry to hear this & I hope he improves. Please continue to advocate. These side effects aren't made up...... I pray for our whole world.

Melissa Rose Rothschild
Ann Marie Chudzik-Dedischew that's interesting because I've heard that just like the virus... the V can cause exaggerated inflammation where it already exists in the individual. So if someone already had an inflammatory disorder say in the cranial nerve ... it can exasperate it.

It would be great with the medical community could explain that this is a possibility... a lot of times we don't even realize the inflammation that we have ... except for maybe some auto immune type symptoms.

Mallory Sneed Travers
Helene Bishop agreed! I'm interested in these stories! Prayers for your dad

Amy Gray Quinn
Holly Renee and VAERS is very hard to use and they don't make it easy to submit a report.
Amy Gray Quinn

Rita Barnes thousands, tens of thousands have died from getting the shot. Do you own independent research ... you can find it if you look hard enough and maybe don't believe everything you're told that vilifies half of the country. Do you really think 1/2 of the country is stupid? Or maybe they have looked into things vs just believing what they are told...

Joan Hampton similar story. My mom broke her hip, had surgery, went to rehab, got Covid there but really didn't even notice. She got over that and then about died from being septic from a UTI (that I warned them she seemed to be getting from how she was acting but they refused to believe) & some pneumonia. Needless to say she is home with us caring for her now. They were wonderful with some things but missed the simple but potentially serious things.

Michelle Lasiter

I almost lost both my mom and daughter to the vaccines, 2 separate brands. Drs to date keep telling them, "we don't know what the vaccine is doing to you, just wait it out". 6 months later, same thing, we don't know, wait it out. How about those stories and ask WHY NO ONE CARES when the vaccine is doing the damage??

Tina Williams
Helene Bishop exactly
Nancy Louise Phillips-Auld
Shellay Gannaway Cremen of course you won't hear any negativity on the jab....even though there have been deaths and permanent neurological damage plus hundreds and hundreds of irreversible side effects...that doesn't fit the agenda of this admin....the side effects of the jab are as bad if not worse than the virus itself. If healthy, the virus is 99.6% survival.....co-morbidities ALWAYS increase risk factors from shots, meds, lifestyles etc. PRIMARY AMERICAN CONCERNS here are: TOO much controversy on both sides of this mess; our PERSONAL rights of choice are being taken away; the jab is EXPERIMENTAL by their own websites and the ingredients that they shared are controversial plus UNTIL it is FULLY APPROVED (not authorized for EUA, but FULLY approved) they don't have to tell what the 2 main ingredients are. WTH WOULD RECOMMEND ANYONE TAKE AN "UNKNOWN" SUBSTANCE and put it in their body without asking questions. On the "consent" forms you HAVE to sign when taking the jab, it says "I understand I am taking this experimental vaccine (which it isn't a vaccine) voluntarily" and I was given disclosure and risks; I am not allergic to any of the ingredients. Go find the consent forms on Google. I have talked to several people who "signed to get it" but never got copies of what they signed OR asked about allergies, illnesses, current meds....I'm a retired nurse and you ALWAYS ask illnesses/disease history, allergies, injuries, surgeries.....I read several studies from different countries and this is too too controversial; even the scientists & heads of WHO, NIH, CDC, FDA can't keep their information aligned from one day to the next. They contradict one another, give different opinions. BOTTOM LINE: It's a virus that "happened" during an election year and has been so so over-politicized for disruption and divide. We have had previous pandemics as bad or worse and NEVER were citizens FORCED to get a jab OR so heavily criticized and bullied or divided. I believe in people having an "educated and FULLY informed" choice. Either way, take it or not. Your body....people taking it are still getting the virus, are still contagious, being hospitalized and dying. They don't share stories like the entire cruise ship with ALL vaxx persons had 27 + virus on return and hundreds of stories like that. We had 3 family members, all different ages, who had the virus and ALL recovered.

Helene Bishop
Mary Herold I'm not also just referring to its effectiveness but the side effects and all the serious bad things that are happening to people after getting it, there have been many deaths from it as well. That's the stuff the media refuses to expose.

Gina Strahan same here. A friend had her grandmother fall and break her hip. They wouldn't do surgery unless the family agrees to have her tested for covid. They didn't so they said she had to wait 14 days in quarantine. After the first night at home, her blood sugar dropped and she became non-responsive. Someone in the family called 911 and the paramedics took her to the hospital with the family following behind. In the ER, they tested her and determined that she was infected. They put her in isolation and didn't let anyone in to see her. She died in less than 24 hours, alone and probably scared and in pain. She died from the injury and probably from complications of diabetes, but her death was listed as a covid death. The family tried to sue but no one would take the case

**Helene Bishop** well done for speaking out sadly stories like yours don’t suit their narrative. I pray your dad makes a quick recovery 😇

LC Libertad
**Michelle Green** a triage assessment ensures that the critically ill and critically injured people receive medical attention before those with non-urgent issues, and it supports the best use of hospital space and resources. So I would think that someone who is non-responsive would take priority. If staff are using triage in any other way, it is unethical and they need to find a new profession.

Kim Stone Zahari in my area of North Georgia, we have had 23 deaths from Covid during the last two weeks. In the hospital now 90% of Covid patients are unvaccinated. We have approximately 100,000 people in our area.
The hospitals are having to call in additional chaplains to pray and comfort the families. The Covid numbers here are higher than they have ever been. Unfortunately, many people still think Covid is a hoax. The Delta variant is so much worse than the Covid we saw last year. Patients in the ICU are coding so frequently that nurses and other staff members in the ICU have to go from room to room trying to bring people back to life.
I wish everyone could read the article written by a local chaplain who had been called in to assist last weekend. It is heartbreaking.

Dora Houser Doby
Susan Cranston, I worry a lot about the ventilator thing. Way way before covid, my mom was in a room with a woman who was on ventilator. A couple days later, they took her off. I asked the nurse why, and she told me that the ventilator posed risk of death after a couple days (I think she said 1 week max) and the risk increases every day after. I can't believe how quickly they put them on and how long they leave them on. I wouldn't be surprised if that is increasing deaths.

Sara Aralia I know I tried to tag someone else in this thread talking about all the unvaccinated in the hospitals. My best friends sister just passed(34). She got the first dose and got covid two days later and passed within two weeks. She was considered unvaccinated, so I know they linking all of them together. CDC protocol is killing people- no Vanco is causes kidney failure and it's a broad spectrum antibiotic and NOT used to treat viruses unless your father has pneumonia and not COVID. PCR tests have a 80%+ false positive results. Of course it going to show positive, your father has been vaccinated and the PCR test can't determine live mRNA from dead mRNA. Tonya Horton Did you all notice it says 16 replies. I clicked on it and there are only 4. WAKE UP PEOPLE! The enemy is Facebook, Fauci, Pfizer and all the hospitals that received the letter stating they must treat with Remdesivir. The hospitals were also told they would get $29,000 check for putting the patient on the vent. Do the homework, look up the Ebola study. You will see Remdesivir was supposed to be used for the 1 year study. It only made it 28 days. Death occurred in 61 people out of 174 patients. Please look on Bitchute for "Dr. Bryan Ardis with the most stunning truth about COVID Fauci & Remdesivir you could never imagine." This is an eye opener!

Tonya Horton
Denise Stanley Watkins thank you... I have noticed messages disappearing on other posts too.

Tonya Horton they will blame it on natural causes or something else. My stepfather had a progressive decline in health after the first dose, and was found unresponsive 12 hours after his second dose, then died 3 days later.

Tonya Horton Our neighbor (in his 40s) just told us that he had a heart attack last week and was dead for 20 minutes. He coded twice and they had to do rib-breaking chest compressions to bring him back to life. Doctors said that one of his valves in his heart was blocked at 99%. They have since put a stent in his heart. He did say that he got the first dose of the Covid shot on Monday and then on Tuesday night he had a heart attack at work. Coincidence? This all despite having his heart checked last January and everything seemed okay then. He’s very lucky to be alive.

Ashley Bumsted I had to go to hospital the other night it had been 24 hours since I received the second vaccine. I woke up with my heart racing and felt like I was having a heart attack. I go to hospital and my rate got in the 160's for a solid 3-5 minutes. They brought crash cart in and everything. They checked my heart levels and everything was okay at the time but it obviously did something for my heart to do that. They told me to follow up with heart doctor to make sure my heart levels stay the same. My chest has still been tight and I haven’t felt the same since I had the shot.

I do not know of anyone that caught this so called deadly virus and no one that I know knows anyone that caught it... so if it were so deadly then why out of the millions of people in Canada know of one person that had it.... But my friend had a bilateral stroke after the injection.. also funny how I know so many people now that know people that had strokes, heart attacks.. blood clots some died some are permanently disabled after their vaccines & perfectly healthy before ... We were warned over a year ago from the real experts in science how deadly these injections were... the ones that have been injected have two to three years before organs start shutting down if not before.... People seem to think that adverse reactions are immediate... not with these injections for sure.

Brooke Knutson

Brian McKay
Lana Homan I feel awful for the fathers death, but correlation is not causation. It never will be.
Brian McKay

Lana Homan not lie purposely but yeah, most of the conspiracy believers do lie without even knowing it. It’s the general psychological need. Your brain desperately wants to assign a cause for things that seem implausible or that it can’t truly grasp.

Brian McKay

Lana Homan imagine the lie so many have to tell to themselves that tens of thousands of well educated scientists fake studies and are part of a vast conspiracy. That extremely well conducted studies and decades of research are negated by YouTube videos and bad websites and social media. That’s insane. Pure insanity.

Lana Homan

Brian McKay Just because something doesn’t fit into your little box of confirmed biases, doesn’t mean it’s fake or a “conspiracy theory”. All you have to do is read through all the responses to this post to see the reality of this “vaccine”. It has proven to be dangerous, especially to young men. People I know personally have lost someone the very next day after the shot. A healthy guy in his late 30’s! Next day. His last post on Facebook was complaining about the chest pains he was having after getting it. He was dead the next day. Just coincidence, huh?

Lana Homan

Brian McKay just correlation not causation, I’m sure. You are a real piece of work. https://www.facebook.com/hydeout44

Karen Nyman

Brian McKay the sad reality is (at this point) there is absolutely NO way to show causation. If someone suffers after receiving the vaccine, it will ALWAYS be blamed on something else by the powers that be. There is no recourse because pharmaceutical companies are protected.
Lana Homan

Brian McKay the man was afraid that his son would get Covid so he made sure he got the vax. He was pro-vax. Not a conspiracy theorist. His son died from myocarditis. If you do the research, that has been a common side effect of the vax. My best friend works in an ER. She has seen so many cases of myocarditis in young men and numerous blood clots like she has never seen before in blood draws. She’s not a “conspiracy theorist”. She’s seen enough to not want to get the shot, so she is quitting a 35 yr career as a hospital worker due to the mandate. She’s already had Covid and still has the antibodies. She doesn’t need the low efficacy vax. I could give you plenty of other examples from other friends who are hospital workers, including my ex.

Erica Morgan

How awful, I will pray for your peace and healing 🖤

Brian McKay

I have family members in the ICU and on ventilators right now because they bought into all of the crap and refused to get vaccinated. Again, zero empathy at this point.

My grandma didn’t have any heart problems. Fell and hit her neck on the marble bathtub after being severely dizzy and started having seizures and vomiting. Went to the hospital and discovered a-fib and an aneurysm. Now she has a pacemaker in and this was all less than 48 hours after her 2nd u-know-what which happened to fall on the morning of my birthday.

Aaron Byrd
Lana Homan you know they are advertising a medication right now for myocarditis... hmmm I wonder why?

Tonya Horton
I’m sorry you have family members going through this. Unfortunately, there is no guarantee if they got vaccinated that they wouldn’t still be in the same positions. It is only assumed.
My question would be what did their doctors do as soon as they showed symptoms? High doses of d-3, c, zinc? Ivermectin? Hydroxychloriquin? Monoclonal or anything?? Or was it like they “treated” my husband & so many others and say quarantine and wait, if it gets too bad go to the hospital?? In our case The doctors, did nothing... regular doctor and urgent care! They said any treatments were only used at the hospital. Imo... what I am hearing from some doctors speaking out is much of the hospitalizations could be prevented if more doctors would start some early treatments. Nothing is 100% either way. Prayers for your family members!

Katelyn Emala
Megan Catherine Casey I've come to find 90% of people who "know someone who died from the vaccine" haven't. Lol its funny how they want to through numbers around for the vaccine on "deaths" but any number they throw out is FAR less the the number of deaths from covid itself... wonder why that is? people should have the right to choose what they put into their bodies. I'll never disagree with that. But the amount of "Facebook doctors and nurses" we have these days and people who act like its 1845 and we don't have modern medicine and medicine hasn't advanced and came a long way is what frightens me. I want to ask people if they live under a rock? I get they don't like their government forcing stuff on them, but to completely disregard science and medicine because they're mad at their government isn't how you solve the issues were having.

Lisa Koch Hawkins
Tonya Horton I know someone who was in the hospital after the first jab. His doctor said don't get the second one. His employer said get it or your terminated and we don't care what your doctor has to say. Let's talk about following the science.
Christine Helrigel
Ashley Bumsted get a blood smear done.. the jab causes your little red blood cells that normally look like Cheerios to become deformed and clump together. I wonder if your heart rate is speeding up in a desperate attempt to keep enough oxygen flowing to your brain and other organs. One doc in Canada tested his vaxxed patients with blood smears and 62% of them had abnormally shaped and clumped red blood cells. The reds carry the oxygen.

Yra Sybil
Amy Davis Pascoe praying for your daughter

Kelci Perkins if you think you are safe from the ventilator just because you are vaxxed then you aren’t paying attention. This comment section, alone, represents just a small sampling of the population, yet it is overwhelmed with more testimonies of people dead after being fully vaccinated. The original post was asking for stories from people who had an unvaxxed loved one who died from Covid. At this point if there were any responses regarding as such, it would be like trying to find a needle in a haystack in this comment thread.

I lost my 65 year old mother after she was hospitalized 2 days after getting her 1st vaccination. They blamed it on renal failure, after she started throwing clots so large, they couldn't finish her final dialysis treatment that was only to extend her life. When asked of it was the vaccine, the nurses stated "We honestly don't know, it could have been."

Brian McKay strokes and heart attacks happen for different reasons. The latter 99% of the time gives notice. So yes, if someone drops dead from a heart attack without any prior history or warning, I would 100% believe the cause was a vaccine that knowingly has negative effects on the heart.

Brian McKay so if thousands of people were having strokes after eating Ben and Jerry's, would that warrant an investigation? Because I think that's what people are trying to say here. I agree with you, correlation does not always equal causation, however, I personally believe it should be looked into either way, to either prove so or otherwise. And not sure if knew, but Bluebell ice cream was shut down a few years back for cases of listeria where 3 people died and others got sick....so, apparently they take "coincidences" a little more seriously in the ice cream business.

Sara Pereira I don't think they think about what other medicine people are on. That is what scared me most. As I've had one heart attack didn't even know I did till 6 days later when I woke up in hospital. But this had nothing to do with the vaccine but I was scared to get the vaccine just due to this.

Ivan Polenko

Stephanie Layne-Waddell According to your own facebook page, your father had a staph infection. One can't get a staph infection from a vaccine - any vaccine.

You've also failed to mention that he's been having health issues for at least several months (that's as far as I scrolled down your page) even before the final hospitalization.

Don't soil his memory with your conspiracy bs.

Make America Honest Again

Tonya Horton I'm curious, why aren't you on the news telling that story then? Why do we never see anything about deaths from the vaccine on conservative media? Wouldn't conservative news media be all over that? … Yet nothing!

Karen Stillings Miller

Jamie Ingram kudos for your dr doing the research. It says right on the FDA site how it is a major problem for men under 40.

Katrina Shar

Ivan Polenko Heartless bast***. Just because someone is having medical issues does not mean that the medical interventions like the vaccine, can't make it worse or escalate it. why do you think they advise people that have autoimmune disorders and are immunocompromised not to take live virus vaccines? It adds to being immunocompromised status and allows for opportunistic infections. Come on, that's basic medical science.

Make America Honest Again

Diane Provence I'm very sorry to hear about your stepfather! I'm curious though, was an autopsy done? And if so, and they lied I guess is what you are implying, I wonder… why would they? What is their motive for doing so? And why would doctors ALL OVER THE WORLD all lie and be in on this big conspiracy theory, etc… what do they get out of it? That would mean that the VERY HIGH MAJORITY of the scientists, doctors, etc… are all in on it, are all bad people trying to cover it up. How are that many people globally keeping it a secret? What motive could do so many hundreds of millions of people or more have that way…?

Karen Stillings Miller

Kelsye Cook sadly the govt has seen to it where we can't sue hospitals and pharma is exempt from all liability until 2024! But it's safe and effective!
Make America Honest Again

Amy Davis Pascoe I’m sorry to hear about your daughter, unfortunately there are also plenty of conditions you can develop that way that happen completely out of the blue as well, it happened to me (no vaccine’s in like a decade or more at that time), and I developed a condition that way, just out of the blue, in my 20’s.

There are many health conditions that have triggering events or happen for no reason they can determine whatsoever, one day you are totally fine, the next day you just sadly aren’t!

So it’s very easy to say it might not have been the vaccine. I’m curious what the doctors have said?

Make America Honest Again

Jamie Ingram the myocarditis though, the teenagers have recovered, like the very high majority, it’s been very few that had any serious issues, even the ones that went to the hospital recovered easily, quickly, and well, especially once we were aware of it. Sadly a very small amount were harmed, but far larger percentages of children are harmed, even permanently because of Covid! The around 20% that become long-haulers, and the 10% of those long-haulers now being diagnosed with permanent, life-altering conditions, and the almost 400 children I think it’s at that have died now! And the other condition that is effecting mostly younger children, the MIS-C (multi-system inflammatory syndrome). It’s all devastating!

The vaccine is so important to protect children from Covid for the reasons above, very little side effects when compared to the devastating effect Covid has!!

Angela Roberts Cabrera

McKenna Gibson I saw a commercial of a guy that happened to. He was urging everyone to get the vaccination anyway because it’s still better than Covid
Lisa Holte I have a heart murmur as well, I haven’t seen nor heard of any issues with people with heart murmurs getting the vaccine, so that’s probably why your doctor said that.

I have a lot of very serious/debilitating conditions in which I’m actually in a group they recommended to wait and see about the vaccine… half of my doctors told me to get it, half said to wait. The specialists with my most serious conditions said to wait, but I decided to get the vaccine anyways, that felt like less of a risk to me, by a lot. It was a rough week of side effects, but other than that, it was just fine, no issues other than the usual/expected side effects (simply made worse because of my health issues).

I feel so bad for health care workers, they are doing their best, they have knowledge that we simply don’t on things. I’ve done a lot of research in which I know certain things better than just some of my doctors when it comes to my specific health conditions, but that’s it! There is no reason you needed to cuss your doctor out though. I don’t understand why people can’t be civil/decent/kind.

Il Kristeno Pace-o
Kelly Ghanavati I performed a safety blessing ritual dance around my car before getting on the road today. I would’ve surely died in an accident if I hadn’t.

Jess Williams
Becky Berry its off the cdc just google death rates america. Pretty steady increase considering there was a pandemic in there
Make America Honest Again

Paula Oswalt you also see it in dysautonomia (which Amy Davis Pascoe later on explained in the comments that her daughter has), it’s very common. I have POTS, and have had it for quite a while now, it’s the usual sadly. Your health can change at any given moment, all of the sudden, so there’s also a high possibility that the vaccine didn’t cause it, as it changes for people all the time, out of the blue sadly as I said, so I don’t know how that could be determined that way, but I hope Amy’s daughter gets help and gets better and they can figure it out!

I know for me, my POTS & other health issues got a lot worse when I had Covid/became a long-hauler, in my opinion the vaccine is so worth it! My health has deteriorated a lot since I was sick (getting close to a year and a half ago now), and I’ve stayed way worse health-wise than I was, it’s devastating. In the groups I’m in, that’s the normal it seems with the health issues I have, Covid has made things a lot worse for the high majority it seems, yet very few, a small minority, have been made worse by the vaccine studies have shown- and they aren’t even close to as bad off as those of us who got Covid the small studies/polls have shown.

https://en.m.wikipedia.org/wiki/Dysautonomia

Kelly Ghanavati

Il Kristeno Pace-o I'm sure the tribal elders would be proud....

Karen Stillings Miller the not suing vaccine places has been that way for a long time though, it's nothing new. Why are so many people only having an issue with it now? I'm just curious. Other countries can sue though, they didn't pass the protections that we did that way, just saying.

Danielle Haggard doesn't that make you wonder why? I mean, wouldn't conservative news media be all over it? Lol, and yet nothing! That's why it's so hard for me to believe. Conservative news media would be telling stories like those day in and day out... so why is there nothing?

Karen Stillings Miller
Make America Honest Again also don't you think it's weird that Biden is pushing it on everyone but the White House is exempt?

Make America Honest Again
Aaron Byrd maybe because myocarditis is a thing? And it's been a thing before the vaccine’s. Just think, medications also have to go through processes to be approved, I would imagine the drug has been around for a while, at least being tested for a while before the vaccine, correct? So I'm not sure… what’s your point?

Make America Honest Again
Aaron Byrd as in what side effects? What medications? If there are 5 to 6 each morning there would have to be A TON of meds then, right? And for how long has this been happening, this morning 5/6 update of new meds? Can you name the meds for me? Also how were they able to be made, tested and approved so quickly? Lots of things don’t feel like they add up there! As for the idiots comment, I can’t say, and I wouldn't use the word “idiot” myself, but I fear you might be somewhat right that way… for instance, did you even ask this doctor friend of yours any of the questions I just asked, or any other questions, or did you just immediately believe them…?

Danielle Haggard
People are losing their jobs over speaking out, and no news station wants to carry stories against what the media is putting out. They are scared to lose credibility and sponsors for their ads.
Make America Honest Again
Carolyn Vetter Twietmeyer what 14-35 year olds are having heart attacks and strokes? How many? The thing that I find strange is that not even very conservative media is sharing those stories… so where are they? Who are they? Why aren’t they and/or their families speaking out? Don’t get me wrong, there has been a small amount of people that have come forward, that have had allergic reactions or proven issues with the vaccine’s, and for instance, Ron Johnson had a small group that came forward and believe the vaccine harmed them (those are unproven so far though)… so where are all these other people that have supposedly been harmed hiding, and why…?

Angelique Joy Bolton it’s not poison. I’m sorry you’ve been lied to and believe that. For whatever reason this is still up, which is shocking. Have you not seen anything related to boys and myocarditis with the whackseen? They’ve even allowed a couple of those on MSM, while of course calling it rare. It’s NOT rare. This is a viral post for a reason. The numbers are staggering. Small amount???? Have you seen the hospital videos of victims??? Have you looked at VAERS??? Harvard did a study and determined 1% of injuries and deaths are actually reported. If you can’t see what’s happening here there is no proving anything. Funny with “Make America Honest Again” on your profile/name… It doesn’t seem you have any interest in that.

Sonja Blair Bolser why are you on the news about it then? And why isn’t it on conservative news? Wouldn’t conservative news be all over it? Yet… nothing! Why is that? I think that’s what’s so hard for so many of us to believe… lots of posts on social media about people dying and being harmed from the vaccine, etc… but ALMOST NOTHING about it on conservative news. Ron Johnson did a thing with some saying they believed they were harmed by the vaccine. I watch a lot of conservative news and I never really see anything about it, so it doesn’t seem very legit to me that way. There’s NO WAY that conservative news wouldn’t be telling these stories just DAY AND NIGHT… over and over and over again!

Aaron Byrd

Make America Honest Again this is someone that I have known for years and she anticipated something like this happening early on because of the hard push now of the jabs and these medications have been in the works for a good while because they already knew what the side affects would be... you don’t have to trust what I am saying but she said that certain new medications and some older ones suddenly started coming up to be used as treatment for certain complications that aren’t consistent with what she and several other doctors are used to ... people that have been in the game for years can see trends and they can see almost that something isn’t right or at least it would make you ask questions.... you go ahead and believe what you want and once you start hearing so much noise that you won’t be able to ignore it then you can think about this and say hey maybe this guy was right ... these people have a lot of skin in the game and they will take full advantage of making billions at our expense!

Blake McCabe okay.
These were the things we were told by various doctors and specialists throughout his 4 month ordeal which coincidentally all began within 7 DAYS of him receiving the 1st dose of Pfizer vaccine... NOT a coincidence. They are not MY assessments of my Daddy's health issues. The doctors/specialists did NOT KNOW what was taking over my Daddy's lungs, even AFTER he underwent a Bronchoscopy and tissues, cells and fluids were taken from inside of his lungs!

My Daddy died a SLOW DEATH of DROWNING and it all began on day #7 AFTER receiving ONE DOSE of the Pfizer Covid "vaccine"

Perhaps you should read ALL of my posts throughout my poor Daddy's ordeal of suffering because he was LIED to and MANIPULATED into taking a "Safe and Effective" Poison into his body.

I certainly do not need the likes of YOU advising me of how to honor my Daddy and his memory.... I HONOR my Daddy and HIS LIFE by TELLING THE TRUTH that obviously, you, and those of your like-mindedness DO NOT WANT TO HEAR!

But don't you worry, the FULL TRUTH will be CONFIRMED as I had my Daddy transferred to a leading University Hospital where my family and I requested to have my Daddy's lungs FULLY AUTOPSIED.

You need to work on your understanding of how studies work. They are all skewed. Sure, if there is ANY effectiveness in the vaccine that makes sense. You also have to factor in control variables...such as those likely to vaccinate are less likely to be in close social environments, less likely to be maskless, less likely to do a whole lot of things that can increase risk. It's not a controlled study to compare vaccinated to unvaccinated. Especially with how recent most vaccinations are. Hence why we are seeing a rise in cases in unvaccinated individuals. Regardless, the death rate is way below the prior peak, even with that consideration. And, there are few or any articles or studies claiming current strains, while more transmissible, are worse. It's just basic statistics. And in almost all areas in the US, cases are already declining, as they did in every other country that got the surge before we did.

Husband was tired for 2 days and had a headache another 2 days, 16 year old lost her smell but thats it, I stayed on my couch for a week got better went on about my business with no need for any western medicine facility. Had a friend pass one week after their second shot.

So many testimonials to turn into news stories, you know, proper news reporting!

Nope. The ones I know are doing just fine now. No shot.

Only vaccinated I heard

My girlfriends softball teammate just got his shot, now his face is partially paralyzed!

I tend to look at people that have a picture of them in front of a mountain with the idea that they are compensating for some type of deficiency.

We've never had anywhere near this much scrutiny over smokers who got lung cancer, alcoholics who got cirrhosis, overweight people getting type two diabetes, promiscuous people who got STDs, and drug addicts who overdosed. But now we're supposed to criminalize an entire class of people because of something that supposedly they could have prevented.

IVE GOT A BETTER IDEA. WHY NOT DO STORIES ON THE TRUTH FOR A CHANGE???

Go on?!...try it. YOU MIGHT FEEL URRRMM CLEANED/ moral again, actually FIND YOUR ETHICS?!

Yep....

THOUGHT NOT.

ANY HOW:
I know 4 people who got covid after vaxxx?!

but they all managed to avoid it for 16 months prior while working in care/ retail. WEIRD RIGHT?!

I also know 6 other people who are ill after the COVID19 vaccines numerous health concerns arising over time.

This is the on-going LIVE list of some of the symptoms reported between them:

Body stiffness, aches and pains, severe pain at injection site/ arm & through the body, eye problems. Gluten/ lactose intolerance/ celiac disease, arthritis, breathlessness, tightness/ tingling in the chest, mini stroke, swelling behind the eye. ( awaiting specialist treatment) full body rash, swollen lymph nodes/ lumps in the breast ( she’s 24 years old) needs a mammogram, metallic taste in the mouth: extreme depression/ low mood/ motivation.

THESE ARE PEOPLE I ACTUALLY KNOW?!

one even had covid before the covid 19 AZ vaccine. He said THE VACCINE SIDE EFFECTS ARE FAR, FAR WORSE THAN COVID ITSELF.

needles to say. he’s never having his second or another one. His partner. she says NO BOOSTER/ NO MORE VACCINES

I hope you see what’s happening?

the lies are catching up. People are sadly experiencing firsthand what us ‘ conspiracy theorists’ have been saying for over a year.

WHATS THE DIFFERENCE BETWEEN A CONSPIRACY THEORY AND THE TRUTH?

“ OH ABOUT 6 MONTHS”. Xx

Jolene Ryan Keating
Written by the famed Anglican author C.S. Lewis in 1948. Very applicable to today:

“How are we to live in an atomic age?” I am tempted to reply: ‘Why, as you would have lived in the sixteenth century when the plague visited London almost every year, or as you would have lived in a Viking age when raiders from Scandinavia might land and cut your throat any night; or indeed, as you are already living in an age of cancer, an age of chronic pain, an age of paralysis, an age of air raids, an age of railway accidents, an age of motor accidents.’

In other words, do not let us begin by exaggerating the novelty of our situation. Believe me, dear sir or madam, you and all whom you love were already sentenced to death before the atomic bomb was invented: and quite a high percentage of us were going to die in unpleasant ways.

It is perfectly ridiculous to go about whimpering and drawing long faces because the scientists have added one more chance of painful and premature death to a world which already bristled with such chances and in which death itself was not a chance at all, but a certainty.

The first action to be taken is to pull ourselves together. If we are all going to be destroyed by an atomic bomb, let that bomb when it comes find us doing sensible and human things—praying, working, teaching, reading, listening to music, bathing the children, playing tennis, chatting to our friends over a pint and a game of darts—not huddled together like frightened sheep and thinking about death. They may break our bodies (a microbe can do that) but they need not dominate our minds.”

Mark Shoup

I lost a loved one to COVID-19. She was 135 years old.

She was a grand old lady, a beacon of light to millions, beloved by millions more. She was a native of France but came to America young and settled in New York City, where she would greet millions of immigrants just like her. She was of tall stature, always on her feet, never tiring, never wavering, always looking to greet the next person, always lighting the way home—even during 9/11. In 1986 at age 100 she did get a face-lift and some physical therapy.

Her name was Columbia. Her French name was Libertas.

You know her as Lady Liberty.

I tested positive for “The VID” at the end of Sept. Initially I thought it was just my normal seasonal bad allergies .... Cough & runny nose primarily. At first I didn’t have a fever, no shortness of breath, no fatigue, no loss of smell or taste. My general practitioner put me on my normal allergy prescriptions, including an inhaler and just said to watch my symptoms to see if anything progressed. A couple of days later I noticed I couldn’t smell or taste anything. I went and got tested and I tested positive. I called my general practitioner back to let her know and she put me on a couple different prescriptions geared more towards Covid. Then I signed up for the Monoclonal Antibody treatment (Regeneron) bc I’m currently being treated for breast cancer (so I have a suppressed immune system) and then have seasonal asthma. I went in 3 days after testing positive for Covid for the Regeneron treatment and within a day or 2 I was feeling better and my symptoms started to subside. No, I’m not vaccinated & don’t plan on it! Talking to one of my Radiation therapists (for my breast cancer treatment), he told me that he used to never have any heart issues .... Got the Covid V and now has heart issues. He had to get a defibrillator put in and now has to see a cardiologist regularly. Too much is unknown about the long term affects of this V, much less looking at the large number of really bad adverse reactions to it. I take D3, Zinc with Quercetin and Airborne daily and I feel that doing so is what helped me to not have severe symptoms. Andrea Morris

Trudy Ann Stergiopoulos
I’m so sorry for your loss. My heart breaks for you over this loss. I lost my son to suicide which is how I am sure my comment was crude and I am so sorry. My point is that your mom’s death is one the CDC is saying did not receive the shot. This spreads the propaganda fear that the ones not receiving the shot are overloading the hospitals but it is those whose body’s immune system rejected the operating system. Your mom is in peace healthy and safely removed from the dangers the end of this system will bring to the living humans and the hybrid cyborgs these people will be if they survive. Again I’m sorry for your loss.

From some replies...
Point is, we need independent reporting from the hospitals to get away from the biased media reporting. Thx to all who shared other examples. If hospitals are bullied by investors andor gov to skew the numbers, we need whistle blowers to call out fraud. If the public doesn't understand the physiology of the vaccine at jab days 1 through14 and then at day 180 and beyond, educate us. Form a panel of docs from various nations so its not US biased speakers.

ER RN here. When would you like to hear from countless patients and family members who now have residual side effects from the vaccine? Or the family members of those who died as a result of the vaccine? Or those who thought they were protected since they got the vaccine because that's what they were told, only to get covid and die? Do any of those stories matter? Just thought you might want to provide the whole story instead of just a portion.

No one in my family has contracted covid. I also worked on a Covid-19 unit for months. I will say my daughters change in health went untreated for months bc it was NOT respiratory in nature so it took months to discover(bc a doctor wouldn't see her) she had a large brain tumor- once discovered we were emergency flighted for surgery within hours bc it was so severe. I think many people have been negatively affected by the lack of preventative care.

I have a story. I was tested positive for covid. The doctor at Rapid Urgent Care in Covington, LA asked if I had been vaccinated. When I told him no, his response was, "Ooohhhhh, that's not good." He did not examine me. Didn't come within 5 ft of me. He said he prescribes a Zpack, and left saying, "Good luck. I hope you don't get real sick. There are no hospital beds anywhere." 11 days later, I was getting worse. I went to a doctor with some integrity who prescribed Ivermectin, Budesonide, doxycycline, pepcid, aspirin, steroid, and Zofran. Within 48 hours I felt 100xs better. Doctors are discriminating against non vaccinated people and not prescribing available treatments. Do a story on that.

I lost my father because he stayed isolated inside as directed, to stay safe while doctors did their work on zoom and family could only see his face in the window. Remember the Ben Stiller video showing his dad staying inside and telling us to do the same? I sent it to my dad trying to explain why seeing him at the window would save his life. Then, I failed to see the drastic changes happening below that window sill until it was too late and nothing could save him. I am not saying there aren't deaths due to lack of vaccination. But I, like many others, have a different story, and if you really want to cover the story of Covid you need to tell them all. Hindsight is 2020. Its obvious now what we did wrong. Lets talk about it.

I'm not sure what the date was but my sister was forced to have the vaccine not too recently in Florida to be able to take her dialysis because she is diabetic. Night before last she was admitted into a hospital with very high blood pressure and dangerously low blood sugar. Her son came home and found her on the floor because her blood sugar was 28 and she had fallen. When they got her to the hospital they told him she had covid even though she had none of the symptoms. Her heart stopped and they revived her and sent her to another hospital more equipped. They placed her on a ventilator and have kept her extremely sedated. As of last night they started weaning her off the medicine so that she would wake up. Today they are going to try and remove her breathing tube. She was forced to have the vaccine and now she is in the hospital with covid. Run these stories instead of your idiotic stories about people who choose to trust in God our creator instead of trusting in scientist and big Pharma. You news people are a joke. It's the vaccinated people that are causing all of the problems. Write a true story for once and write about that.

Our entire family had covid in January and my kids barely had a fever for one day, even my 9 month old baby. My husband and I had it much worse and while it was not enjoyable, we didn't end up close to going to the hospital. What we did get was a whole bunch of helpful information from friends OUTSIDE the medical system to help us deal with symptoms. Which we very effect in helping us. I've also cared for several older family members and friends with covid since and haven't gotten sick. I had my blood drawn at LabCorp last week and tested positive for antibodies. 9 months out. Natural immunity > vaccine and covid coping helps at home keep people out of the hospital. Let's start spreading REAL and HELPFUL information!

Got the vaccine on 8/27 and the next day I developed a sore throat and cough which has turned into heart palpitations, shortness of breath and chest pain. When I lay down, it literally feels like I'm drowning. After going to the walk in, I was told it could be related to the vaccine but they have no way of being sure and just wanted to get me better in time for my second shot. I was given prednisone, an antibiotic and a rescue inhaler. After finishing those, I feel no better. I emailed my PCP to find out what I should do because I am terrified to have the second shot feeling this way. She sent me to a pulminologist who ordered a CT scan and blood work. Nothing was found, now I'm being referred to a cardiologist. Meanwhile, if I don't get the second shot by 10/4, I lose my job that I've been at for 16 years but getting a doctor to sign off on not getting the second shot is virtually impossible. So now I'm choosing between my health and my ability to take care of my family. The worst part is that the powers that be don't care at all. I was perfectly healthy before getting the shot, this is extremely frustrating and makes me incredibly mad that I'm stuck in this position with no good choice.

I know more people who have gotten covid after getting the vaccine. 1 died a month after the vaccine.

My entire family had covid, including my 11 month old son, and 13 month old niece. We were all fine after about 10 days, and now feel better than ever since we have the natural antibodies. No need to vaccinate over here. Natural antibodies seem to be stronger than the vaccine... and safer.

I received my covid vaccine. I worked the front line at my local hospital in rooms with covid patients 8, 12 and sometimes 16 hours. I was so excited when this vaccine rolled out no pressure from anyone I went right in line to take it. First in December then shortly after the new year. I looked at all the health care workers and elderly people in the big conference room with hope for the first time you could see it in our eyes. Till February. That February I didn't receive my period. Not pregnant just didn't come March April may. Till an ob/gyn and Reproductive endocrinologist said we don't know for sure if its the vaccine but we can't confirm it was. I just wish we would be able to say the negatives of this always I'd rather live everyday unprotected by a covid vaccine than not be able to get pregnant become I am not receiving a cycle. Did we make a mistake idk? I know I regret this!

Cancer like never before, heart issues like never before, a friend is now diabetic and had to have a stent put in, strokes, bones breaking, ALS, and much more all in the vaxxcinated. Me step-daughters step-dad was killed in a hospital today in New Mexico because he wasn't vaxxcinated. He was put on a vent and the doctor killed him for the money. How sick is this world we live in? I am curious as to why we don't see this in the news—doesn't it spark your curiosity as a journalist???

As a healthcare provider THAT WORKS IN URGENT CARE that can Assess Diagnose Prescribe and treat under an Indiana and Kentucky License and Federal DEA—as a Family Nurse Practitioner, and a Certified Functional Medicine Practitioner

Goal is not to scare anyone to get or not get vaccine but to ENCOURAGE YOU TO THINK OUTSIDE The box-- for YOU TO MAKE YOUR OWN INFORMED DECISION!! Find the FACTS--not by just one scientist but multiple... search for it look for it--dig to find the answers,,,, not just for the situation at hand but always--it's your health--It's okay to ask questions

It's okay to ask what about this and what about that... and when you get your answer make sure it is validated!!

#1 I see more people getting COVID now that are vaccinated versus unvaccinated and
#2 why are there not studies out there looking at that?

#3 I have plenty of patients that have had Covid and still have the antibodies for COVID-19 yet the lab report states:

"the FDA issued a safety communication reiterating that "antibody testing should not be used to evaluate a person's level of immunity or protection from COVID-19 at any time, and especially after the person received a COVID-19 vaccination."

HOWEVER SCIENCE YES SCIENCE HAS been using antibody testing for any other virus to determine "immunity" for decades!! For example Rubella---

Per the CDC you can determine immunity of this virus by:

1. written documentation of vaccination with one dose of LIVE rubella virus-containing vaccine administered on or after the first birthday (not mRNA)
2. laboratory evidence of immunity (The IgG rubella antibody takes a bit longer to appear than the IgM, but once it does, it stays in the bloodstream for life, providing protection against re-infection.)
3. laboratory confirmation of rubella disease

Or for The Virus Hepatitis A---IgG antibodies are detectable in the body for life, providing protection against a future hepatitis A virus infection. The IgG anti-HAV test is used to detect past HAV infections and may occasionally be used to determine if an individual has developed immunity from a previous infection or vaccination
So why is the COVID IGG antibody test not reliable?? I wonder is it because that someone might have false antibodies with the vaccination (as we can tell by so many people getting Covid after being vaccinated…) Yet no one is discussing natural immunity?? Where are the studies for this?? Why is it that SCIENCE DOES NOT want to know the results for this? It's baffling to me and it should be baffling to everyone else!!

Where are the reports that are being discussed on social media and news channels about the adverse reactions in the last nine months? Or the amount of deaths from immunizations that have skyrocketed compared to the last 20 years combined? None of this is being discussed instead people are saying follow the science? The science is not from the journalist---instead the big shots that are shouting out the "science "follow the dollar signs…

I've seen a patient come in for a second dose of the vaccine that had Bell's palsy's… Yes Bell's palsy's and went to the ER 10 days after his vaccine and was told it was stress related and that he was safe to get his second dose…

I have seen both sides… Individuals die from Covid that were healthy, individuals die from the Covid vaccine that were healthy, individuals that had severe side effects from the Covid vaccine that were healthy, individuals that have long-haul symptoms from having Covid… But apparently the individuals that have issues from either Covid or the Covid vaccine and or individuals that have died from the Covid vaccine are not "important "… instead what's important is feeding and changing the individuals subconscious mind to think that they are wrong for anything they want to do for their health other than what the CDC says…

One last thing what about a study on people that have been exposed over and over again yet have never contracted.. looking to see if there's a commonality to help science with this!!??

My husband was infected with Covid in July by his fully vaccinated coworker, I had Covid last February and slept next to him while he was sick and did not get reinfected. Why are we not talking about natural immunity after Covid infection? I did not get vaccinated because my immune system is already doing a better job than the vaccine. If you want to call yourself journalists, then you should be objective and tell both sides of the story. How many people are dying or getting extremely sick who have already had and recovered from Covid? My guess is not many, and they want us to get a vaccine that is not as effective as our natural immune response? Also, I'm NOT an anti-vaxxer, myself and my children are fully vaccinated for everything else that's available, but this whole Covid process has made me uneasy about this particular vaccine.

Not a story about the shot. But I had to have a surgery early this summer. They insisted I be tested for Covid before the surgery. And guess what! I tested positive. I had absolutely no symptoms. The disease I have is very rare so I had to see a specialist that ends up being several states away from my home. Anyways, since I had no symptoms and I traveled so far for it they went ahead with the surgery. They supposedly had to use a different surgery room. I was initially quoted around $5000-$6000 for this surgery. I just received my final bills and because I tested positive for COVID my $5000 surgery turned into $40,000. Now who’s benefiting from false positives? Makes me wonder how many false positives are out there.

Our loved one was admitted with Covid and the hospital refused to even attempt give any treatment, including high dose IV vitamins! The next step on their protocol was the ventilator. We had to take matters into our own hands, like Amanda Gentry's family did, and it saved his life! After two days, his oxygen requirements dropped. After 3 days, he was out of ICU and three days after that, he went home! The lack of use of something other than the NIH/CDC protocols (and the use of Remedesivir) is what is killing people!!!

I know of quite a few people who recently had heart attacks, strokes, and aneurysms, and they all had one thing in common - just days or weeks after they got their dose. So far everyone I know who hasn't gotten it are healthy and thriving.

My sil's sister had COVID, progressed to pneumonia, went to ER to get antibiotics and wished to go home bc she was doing ok enough otherwise. They held her, put her on oxygen, and refused to give her the alternative treatments (that she had already been taking) bc she "should've just gotten the vax", according to nurses. Eventually they stopped letting family come in and she ended up intubated. She died. Her family is looking to sue for malpractice. It's going to be tough.

Apparently some hospitals decide that if you are not willing to get the vax, that you don't get a choice and are treated however they see fit.

Can you do a story on people who are not getting COVID & are not vaccinated to try to figure out why? I am from South Dakota with no lock downs & no mask mandates, we are beating to our own drum here. I only wore a mask when it was absolutely required which was only Menards & Target in our town. I ran an event center that seats 500 & took tickets for concerts, hosted weddings, business meetings, etc the whole time the rest of the country was shut down. We also have a dance studio for 200 kids in the same building. Parents, grandparents and siblings come to pick ups and drop offs as normal. I own a small gift shop & had thousands of people through over the holidays & weekends. I've been tested for COVID many times because of direct exposure for long periods of time… including my husband. I slept on his contaminated pillow, we kissed, shared drinks/food while we was sick, he even exhaled into my mouth while I inhaled (all intentionally trying to get it & be done) As of last week, I still have no antibodies & I obviously have never once tested positive for COVID. I wrote the Mayo Clinic to ask to be part of any studies & didn't hear a word back. I'm raising my hand , offering to be a part of any studies happening… no takers.

My first moderna vaccine was February 27. I immediately reacted and was treated onsite. Over the next week I had 4 life threatening reactions in which I had to go to the ER. I was unable to care for myself or my son. I'm a solo parent. I made arrangements for my death as the hospital couldn't help me and it felt like I was dying. Heart rate was 120 at rest, high blood pressure, massive amounts of pooling water sweat on my chest, hard time breathing, whole body hives, inside and out, paralysis at times, loss of muscle control for walking, constant buzzing in each cell and tremors in my whole body, I stopped salivating and was drinking a liter of water an hour, burning everywhere, the horrors go on. Thankfully some TCM herbs from a highly skilled acupuncturist put the fire out and restored some order. I spent the next 3 months mostly bed bound. I'm on 5 meds now and many supplements and it's 6 months later and I feel so much better. I now carry an epi pen everywhere I go as I am allergic to many things that were not an issue before. I'm hoping my other vaccine injured friends have similar results soon. I urge anyone who is having these reactions to hold on!! Some are desperate and suicidal due to the censoring, gaslighting and no help from the community and doctors. We are the half vaxed, hated by all. Please believe us, see us, help us. I've been a wellness practitioner for over 19 years and I've had an unprecedented number of clients in the last 6 months coming in with "unexplained" symptoms since receiving the jab. Unfortunately, biased reporting such as this, causes most of them to refute the idea that their sudden onset severe health issues have nothing to do with the fact that they were recently vaccinated, even though they've been in good health for their entire lives prior to this. True journalism is dead.

Maybe you should do a story on how a perfectly healthy athletic water polo player 16 year old girl gets vaccinated, and shows up at her sports physical to find out her heart was beating at 32 beats per minute, and she had myocarditus. That’s a story.

Wow! Knowing I’m not alone in this. I’m sorry for all you guys have gone through.

I received the Pfizer vaccine both rounds end of Feb. I’m 37 and decently healthy. No health concerns. Single mother of 2 precious boys.
On May 15th I was diagnosed with a pulmonary embolism (several) in my left lung along with pulmonary infarction (dying tissue from clot). It took me a bit to recover from that and it hurt like heck!
I’m now on blood thinners the rest of my life!
July 30th got covid and covid pneumonia but I’m okay. I lived in fear every day during covid bc of the damage already done to my lung from the pulmonary embolism caused by the vaccine to keep me from getting covid (lessen symptoms) or spreading it! This has affected the rest of my life!

No, but I’ve been keeping track of all the people I’ve ran across that are experiencing severe side effects from the shot. Why don’t you help them make their voices heard instead of gaslighting them like they’re crazy?!

Leslie Robertson Householder
I want to hear the real stories. Saw a graphic from a hospital network that showed how many beds were occupied by those with covid, how many on respirators, how many deaths, and what percentage of each were unvaccinated. But without also showing how those percentages compare to the percentages of those two groups in the larger non-hospitalized community, the full story is missing, and the meaning of those numbers is incomplete. I want reporters who give the complete facts and let the people derive their own meaning from them. That would be refreshing. I'd love to see a story about what’s happened on this thread.

My father got the second dose of his vaccine. Two weeks later he had a “migraine” that he couldn’t get rid of. He’s never had migraines before. He couldn’t sleep because of it and eventually he started hallucinating. He would see things in his vision that weren’t there, when it got really bad he saw people in his vision. He lost 18 lbs had to go to 4 emergency rooms and 3 neurologists before the last one told us what we already knew he was vaccine injured. It was the worst 3 months of my families life. He didn’t tell a joke, he didn’t smile. He cried and we hardly ever see him do that. They gave him 3 new meds and sent him on his way.

I had Covid July 2020'.
I'm immunocompromised as I had a liver transplant in Feb. 2020. Released from the hospital 35 days later as the country was going into lockdown to slow the spread.

Never hospitalized.
Severe flu-like symptoms for a little over a week.
I actually take anti-rejection drugs that lower my immune system and I survived Covid. Unvaxxed and have NO plans of getting it! I do my best in caring for my overall health and take necessary precautions.
Faith over fear!

Actually, would you consider covering stories about family members being separated from loved ones during their hospital stays? That would be a worthwhile read.

Our local hospital barred me from entering the ER with my husband last December due to covid protocols. That was a truly awful experience and I know I'm not the only one who is angry that immediate family members are considered "visitors" and have been prevented from being with their loved ones during their hospital stay.

We don't plan on ever getting vaccinated- and why would we?

I lost my grandfather to Covid in February ‘21. He was 92. He never actually caught Covid - he died because of the strict regulations put into place in his state. You see, he was a former Fire Police Chief, a very social being, and a beloved figure in the community. When he was told he could no longer volunteer at the local parks, high school games, or other community events and that he instead had to stay home, he got depressed. He was disconnected from the outside world. He wouldn't even turn on the TV because the news, sports, EVERYTHING was just so divisive. He just sat in his chair and looked out the window, saying very little, until the day he passed. Do a story on how our elderly were treated during the lockdowns. I'm sure you'll get a lot of good content from families in New York.

The silence and blatant disregard to be transparent about these things is why we have 80million who are refusing it.

Want more people to get the shot?
- Quit telling them it’s for the sake of others and be honest that it’s pretty much just for the individual to shorten their symptoms.
- Tell BOTH sides of the story.
- Stop forcing it down their throats and threatening to take away their livelihoods.
- Present ALL facts so that people can make an educated choice for themselves.

Otherwise minds will NEVER open to the idea of it... you get nowhere with dishonesty and censorship.

Are there any “true journalists” left out there? The REAL story is right here in your comments section. This isn’t “misinformation” & this isn’t a bunch of “conspiracy theorists”. These are REAL people with REAL personal experiences, and that should matter. Yet the media won’t report this side of the story.

Quite frankly, a lot of us are fed up with the same narrative being regurgitated over & over in mainstream media.
It is painfully obvious that the whole truth doesn’t matter. If it doesn’t feed the agenda of the WHO, NIH, or “Big Pharma” it is being censored, dismissed, & viciously attacked. (We know who primarily sponsors the MSM)

I’m so saddened to hear all of the harm that the shots have caused but I am encouraged to see all of these people speaking out.

There are many of us who aren't wearing blindfolds, and my hope is that more people will see what a lot of us have seen for quite awhile now.

When is enough enough???

I am just back from my dog groomer - she herself was sick with Covid - very sick - I have no idea if she was vaccinated or not as it is frankly NONE of my business so I did not ask - but that is the least of her worries. Her husband who was diagnosed with throat cancer last year was not able to get timeous help for himself. While she was sick with Covid he looked after her and then died literally 3 months later himself (never caught Covid either) her tragedy is not the Covid affecting her which yes she has recovered from her tragedy is the neglect of care during this time to her husband and her tragic loss - and yes we cried together as she told me her story.
I think you have a lot of stories you can report here now from this thread ok maybe not so many are biased towards the story you are wanting to get out there to support a FAILING narrative and to support further division of the people who choose to vaccinate and who choose to not vaccinate. The attempts to manipulate reporting to divide us are now off the scale and I think most people whether they took it or not are sick to the back teeth of that aspect of the proceedings. Perhaps less wanting to know and less judgement of other peoples' healthcare choices (which when I used to work as a GP were a private matter) and more reporting of actual truth and we will have more respect for reporters. I recommend you focus on that. No job is worth selling your soul for.

PLEASE READ THIS ALL

I can't be silent anymore. Enough is enough! It's time to tell everyone my first hand experience.

August 16 my uncle was getting to be discharged from Kelowna General Hospital. Before they discharged him he was given a covid test. August 16 test came back negative August 16 he was given his first shot of the Pfizer vaccine. August 17 when he woke up he felt really sick. August 19 he was admitted back in Kelowna General Hospital. August 19 he tested positive for Covid. They used the PCV for both his tests. On August 20 I spoke to him for almost and hour. He told me that he got sick right after his shot. If you heard the fear in his voice you would understand why I had to look into this. August 21 I asked him to ask his doctor about early treatment like ivermectin and high dose vitamins. Like India was doing with great response. I even had a nurse spell it out to give to his doctor. By August 24ish I spoke to his nurse and she confirmed what he was saying was true. He did test negative for Covid got the Pfizer vaccine right after the test results came in and was indeed sick. What he was sick with was indeed covid. He was given the standard Covid treatment. Even though he has other underlining health concerns like his liver. By August 30 he was on 85% oxygen. My mom was contacted around the same time by his doctor asking her if they should make him comfortable to dye. She expressed her concerns about his treatment and asked he be taken off the meds. He was and started to improve a bit. On September 3 I asked her nurse how is it that he could test negative one day and literally hours after his Pfizer vaccine be sick with covid. I said it doesn't make sense. How can someone test positive and have no symptoms but my uncle was hours away from being sick and test negative. I asked if I was exposed to Covid how long does it take to start feeling sick. She said 4-5 days but I could not have symptoms for up to 14 days. I asked if this was being reported to the health officials. She told me to call Interior Public Health. So I did. September 3 I reported it. I was brushed off. With claims that the vaccine had no live virus into. I insisted this be looked into. September 3 Interior Public Health called me back saying she passed his case to her superior. I asked for a case or file number. I was told that they are emailing the cases directly to the health officer. September 6 I get a call back saying that they decided his case would not be reported as a possible side effect. He did not meet their criteria. He would be classified as a Covid case. I expressed my concerns that they were classifying his case as covid and not a possible
I expressed my concerns that they were classifying his case as Covid and not a possible effects from the vaccine. Why would they not want to look into this? Why should I trust my body to this experimental drug if they were not doing there do diligence on tracking possible effects. The facts didn’t add up. She took my email and emailed the Criteria on September 7

September 7 I got a call back and was told yet again this was not going to be reported. Worse he would not be exempt from getting his second shot.

My uncle was now at 95% oxygen. I said but he got sick after the first one and now has Covid. Like every known virus your body builds up a natural immunity. That’s how our immune system works, we seem to all forget that. I would not back down and was now demanding that this be reported. I was told then that his nurse was also asking for this to be reported.

September 7 I spoke to his doctor. I asked her how many patients in the hospital were vaccinated. She stumbled on her words and said that was not a report that they are provided with. I asked if they were tracking the cases of vaccinated patients. Her answer was unclear and confusing. I took it as a no they are not tracking this.

September 8 I was told his case would now be exempt and not recommended the second dose and his case has now been reported. Confirmation of his case being now reported to the CDC was mail to my mom.

September 11.

I got to talk to a nurse after 2 days of calling and waiting. She told me he was at 70% now. I was so happy. I asked again to talk to him. She said around 2 pm. After talking to my mom, I called back Kelowna General Hospital. I got another nurse. He was nice too!! They all have been nice!!

I asked. How many people are in the hospital with c*vid that have one or more doses. He said he didn't know. I asked him if that is being monitored. He said well I guess we can look it up through their medical care. I asked him why it wasn’t on their charts. He didn't know. My uncle was so medicated today when I spoke to him all I could hear is the ventilator. So he gets better then not.

10 days left is what I was told. I will make sure that of g*vernment keeps records of everything. The people need informed consent.

I lost two family members because of covid - they weren't sick, but one shot himself because “suicide prevention” wouldn’t help because of covid. The other one shot himself because he was in overall poor health, couldn’t feed himself, and “meals on wheels” wouldn’t come bring him food because of their fear of covid.
Needless tragedy because basically, we’ve lost our humanity.

Vicki Greene
WXYZ-TV Channel 7 You may need to change your story narrative - seems like a good journalist would have plenty of stories about what is REALLY happening to our Covid response.
I'm see more stories about harm & death from the vaccine or collateral damage from lockdowns than the virus itself - wow! Definitely a story here about the vaccines.
Sarah Lunder
My whole family is unvaccinated and healthy. We all just had covid. My kids were unaffected and my husband and I had colds. Immune systems for the win!

Whitney Ashley Upright
In ten years, we will see the commercial that says; ” if you or a loved one have suffered or died from the covid vaccine, you may be entitled to…..”

Rachael Dommert
My brothers kidneys stopped working after the vaccine.
My sitter had a stroke after the vaccine and can never return to childcare.
A friend had a heart attack (in her 30s).
A family friend was denied her cancer treatments unless she got the vaccine and she died the night she got it.
As a newborn photographer, I’m seeing my moms are having their babies too many weeks too early and the newborns are being born with health issues.
People who simply speak the truth about the vaccine giving them heart issues are having their accounts deleted.
This isn’t about a vaccine anymore, it’s about basic human rights.

I am of the opinion that dying free is more important than living in fear. Dying is not the worst; fear, hate, cowardice, slavery, loss of liberty are much worse.
Think about it

How about mental health from so much isolation? How about untreated health concerns because people are terrified of going to the hospital right now until its too late...

I know a child who completely lost depth perception after the vaccine. A healthy normal child. That's neurological. Scary times

I also know someone who was Covid recovered, got the shots and ended up hospitalized for 6 days right after the second shot

He’d be considered “unvaccinated” the way they’re measuring it since he was only 2 days, not 2 weeks, past his second shot... but he was completely fine before the shots, already had recovered from Covid shortly before getting the shots, and he ended up in the ICU within 48 hours of the 2nd dose

Another person I know here in idaho died at 33, she was a mom of two. She was a nurse who was forced to get vaccinated to keep her job and she died the same week after getting it, was completely healthy before. Now those kids don’t have a mother anymore.

I am more scared of getting the vaccine than getting covid. Idk why it is just my intuition.

ER nurse and I have stories of healthy young 20 year olds having lung issues that were vaccinated. Along with the ones I have lost in my ER due to stroke or PEs that were vaccinated. Or the ones with underlying heart issues that if effects and the new onset high BP in 30-40 age group. Yup I believe that about covers it. Take your pick.

I can tell you many stories of friends family members that 100% died because they were denied treatment. Without a doubt, every time I talk to the families, it's the same horrific story of effective treatments withheld in the hospital. There is no family to watch and question and keep mistakes from happening because family is kept away. Medical mistakes are the third leading cause of death in America even before Covid. Can you even imagine that not being the #1 reason now? This is the biggest crime against humanity in a long time and you, the media, are largely responsible. I seriously don't know how you each sleep at night knowing the lies you spread by not sharing any truth outside of what you are paid to say. Pitiful and humanity’s suffering is largely on your shoulders. Start doing the right thing and stop being a pawn. The love of money truly is the root of all evil.

No story here, we are all fine. How about you do your story on the child of a vaccinated mother who was forced to get the vaccine or her hospital wouldn't deliver her baby. That poor baby now has uncontrollable shaking and is undergoing multiple tests. Shame on you for ignoring the real problem, the vaccine.

I can share losing 2 people to suicide during the lockdown. And also several people whose surgeries were rescheduled and they instead died due to lack of care. I am assuming you want realistic stories and what is actually going on in the communities?

I Just spoke to a group of friends in Austria. They are part of a dance company. Covid went through the whole company, 100 odd people. She said 90% of them were unvaccinated. No one sick for longer than a week, cold symptoms, nothing more. They are all healthy and happy as they now have the immune protection that comes with it. Imagine a world where media and govt focussed on good health as a strategy, i know, its child like thinking.

Lost 1 family member who was fully vaccinated and died of covid and one had a heart attack and then stroke. Both had two doses of the Pfz.

I lost my unvaccinated father three weeks ago, but he died as a result of a horrifically accelerated decline after we were no longer allowed access to him in his care facility because of COVID restrictions. Whereas his family (wife and children) would spend time caring for him 1-2x daily, helping to feed him his meals, assist in daily hygiene activities like teeth brushing and nail trimming, taking him outside for fresh air and movement, hugging and talking to him as he endured an awful sort of dementia, all of that came to a screeching halt in March 2020. From that point on, we’d only be able to wave through a window or behind a glass door. He was confused and would try to walk towards us. He’d motion for us to come in and hold his arms out for us to come to him. After months of this, he seemed to give up and would give a sad wave, until he eventually stopped looking up at us altogether.

I would receive calls that he had fallen out of bed at night, fallen trying to walk in the dining room, tripped on the side of a chair leg in the entryway, slipped walking past someone’s wheelchair... he’d have head wounds, mouth wounds, bruised hips and back.

Eventually, as a result of his teeth not being brushed (he would only allow my mother to help him, and she was there nightly performing these duties prior to Covid) his teeth rotted out and began to chip, break, and shatter when he’d fall. He eventually had nothing but sharp, nubby chards left in his mouth and couldn’t eat regular food. His meals then had to be puréed and overworked employees who didn’t have the capacity to sit for 30-45 minutes and slowly spoon feed him (as we had done when he couldn’t) didn’t. He lost so much weight. We were finally allowed access this summer, but by then it was too late. The repeated falls, the trauma of isolation from family, the lack of nutrition all took their toll and he was 102lbs when he died. I’ve ever experienced anything like this, and our lives will never be the same.

I lost my grandpa due to him being vaccinated. He wasn’t in very good health, had diabetes and had to go to dialysis, but he was living and getting around at 85 years old. As soon as he got vaccinated, he went on hospice immediately and died 2 weeks later. Almost lost my grandma as well but she is a fighter.

Charity Davis
Had 17 family members come down with covid last school year that had not been vaccinated 5 that would be considered very high risk with health conditions like diabetes, high cholesterol and high blood pressure and all recovered fine without the use of any vaccine or respirator. Almost a year later my family was exposed to someone with covid again and never got it we are still immune! That's facts!

WXYZ-TV Channel 7, there is a story here. It's not the one you asked for, but it's HUGE and if you are journalists with integrity, you will at least begin an investigation into the hundreds (if not thousands) of claims made right on this thread. If you do not want to follow up, ask yourselves why, and be open to change. Your audience is hungry for truth and you CAN get it to them, if you choose to!

Never in my life have I seen the failure of vaccines be blamed on those who haven't taken them.

I have a friend severely injured from the vax. Instant anaphylactic shock, has been experiencing tremors for 6 months and now has brain damage. Her and her support group reached out to tons of news channels to cover her story and no one would touch it. Hundreds of people have come together with similar symptoms, with no help or recognition from the gov’t and are being silenced from sharing their stories. My teen and I, tested positive for covid and got through it as we would any flu. Why not cover these stories as well???? Look at these comments, it is devastating. Time to start showing both sides of the story.

Vaccine troubles in my small circle...father-in-law had a stroke (all testing showed nothing else different since his work up in 2005), friends wife in her late 30's had a stroke, coworkers wife had seizures for 90 days, our friend’s 14 yr old son is having heart troubles, my best friends' boss (who is a runner and in great shape) has heart trouble. My wife's good friend is a labor and delivery nurse and she has all kinds of horrible reports from vaccinated moms.
